Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2(Rev.1), *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

ACES
See QUARKS

ACETYLACETONE
Effects of acetylacetone additions on PZT thin film processing, 20:10425 (R;US)

ACETYLENE
Automated remote monitoring of toxic gases with diode-laser-based sensor systems, 20:10804 (R;US)

ACID ELECTROLYTE FUEL CELLS
1990 fuel cell seminar: Program and abstracts, 20:10204 (R;US)

ACID MINE DRAINAGE
Disposal of fluidized-bed combustion ash in an underground mine to control acid mine drainage and subsidence. Quarterly report, May–August 1994, 20:9222 (R;US)

ACIDITY
See PH VALUE

ACTINIDE BURNER REACTORS
Modifying SCALE-4.1 for transmutation calculations, 20:9423 (RA;IL)

ACTINIDE ISOTOPES
See also ACTINIUM ISOTOPES
Hazard categorization of 100K east and 100K west in-basin fuel characterization program activities, 20:9535 (R;US)

ACTINIDES
See also AMERICIUM
PLUTONIUM
THORIUM
URANIUM

A correlation of the fission product yields of different isotopes, 20:11623 (RA;IL)
Chemical reactions of actinides with groundwater colloids. Studies of transferability of laboratory data to natural conditions. The aquiferous system in Gorleben. Interim report. Reported period: 1.2.1993-31.12.1993, 20:10500 (R;DE;In German)
HATCHES. A Thermodynamic Database and Management System Reprint Radiochemica Acta, 20:11917 (CM;GB)
Selective extraction of trivalent actinides from lanthanides with dithiophosphinic acids and tributylphosphate, 20:10457 (R;US)
Use of proton accelerators for transmutation of actinides and power production, 20:10602 (IA;XA)

ACTINIUM 225
Measurements on carbon and oxygen radioactivities of heavy nuclei with nuclear track detectors, 20:11574 (RA;RU)

ACTINIUM ADDITIONS
See ALLOYS

ACTINIUM ISOTOPES
See also ACTINIUM 225
Symmetry breaking in the spectra of the odd-A Ac nuclides, 20:11472 (RA;FR)

ACTUATORS
Analysis of K-1 fan system for replacement of valve actuator, B Plant/Waste Encapsulation and Storage Facility, 20:10537 (R;US)

ADENOCARCINOMAS
See CARCINOMAS

ADL PROCESS
See COAL LIQUEFACTION

ADSORBENTS
See also CHARCOAL
Adsorption study for uranium in Rocky Flats groundwater, 20:9752 (R;US)
Advanced sulfur control concepts for hot-gas desulfurization technology. Quarterly report, July–September 1994, 20:9206 (R;US)

ADVANCED LIGHT SOURCE
A beamline for macromolecular crystallography at the Advanced Light Source, 20:10665 (R;US)

AERODYNAMICS
Selected results from the aerodynamic research programme at The Test Station for Wind turbines in the period 1987-1992, 20:9925 (R;DK;In Danish)

AEROSOL MONITORING
Characteristics of thin and coarse particulates of urban and natural brazilian aerosols, 20:10439 (I;BR;In Portuguese)

AEROSOL WASTES
See also FLY ASH
The environment state monitoring around big fossil-fuel power plants exemplified by Belchatow Power Plant. Symposium. Belchatow 29-30 April 1993, 20:9230 (I;PL;In Polish)
The influence of Belchatow power plant on environment on the base of hitherto measurements and research, 20:9232 (IA;PL;In Polish)

AEROSOLS
See also RADIOACTIVE AEROSOLS
Inhalation Toxicology Research Institute annual report, October 1, 1993–September 30, 1994, 20:10823 (R;US)
Sulfate aerosols and climate change, 20:10844 (RA;FI)
The whitehouse effect: shortwave radiative forcing of climate by anthropogenic aerosols, 20:10800 (R;US)

AFTER-HEAT
LWRARC. Decay Heat Rate Calculations for Light Water Reactor Fuel Assembly, 20:11918 (CM;US)

AGREEMENTS

Recycle of radiologically contaminated austenitic stainless steels, 20:9673 (R;US)
Toward a mechanistic understanding of radiation effects in materials, 20:10013 (R;US)
AUSTRALITES
See TEKTITES
AUTOHYDROLYSIS
Deliberate ignition of hydrogen-air-steam mixtures under conditions of rapidly condensing steam, 20:10023 (R;US)
AUTOMOBILE EFFICIENCY STANDARDS
See AUTOMOBILES
STANDARDS
AUTOMOBILE INDUSTRY
See AUTOMOTIVE INDUSTRY
AUTOMOBILES
Spray-formed tooling, 20:10508 (R;US)
Traffic PAH and other air pollutant in the center of a large city, 20:10839 (R;DK)
AUTOMOTIVE INDUSTRY
Economic evaluation of auto shredder residue pyrolysis plant design using process simulation software, 20:10239 (R;US)
AUTORADIOGRAPHS
See IMAGES
AUTORADIOGRAPHY
Determination of the environmental radioactive contamination using radiography, 20:10880 (IA;RU)
AVG PROCESS
See COAL GASIFICATION
AXIAL VECTOR MESONS
The $(0^+,1^+)$ heavy meson multiplet in an extended NJL model, 20:11393 (R;DE)

B

B MESONS
B_c-meson production in hadron-hadron collisions, 20:11378 (R;RU)
CP violation and strong phases from penguins in $B^{\pm} \rightarrow PP$ and $B^{\pm} \rightarrow VP$ decays, 20:11348 (R;DE)
Hadronic production of B_c-mesons, 20:11376 (R;RU)
Letter of intent for a study of CP violation in B meson decays, 20:11385 (R;JP)
Search for rare B meson decays into D^+_s mesons, 20:11341 (R;DE)
Theoretical update of the semileptonic branching ratio of B mesons, 20:11349 (R;DE)
BACKGROUND RADIATION
Time-dependent, low-dose reporting limit for dosimeters that are taken home at the end of the workday, 20:11210 (RA;US)
BACKSCATTERING
Diagnostics of hardening coatings based on CrN_x by proton nuclear backscattering, 20:11710 (IA;RU;In Russian)

Use of the proton nuclear backscattering technique for investigation of nitration and oxidation process dynamics in structural steel nitrogenized layers, 20:11709 (IA;RU;In Russian)

BACTERIA
See also METHANOTROPHIC BACTERIA
Transport of subsurface bacteria in porous media, 20:10860 (R;US)

BAGHOUSES
Micronized coal-fired retrofit system for SO_x reduction: Krakow clean fossil fuels and energy efficiency program. Technical progress report number 2, 20:9246 (R;US)

BAILIE PROCESS
See WASTE PROCESSING

BALTIC SEA
Is the damage of the NWP400 wind turbine at Lyse Wind Power Station, 1993-10-16 1500-1800 LST, related to severe wind conditions?, 20:9912 (RA;DK)

BAMAG PROCESS

CARBON 10
Superallowed $0^+ \rightarrow 0^+$ branching ratio in the decay of ^{10}C using the 8π spectrometer, 20:11558 (RA;FR)

CARBON 12 REACTIONS
Towards a unified description of light ion fusion cross section excitation functions, 20:11671 (R;DE)

CARBON 12 TARGET
Computational simplifications in pion and kaon induced nucleon knock-on reactions, 20:11675 (R;AU)
Evaluation of neutron cross sections of ^{12}C up to 50 MeV, 20:11635 (RA;JP)
Longitudinal and transverse momentum distributions of ^9Li fragments from break-up of ^{11}Li, 20:11616 (R;DE)
Measurement of the reaction $C(\nu_{mu},\mu^-)X$ near threshold, 20:11672 (R;US)
Quantal inversion of cross-section for the elastic scattering of 200 MeV protons from ^{12}C, 20:11674 (R;AU)
Study of the unstable nucleus ^{10}Li in stripping reactions of the radioactive projectiles ^{11}Be and ^{11}Li, 20:11617 (R;DE)
Towards a unified description of light ion fusion cross section excitation functions, 20:11671 (R;DE)

CARBON 14
A review of analytical techniques for the determination of carbon-14 in environmental samples, 20:10429 (R;CA)

CARBON BLACK
Carbonaceous aerosols influencing atmospheric radiation: Black and organic carbon, 20:10852 (R;US)

CARBON CYCLE
On the relations between the oceanic uptake of CO_2 and its carbon isotopes, 20:10821 (R;DE)
Simulations of the carbon cycle in the oceans, 20:10932 (R;GB)
U.S Department of Energy contract DE-FG02-90ER61053: Simulations of the carbon cycle (Part II), 20:10931 (R;GB)

CARBON DIOXIDE
Automated remote monitoring of toxic gases with diode-laser-based sensor systems, 20:10804 (R;US)
Cryogenic separation of CO_2 from the fluegas of conventional coal-fired power plants, 20:9221 (R;US)
Economic and game-theoretical analysis of CO_2 reduction agreements, 20:10154 (RA;FI)
Economic effects of restricting carbon dioxide emissions, 20:10124 (RA;FI)
Engineering analysis of CO_2 control and disposal in IGCC systems, 20:9219 (R;US)
Rapid pressure swing absorption cleanup of post-shift reactor synthesis gas. Technical progress report, September 1990–August 1993, 20:9209 (R;US)
Systems and economic analysis of microalgae ponds for conversion of CO_2 to biomass. Fourth quarterly technical progress report, June 16, 1994–September 15, 1994, 20:9833 (R;US)
The effects on photosynthetic CO_2 assimilation to long-term elevation of atmospheric CO_2 concentration: An assessment of the response of Trifolium Repens L. cv. Blanca grown at F.A.C.E., 20:10799 (R;US)

CARBON DIOXIDE ACCEPTOR PROCESS
See COAL GASIFICATION

CARBON DIOXIDE LASERS
Contributions to international symposium on high power lasers, 20:10571 (R;IT)

CARBON MONOXIDE
Kinetics and dynamics of oxidation reactions involving adsorbed CO species on bulk supported Pt and copper oxides. Final project report, January 1, 1991–December 31, 1993, 20:10477 (R;US)
Rapid pressure swing absorption cleanup of post-shift reactor synthesis gas. Technical progress report, September 1990–August 1993, 20:9209 (R;US)

CARBON STEELS
See also STEEL-ASTM-A533-B
Austenite and ferrite grain size evolution in plain carbon steel, 20:10315 (R;US)
Modeling recrystallization kinetics during strip rolling, 20:10316 (R;US)

CARBON TETRACHLORIDE
Remediation of contaminated subsurface materials by a metal-reducing bacterium, 20:9751 (R;US)

CARBORANES
Low density lipoprotein reconstitutions with alkyl and aryl carboranes, 20:10976 (RA;US)

CARCINOGENESIS
Modifications induced by low radiation doses in experimental chemical carcinogenesis in the mouth, 20:11082 (I;AR;In Spanish)

CARCINOGENS
An introductory guide to uncertainty analysis in environmental and health risk assessment. Environmental Restoration Program, 20:9731 (R;US)

CARCINOMAS
Continuous and split-course radiotherapy in locally advanced carcinoma of the uterine cervix. Analyses of local control, distant metastases, crude survival, early and late morbidity and prognostic factors, 20:10995 (R;DK)

CARDIOVASCULAR DISEASES
A human factors engineering approach to biomedical decision making: A new role for automatic target recognizer technologies, 20:11000 (R;US)

Bioconversion
Large scale solubilization of coal and bioconversion to utilizable energy. Fifth quarterly technical progress report, October 1, 1994–December 31, 1994, 20:9213 (R;US)

Combustion
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, December 1, 1993–February 28, 1994, 20:9257 (R;US)

Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, December 6, 1992–February 28, 1993, 20:9253 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 6, 1991–December 5, 1991, 20:9251 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, December 6, 1990–March 5, 1991, 20:9248 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 6, 1992–December 5, 1992, 20:9252 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, June 1, 1993–August 31, 1993, 20:9255 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 6, 1990–December 5, 1990, 20:9247 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report No. 11, March 1, 1993–May 31, 1993, 20:9254 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 1, 1993–November 30, 1993, 20:9256 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, June 6, 1991–September 5, 1991, 20:9250 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, March 6, 1991–June 5, 1991, 20:9249 (R;US)

Combustion Kinetics
Radiation/turbulence interactions in pulverized-coal flames. Technical progress report, first year, September 15, 1993–September 15, 1994, 20:9263 (R;US)

Combustion Products
Nitrogen release during coal combustion, 20:9266 (R;US)

Desulfurization
Molecular biological enhancement of coal desulfurization. Final report, 20:9207 (R;US)

Dissolution
Large scale solubilization of coal and bioconversion to utilizable energy. Fifth quarterly technical progress report, October 1, 1994–December 31, 1994, 20:9213 (R;US)

Flotation
Oxidation of coal and coal pyrite mechanisms and influence on surface characteristics. Technical progress report, 20:9201 (R;US)

Hot Gas Cleanup
Control of coal combustion SO_2 and NO_x emissions by in-boiler injection of CMA. Seventh quarterly project status report, April 1, 1994–June 30, 1994, 20:9226 (R;US)

Mass Spectroscopy
Comparison of several contemporary ionization/mass analyzer techniques for large components of complex fossil-derived materials, 20:9215 (R;US)

Nuclear Magnetic Resonance
Nuclear magnetic resonance studies of granular flows. Quarterly technical progress report, July 1994–September 1994, 20:10432 (R;US)
Two dimensional NMR and NMR relaxation studies of coal structure. Progress report, June 30, 1994–September 30, 1994, 20:9217 (R;US)

Oxidation
Oxidation of coal and coal pyrite mechanisms and influence on surface characteristics. Technical progress report, 20:9201 (R;US)

Pyrolysis
Fundamental studies of coal liquefaction, 20:9216 (R;US)

Pyrolysis Products
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams. Quarterly report, July 1, 1994–September 30, 1994, 20:9259 (R;US)

Structural Chemical Analysis
Two dimensional NMR and NMR relaxation studies of coal structure. Progress report, June 30, 1994–September 30, 1994, 20:9217 (R;US)

Wettability
New concept for coal wettability evaluation and modulation. Technical progress report, October 1, 1994–December 31, 1994, 20:9270 (R;US)

COAL FINES
A study of multi-stage/multi-function column for fine particle separation. Quarterly technical progress report, July 8, 1994–September 30, 1994, 20:9204 (R;US)
A study of multistage/multifunction column for fine particle separation. Quarterly technical progress report, October 1, 1994–December 31, 1994, 20:9205 (R;US)
Engineering development of advanced physical fine coal cleaning for premium fuel applications. Quarterly technical progress report No. 8, July 1994–September 1994, 20:9202 (R;US)
Engineering development of advanced physical fine coal cleaning technologies - froth flotation. Quarterly technical progress report No. 22, January 1, 1994–March 31, 1994, 20:9200 (R;US)

COAL GAS
Advanced sulfur control concepts for hot-gas desulfurization technology. Quarterly report, July–September 1994, 20:9206 (R;US)

COAL GASIFICATION
Fluid dynamics of pressurized, entrained coal gasifiers. Technical progress report, fifth quarter, October 1, 1994–December 31, 1994, 20:9212 (R;US)

COAL INDUSTRY
Coal mining in the power industry of the Federal Republic of Germany in 1993, 20:9269 (R;DE;In German)
Supplement to the annual energy outlook 1995, 20:10115 (R;US)

COAL LIQUEFACTION
Comparison of the activities of fine-particle size catalysts, 20:9214 (R;US)

COAL MINING
Information on the situation of the German coal mining industry. January - September 1994, 20:9244 (I;DE;In German)

COAL PREPARATION
Development of a gas-promoted oil agglomeration process. Technical progress report, October 1, 1994–December 31, 1994, 20:9203 (R;US)

COAL TAR
Vapor pressures and heats of vaporization of primary coal tars. Quarterly technical progress report, July 1, 1994–September 30, 1994, 20:9218 (R;US)

COAL-DERIVED GASES
See COAL GAS

COAL-FIRED GAS TURBINES
Advanced Turbine Systems Program conceptual design and product development. Annual report, August 1993–July 1994, 20:9934 (R;US)
Advanced Turbine Systems program conceptual design and product development. Quarterly report, August–October 1994, 20:9933 (R;US)

COAL-FIRED MHD GENERATORS

Chemical Reactions
Redox reactions of CuO in BaO/CuO mixtures, their effects on the phase relations and the formation of $YBa_2Cu_3O_{7-x}$, 20:10374 (IA;RU)
Crystal Defects
New applications of diffraction topography. Visualization of defects in HTSC and of magnetoelastic waves in weak ferromagnets, 20:11715 (IA;RU)
Crystal Growth
Flame fission between 800 and 2500 deg C, 20:10371 (IA;RU)
Growth of superconducting Bi-Sr-Ca-Cu-O whiskers from amorphous precursors, 20:10368 (IA;RU)
Morphology and structure of BiSrCaCuO whiskers, 20:10373 (IA;RU)
Crystal Structure
High resolution time-of-flight powder diffraction: inside Pandora's box, 20:11712 (IA;RU)

Peculiarities of the crystal structure and superconductivity of Al substituted $EuBa_2(Cu, Al)_3O_{7\delta}$ single crystals, 20:11734 (IA;RU)

Crystal-Phase Transformations
Effect of microstructure on the ortho-to-tetra phase transition parameters in $YBa_2Cu_3O_{7-x}$ compound, 20:11768 (IA;RU)

Electron-Phonon Coupling
Femtosecond spectroscopy of Y-$Ba_2Cu_3O_{7-\delta}$: electron-phonon interaction measurement and energy gap observation, 20:11758 (IA;RU)

Electronic Structure
Doping dependence and orbital character of electronic states in HTSC's, 20:11744 (IA;RU)

Energy Gap
Femtosecond spectroscopy of Y-$Ba_2Cu_3O_{7-\delta}$: electron-phonon interaction measurement and energy gap observation, 20:11758 (IA;RU)
Photoinduced transitions 0.1-0.6 eV in oxygen-doped La_2CuO_{4+x} single crystals, 20:10365 (IA;RU)

High-Tc Superconductors
Barium NQR and NMR in high-T_c superconductors, 20:11755 (IA;RU)
Growth mechanisms, microstructures and superconducting transport properties of deposited HTSC materials, 20:11736 (IA;RU)
Muon spin rotation spectroscopy of high temperature superconductors, 20:11742 (IA;RU)

Interstitials
Defect chemistry of BSCCO and its high temperature conductivity, 20:10372 (IA;RU)

Josephson Junctions
Josephson junctions on chemically etched edges of $YBa_2Cu_3O_{7-x}$, 20:10360 (IA;RU)

Lattice Parameters
Neutron-structure investigation of lattice effects of the fluctuated valency in Re_2CuO_4(Re=Nd, Sm), 20:11717 (IA;RU)

Magnetic Flux
Effect of vortex fluctuations on Tl spin-lattice relaxation in the mixed state of $Tl_2Ba_2CuO_6$, 20:11749 (IA;RU)

Magnetic Susceptibility
The oxidation state and magnetic behaviour of Tb in high-$T_c$related materials, 20:10349 (R;US)

Microstructure
$YBa_2Cu_3O_{7-x}$ film structure at surface steps on MgO substrates, 20:11767 (IA;RU)

Penetration Depth
Anomalous temperature dependence of the electromagnetic penetration depth in $Y_1Ba_2Cu_3O_{7-x}$ single crystals, 20:11747 (IA;RU)

Phase Transformations
Phase separation in oxygen-deficient $RBa_2Cu_3O_x$ compounds as it is seen from the magnetic resonance of rare-earth ions, 20:11756 (IA;RU)

Phonons
Lattice dynamics of HTSC, 20:11743 (IA;RU)

Photoelectric Effect
Photoinduced transitions 0.1-0.6 eV in oxygen-doped La_2CuO_{4+x} single crystals, 20:10365 (IA;RU)

Spin-Lattice Relaxation
Effect of vortex fluctuations on Tl spin-lattice relaxation in the mixed state of $Tl_2Ba_2CuO_6$, 20:11749 (IA;RU)

Superconducting Films
Improved magnetron sputter deposition and critical properties of large-area $YBa_2Cu_3O_{7-\delta}$ thin films, 20:10363 (IA;RU)
Superconducting superlattices: preparation and applications, 20:10377 (IA;RU)
$YBa_2Cu_3O_{7-x}$ film structure at surface steps on MgO substrates, 20:11767 (IA;RU)

Superconductivity
Instability at high flux-flow velocities in a high-temperature superconductor, 20:11737 (IA;RU)
Peculiarities of the crystal structure and superconductivity of Al substituted $EuBa_2(Cu, Al)_3O_{7\delta}$ single crystals, 20:11734 (IA;RU)

FOSSIL-FUEL POWER PLANTS
Aerosol Wastes
The study of trace elements emission by Belchatow Power Plant. The concept of changes in measurement systems, 20:9236 (IA;PL;In Polish)
Air Pollution
Air pollution monitoring around big combustion power plants on the example of Belchatow Power Plant, 20:9233 (IA;PL;In Polish)
Investigations of the influence of fossil-fuel power plants on environments from view points of air pollution, 20:9231 (IA;PL;In Polish)
The modern model of transport of air pollutants originating from high energetic emitters, 20:9237 (IA;PL;In Polish)

The study of trace elements emission by Belchatow Power Plant. The concept of changes in measurement systems, 20:9236 (IA;PL;In Polish)

Air Pollution Monitoring
The analysis of the Belchatow Power Plant influence on radiological situation of environment. Assessment of measurements hitherto and proposals of changes, 20:11088 (IA;PL;In Polish)
The assessment of the existing measuring system for atmospheric precipitation control around Belchatow power plant and a concept of its changing, 20:9234 (IA;PL;In Polish)
The impact of pollutants emitted by Power Plant Belchatow on the forest ecosystems around Belchatow. The state and research perspectives, 20:9235 (IA;PL;In Polish)

Atmospheric Precipitations
The assessment of the existing measuring system for atmospheric precipitation control around Belchatow power plant and a concept of its changing, 20:9234 (IA;PL;In Polish)

Comparative Evaluations
Advanced design nuclear power plants: Competitive, economical electricity. An analysis of the cost of electricity from coal, gas and nuclear power plants, 20:9996 (R;US)

Construction
250-kW power plant construction plan - task 2.4. Topical report, 20:9931 (R;US)
Tampa Electric Company Polk Power Station IGCC Project, 20:9930 (R;US)

Contamination
The analysis of the Belchatow Power Plant influence on radiological situation of environment. Assessment of measurements hitherto and proposals of changes, 20:11088 (IA;PL;In Polish)

Design
Coal-fired high performance power generating system. Quarterly progress report, April 1, 1994–June 30, 1994, 20:9936 (R;US)

Economic Analysis
Advanced design nuclear power plants: Competitive, economical electricity. An analysis of the cost of electricity from coal, gas and nuclear power plants, 20:9996 (R;US)

Environmental Effects
The study of trace elements emission by Belchatow Power Plant. The concept of changes in measurement systems, 20:9236 (IA;PL;In Polish)

Environmental Impacts
The environment state monitoring around big fossil-fuel power plants exemplified by Belchatow Power Plant. Symposium. Belchatow 29-30 April 1993, 20:9230 (I;PL;In Polish)
The influence of Belchatow power plant on environment on the base of hitherto measurements and research, 20:9232 (IA;PL;In Polish)

Forests
The impact of pollutants emitted by Power Plant Belchatow on the forest ecosystems around Belchatow. The state and research perspectives, 20:9235 (IA;PL;In Polish)

Hazards
Complex analysis of hazards to the man and natural environment due to electricity production in nuclear and coal power plants, 20:10039 (R;PL;In Polish)

Nitrogen Oxides
Investigations of the influence of fossil-fuel power plants on environments from view points of air pollution, 20:9231 (IA;PL;In Polish)

Productivity
The specification and estimation of technological change in electricity production, 20:10194 (R;US)

Radiation Monitoring
The analysis of the Belchatow Power Plant influence on radiological situation of environment. Assessment of measurements hitherto and proposals of changes, 20:11088 (IA;PL;In Polish)

Retrofitting
Micronized coal-fired retrofit system for SO_x reduction: Krakow Clean Fossil Fuels and Energy Efficiency Program. Technical progress report No. 1, [April–June 1994], 20:9943 (R;US)

Sulfur Dioxide
Air pollution monitoring around big combustion power plants on the example of Belchatow Power Plant, 20:9233 (IA;PL;In Polish)
Investigations of the influence of fossil-fuel power plants on environments from view points of air pollution, 20:9231 (IA;PL;In Polish)

Terrestrial Ecosystems
The impact of pollutants emitted by Power Plant Belchatow on the forest ecosystems around Belchatow. The state and research perspectives, 20:9235 (IA;PL;In Polish)

Mutation breeding newsletter. No. 41, 20:11030 (I;XA)
GAMMA REACTIONS
See PHOTONUCLEAR REACTIONS
GAMMA SPECTRA
Absolute gamma branching ratios for fission products in the mass range 74-165, 20:11570 (R;XA)
Computerized analysis of gamma-ray spectrum obtained with semiconductor detector, 20:11927 (IA;TH;In Thai)
GAMMA SPECTROMETERS
Gamma spectral analysis via neural networks, 20:10756 (R;US)
Problems of laboratory-scale gamma spectroscopy, 20:10701 (IA;DE;In German)
SWEPP gamma-ray spectrometer system software test plan and report, 20:10685 (R;US)
GAMMA SPECTROSCOPY
Special applications of gamma spectroscopy: on-line and in-situ spectroscopy, 20:10878 (IA;DE;In German)
GAS APPLIANCES
Performance and economic evaluation of the seahorse natural gas hot water heater conversion at Fort Stewart. Interim report, 1994 Summer, 20:10228 (R;US)
GAS BURNERS
Field test finished successfully. High temperature pulsed burner developed to marketability, 20:10562 (IA;DE;In German)
Important incentives from microelectronics. New concepts for control of premixing burners, 20:10560 (IA;DE;In German)
New control system for premixing burners. Optical waveguides record flame signals, 20:10561 (IA;DE;In German)
New ideas for atmospheric burners. 'THERMOMAX linear' reduces NO_x emissions to less than 60 mg/kWh, 20:10563 (IA;DE;In German)
GAS COMPRESSORS
Operational test procedure for Bldg 241-A-701 air compressor, 20:9612 (R;US)
GAS COOLANTS
See GASES
GAS ENGINES
See INTERNAL COMBUSTION ENGINES
GAS FLOW
Metrology measurement capability, 20:10773 (R;US)
SLAB-LLNL. Steady State Dense Gas Dispersion, 20:11921 (CM;US)
GAS GENERATORS
Fluid dynamics of pressurized, entrained coal gasifiers. Technical progress report, fifth quarter, October 1, 1994–December 31, 1994, 20:9212 (R;US)
GAS HEAT PUMPS
Heat pumps - technology, environment and economy. Analysis of a potential heat-pump adjustment to the Danish energy supply system, 20:10273 (R;DK;In Danish)
GAS LASERS
See also CARBON DIOXIDE LASERS
EXCIMER LASERS
Analytical method for compact discharge electrodes in asymmetrical geometries, 20:10570 (R;IT)
Contributions to international symposium on high power lasers, 20:10571 (R;IT)
New technique for discharge electrodes design including asymmetric geometries, 20:10572 (RA;IT)
GAS TURBINE ENGINES
A new tribological test for candidate brush seal materials evaluation, 20:10284 (R;US)
GAS TURBINES
See also COAL-FIRED GAS TURBINES
Advanced Turbine Systems program conceptual design and product development. Quarterly report, August–October 1994, 20:9933 (R;US)
Maintenance of gas turbine systems in pipeline operationc figure analysis. Efficient operation management by means of characteristic figure analysis, 20:9321 (IA;DE;In German)

GAS UTILITIES
Disposal of slightly polluted soils. 2: Evaluation of soils polluted by gas utilities, 20:10889 (R;DK;In Danish)

GAS WELLS
See NATURAL GAS WELLS

GASEOUS EFFLUENTS
See GASEOUS WASTES

GASEOUS WASTES
See also EXHAUST GASES
FLUE GAS
Application of modern diagnostic methods to environmental improvement. Annual progress report, January–October 1994, 20:10808 (R;US)
Combined process of gas permeation and condensation for separation and recovery of organic vapours from off-gas streams, 20:10481 (R;DE;In German)
Tank 241-T-107 tank characterization plan, 20:9651 (R;US)
The challenge of emergency response dispersion models on the meso-gamma urban scale: A case study of the July 26, 1993 oleum tank car spill in Richmond, California, 20:10809 (R;US)

GASES
See also AIR
COAL GAS
EXHAUST GASES
FERMI GAS
RARE GASES
SYNTHESIS GAS
VAPORS
Generation and release of flammable gases in Hanford tanks: An overview, 20:9510 (R;US)
Models for recurrent gas release event behavior in hazardous waste tanks, 20:9467 (R;US)

GASOLINE
Gasoline from natural gas by sulfur processing. Quarterly report No. 5 for the period July 1994–September 1994, 20:9853 (R;US)
Petroleum marketing monthly, February 1995 - with data for November 1994, 20:9298 (R;US)
Price setting under cost uncertainty and menu costs - the case of the Danish petrol market, 20:9295 (R;DK)

GASOLINE ENGINES
See INTERNAL COMBUSTION ENGINES

GAUGE INVARIANCE
The Interrelation of a Z(3) Gauge Theory on Flat Lattices and a Spin-1 BEG Model, 20:11311 (R;XJ)

GAUGE TRANSFORMATIONS
See GAUGE INVARIANCE

GEARS
Experimental investigation of gearbox duration loadings on stall and pitch controlled wind turbines, 20:9904 (RA;DK)

GELS
Porosity in hexylene-bridged polysilsesquioxanes: Effects of monomer concentration, 20:10487 (R;US)

GENE LOCI
See GENES

GENERAL CIRCULATION MODELS
Anomalous cloud absorption? A crtique of the paper entitled "Absorption of Solar Radiation by Clouds: Observations Versus Models", 20:10801 (R;US)
Issues relevant to the development of coupled chemistry/climate models, 20:10851 (R;US)
On the intra-seasonal variability within the extratropics in the ECHAM3 general circulation model, 20:10822 (R;DE)

GENERAL RELATIVITY THEORY
See also RELATIVITY THEORY
The Geroch group in the Ashtekar formulation, 20:11261 (R;DE)

GENERATORS (ELECTRIC)
See ELECTRIC GENERATORS

GENERATORS (PULSE)
See PULSE GENERATORS

GENERATORS (STEAM)
See STEAM GENERATORS

GENES
Complementation of radiation-sensitive Ataxia telangiectasia cells after transfection of cDNA expression libraries and cosmid clones from wildtype cells, 20:11103 (R;DE;In German)
Diagnosis of rinderpest and peste des petits ruminants using PCR, 20:11025 (RA;XA;In French)

GENETICS
Genetics and the unity of biology, 20:10955 (R;CA)
Volume of abstracts, 20:10961 (R;US)

GEOLOGIC FAULTS
Evaluation of potential surface rupture and review of current seismic hazards program at the Los Alamos National Laboratory. Final report, 20:10886 (R;US)

GEOLOGIC FORMATIONS
Simulating silicic eruptions at Long Valley, California as a method to understand processes that influence eruption phenomena associated with caldera formation. IGPP progress report, October 1, 1993–August 31, 1994, 20:9876 (R;US)

GEOLOGIC STRATA
Disposal of fluidized-bed combustion ash in an underground mine to control acid mine drainage and subsidence. Quarterly report, May–August 1994, 20:9222 (R;US)

GEOTHERMAL AREAS
See GEOTHERMAL FIELDS

GEOTHERMAL ENERGY
Geothermal development in Australia, 20:9881 (R;US)
Hot dry rock geothermal energy in the USA: Moving toward practical use, 20:9887 (R;US)

GEOTHERMAL FIELDS
See also GEYSERS GEOTHERMAL FIELD
Long-Term Flow Test No. 1, Roosevelt Hot Springs, Utah, 20:9875 (R;US)

GEOTHERMAL FLUIDS
Partitioning of solutes between liquid water and steam in the system {$Na\text{-}NH_4\text{-}NH_3\text{-}H\text{-}Cl$} to 350°C, 20:9927 (R;US)

GEOTHERMAL HEATING SYSTEMS
Geothermal direct-heat utilization assistance. Federal Assistance Program, Quarterly project progress report, October–December 1994, 20:9892 (R;US)

GEOTHERMAL REGIONS

GEYSERS GEOTHERMAL FIELD
Active magmatic degassing in the NW geysers high-temperature reservoir, 20:9878 (R;US)
Southeast Regional Wastewater Treatment Plant Facilities Improvements Project and Geysers Effluent Pipeline Project. Draft EIR/EIS: Executive summary, 20:9882 (R;US)
Southeast Regional Wastewater Treatment Plant Facilities Improvements Project and Geysers Effluent Pipeline Project. Final EIR/EIS, 20:9886 (R;US)
Southeast Regional Wastewater Treatment Plant Facilities Improvements Project and Geysers Effluent Pipeline Project. Draft EIR/EIS, Volume 2 of 2: Appendices, 20:9884 (R;US)
Southeast Regional Wastewater Treatment Plant Facilities Improvements Project and Geysers Effluent Pipeline Project. Draft EIR/EIS, Volume 1 of 2, 20:9883 (R;US)
Southeast Regional Wastewater Treatment Plant facilities improvements and Geysers effluent pipeline and injection project: Mitigation monitoring and operation plan, 20:9885 (R;US)

GIANT CELLS
See TUMOR CELLS

GIANT RESONANCE
Gamow-Teller strength distribution in the beta-decay of ^{100}Ag from total-absorption gamma spectrometry, 20:11411 (R;DE)
Partial widths for the isoscalar monopole giant resonance decay into the ground state via the e^+e^- pair production, 20:11496 (IA;RU)
Simple model of giant isoscalar resonances in nucleus with neutron halo, 20:11430 (RA;FR)

GLASS
See also BOROSILICATE GLASS
PHOSPHATE GLASS
Application on-oriented fundamental research on electrochromic layers for controlling the total energy transmission rate of windows, illustrated by the example of window panes. Development of fundamentals for a novel backplate electrode. Final report, 20:10250 (R;DE;In German)
Applications of Atomistic Simulation to Radioactive and Hazardous Waste Glass Formulation Development, 20:9680 (R;US)
Corrosion mechanisms of containment glasses for fission products, 20:9415 (R;FR;In French)
Cullet feedstock purification using advanced optical sortation. Quarterly technical progress report, January 1, 1994–March 31, 1994, 20:10247 (R;US)
Cullet feedstock purification using advanced optical sortation. Quarterly technical progress report, October 1, 1993–December 31, 1993, 20:10246 (R;US)
Cullet feedstock purification using advanced optical sortation. Quarterly technical progress report, July 1, 1994–September 30, 1994, 20:10248 (R;US)

GLASS DOSEMETERS

GLOBAL WARMING
See GREENHOUSE EFFECT

GLOVEBOXES
Seismic analysis of safety class 1 incinerator glovebox in building 232-Z 200 W Area, 20:9761 (R;US)

GLOW CURVE
Automatic screening of abnormal LiF:Mg; Ti glow curves for use in routine dosimetry, 20:11214 (RA;US)

GLUON CONDENSATION
NJL Model with Nonperturbative Dependence on Gluon Condensate, 20:11328 (R;XJ)

GLUONS
The gluon propagator in non-Abelian Weizsaecker-Williams fields, 20:11321 (R;US)

GOBAR GAS
See METHANE

GOLD
Projectile image acceleration, neutralization and electron emission during grazing interactions of multicharged ions with Au(110), 20:11723 (R;US)
Resonant coherent excitation of N^{6+} and Mg^{11+} in planar channeling: Anisotropies in ionization probabilities and x-ray emission, 20:10307 (R;US)
Track radiography of heavy elements in minerals, 20:10454 (RA;RU)
Using the activation radiography in geological and geochemical studies, 20:10455 (RA;RU)

GOLD 184
Is a shape coexistence present in ^{184}Au, 20:11441 (RA;FR)

GOLD 197 REACTIONS
Coherent Bremsstrahlung emission in the early stage of relativistic heavy ion collisions, 20:11613 (R;DE)
Interplay of collective flow phenomena and velocity correlations of intermediate-mass fragments in collisions of Au + Au at E = 100 - 400A.MeV, 20:11607 (R;DE)
Multidimensional analysis of collective sidewards flow in Au on Au reactions between 100 and 1050 A MeV, 20:11611 (R;DE)
Thermal photon production in heavy ion collisions, 20:11614 (R;DE)
Velocity correlations of intermediate mass fragments produced in central collisions of Au + Au at E = 150 A.MeV, 20:11608 (R;DE)

GOLD 197 TARGET
A consistent parametrisation for the production rates of negatively charged hadrons and neutral strange particles in nucleon-nucleon, nucleon-nucleus and nucleus-nucleus collisions, 20:11389 (R;DE)
Coherent Bremsstrahlung emission in the early stage of relativistic heavy ion collisions, 20:11613 (R;DE)
Interplay of collective flow phenomena and velocity correlations of intermediate-mass fragments in collisions of Au + Au at E = 100 - 400A.MeV, 20:11607 (R;DE)
Multidimensional analysis of collective sidewards flow in Au on Au reactions between 100 and 1050 A MeV, 20:11611 (R;DE)
Thermal photon production in heavy ion collisions, 20:11614 (R;DE)
Velocity correlations of intermediate mass fragments produced in central collisions of Au + Au at E = 150 A.MeV, 20:11608 (R;DE)

GOVERNMENT BUILDINGS
Development of an energy-use estimation methodology for the revised Navy Manual MO-303, 20:10227 (R;US)
FEDS user's guide: Facility energy screening. Release 2.10, 20:10229 (R;US)
Fire alarm system, 20:10529 (R;US)
Impact of the Demand-Side Management (DSM) Program structure on the cost-effectiveness of energy efficiency projects, 20:10121 (R;US)

GOVERNMENT POLICIES
See also ENERGY POLICY
ENVIRONMENTAL POLICY
The challenge for the oil industry, 20:10184 (R;NO)

GRADED LIE GROUPS
Campbell-Hausdorff Formula and Algebras with Operator, 20:11313 (R;XJ)

GRAFT POLYMERS
PETP track membranes modified by radiation grafting, 20:10403 (IA;RU)

GRAIN ALCOHOL
See ETHANOL
GRAINS (CEREAL)
See SEEDS
GRAMINEAE
Combustion of reed canary grass and grains in small furnaces, 20:9844 (R;SE;In Swedish)
GRAND UNIFIED THEORY
Search for leptoquarks with the ZEUS detector, 20:11340 (R;DE)
Search for signatures of dilepton gauge bosons in HERA and LEPHII-LHC, 20:11359 (R;DE)
GRAPHITE
Experimental investigations of graphite corrosion and aerosol formation during air ingress into the core of a high temperature pebble bed reactor, 20:10090 (R;DE;In German)
GRAPHITE MODERATOR
See GRAPHITE
GRASS
See GRAMINEAE
GRAVITATIONAL FIELDS
Harmonic Coordinates in the Problem on Static Gravitational and Massless Scalar Fields with a Point Source, 20:11312 (R;XJ)
GRAVITONS
Effects of weak self-interactions in a relativistic plasma on cosmological perturbations, 20:11289 (R;DE)
GREAT LAKES REGION

UNDERGROUND EXPLOSIONS
GREENHOUSE EFFECT
An analysis of the economic effects of global warming on Finland, 20:10125 (RA;FI)
Assessment of the impact of the greenhouse gas emission and sink scenarios in Finland on radiative forcing and greenhouse effect, 20:10847 (RA;FI)
Coupled chemistry/climate issues, 20:10849 (R;US)
Economic efficiency of CO_2 reduction programs, 20:10120 (R;DE)
Field, laboratory, and modeling studies of water infiltration and runoff in subfreezing snow on regional scales to estimate future greenhouse-induced changes in sea-level. Final report, 20:10933 (R;US)
Global warming and end-use efficiency implications of replacing CFCs, 20:10802 (R;US)
GREENHOUSE GASES
Assessment of the impact of the greenhouse gas emission and sink scenarios in Finland on radiative forcing and greenhouse effect, 20:10847 (RA;FI)
Carbon taxes and India, 20:10151 (R;US)
Coupled chemistry/climate issues, 20:10849 (R;US)
Numerical computation of optimal reduction of CO2 emissions for a simplified climate economy model, 20:10116 (R;DE)
Sector-specific issues and reporting methodologies supporting the General Guidelines for the voluntary reporting of greenhouse gases under Section 1605(b) of the Energy Policy Act of 1992. Volume 1: Part 1, Electricity supply sector; Part 2, Residential and commercial buildings sector; Part 3, Industrial sector, 20:10139 (R;US)
Sector-specific issues and reporting methodologies supporting the General Guidelines for the voluntary reporting of greenhouse gases under Section 1605(b) of the Energy Policy Act of 1992. Volume 2: Part 4, Transportation sector; Part 5, Forestry sector; Part 6, Agricultural sector, 20:10140 (R;US)
Sector-specific issues and reporting methodologies supporting the General Guidelines for the voluntary reporting of greenhouse gases under Section 1605(b) of the Energy Policy Act of 1992. Volume 1: Part 1, Electricity supply sector; Part 2, Residential and commercial buildings sector; Part 3, Industrial sector, 20:10139 (R;US)
Simulations of the carbon cycle in the oceans, 20:10932 (R;GB)
The Nordic Countries interests in principles for international greenhouse gas agreements, 20:10152 (R;DK;In Danish)
Tropospheric chemistry of greenhouse gases in Finnish conditions, 20:10846 (RA;FI)
Voluntary reporting of greenhouse gases under Section 1605(b) of the Energy Policy Act of 1992: General Guidelines, 20:10138 (R;US)
GREENLAND
Use of wind power in the Arctic regions - a demonstration project in Greenland. Final report, 20:9923 (R;DK;In Danish)
GROUND DISPOSAL
Construction quality assurance report, 20:9547 (R;US)
New Land disposal restrictions for contaminated soil and debris, and newly identified toxicity characteristic organic wastes, 20:10127 (R;US)
GROUND SUBSIDENCE
Disposal of fluidized-bed combustion ash in an underground mine to control acid mine drainage and subsidence. Quarterly report, May–August 1994, 20:9222 (R;US)
GROUND WATER
Chemical Analysis
Quarterly report of RCRA groundwater monitoring data for period July 1 through September 30, 1994, 20:9696 (R;US)
Colloids
Chemical reactions of actinides with groundwater colloids. Studies of transferability of laboratory data to natural conditions. The aquiferous system in Gorleben. Interim report. Reported period: 1.2.1993-31.12.1993, 20:10500 (R;DE;In German)
Compiled Data
Hydrochemical data base for the Death Valley Region, California and Nevada, 20:9492 (R;US)
Contamination
3-D subsurface modeling within the framework of an environmental restoration information system: Prototype results using earthvision, 20:10858 (R;US)
Enhancing the design of in situ chemical barriers with multicomponent reactive transport modeling, 20:10899 (R;US)
Environmental geophysics at J-Field, Aberdeen Proving Ground, Maryland, 20:10787 (R;US)
Estimated recharge rates at the Hanford Site, 20:9705 (R;US)
Geologic and hydrologic records of observation wells, test holes, test wells, supply wells, springs, and surface water stations in the Los Alamos area, 20:9704 (R;US)
MODLP program description: A program for solving linear optimal hydraulic control of groundwater contamination based on MODFLOW simulation. Version 1.0, 20:10914 (R;US)
Qualitative risk assessment for the 100-HR-3 groundwater operable unit, 20:9763 (R;US)
Remediation of contaminated subsurface materials by a metal-reducing bacterium, 20:9751 (R;US)
Decontamination
Projects at the Western Environmental Technology Office. Quarterly technical progress report, October 1–December 31, 1994, 20:10861 (R;US)
Flow Models
Simulation of the groundwater flow of the Kivetty area, 20:10951 (R;FI)
Stochastic modeling of macrodispersion in unsaturated heterogeneous porous media. Final report, 20:10859 (R;US)
Fluid Flow
Groundwater flow velocity measurements in a sinkhole at the Weeks Island Strategic Petroleum Reserve Facility, Louisiana, 20:9275 (R;US)
Multigrid preconditioned conjugate gradients for the numerical simulation of groundwater flow on the Cray T3D, 20:11950 (R;US)
Liquid Flow
Groundwater flow near the Shoal Site, Sand Springs Range, Nevada: Impact of density-driven flow, 20:10864 (R;US)
Mapping
Groundwater maps of the Hanford Site, June 1994, 20:9709 (R;US)

Measuring Methods
Precision and accuracy of manual water-level measurements taken in the Yucca Mountain Area, Nye County, Nevada, 1988–90 (Yucca Mountain Project), 20:9494 (R;US)
Monitoring
Borehole data package for the 100-K area ground water wells, CY 1994, 20:9711 (R;US)
Declustering and stochastic simulation of ground-water tritium concentrations at Hanford, Washington, 20:9706 (R;US)
Estimated recharge rates at the Hanford Site, 20:9705 (R;US)
Geophysical survey for proposed boreholes, 199-K-109A, 199-K-110A, and 199-K-111A, 100K Area, 20:9712 (R;US)
H-Area Acid/Caustic Basin groundwater monitoring report. Third quarter 1994, 20:10923 (R;US)
K-Area Acid/Caustic Basin groundwater monitoring report. Second quarter 1994, 20:10920 (R;US)
Mixed Waste Management Facility groundwater monitoring report: Third quarter 1994, 20:9687 (R;US)
Quarterly report of RCRA groundwater monitoring data for period July 1 through September 30, 1994, 20:9696 (R;US)
R-Area Reactor 1993 annual groundwater monitoring report, 20:10922 (R;US)
Review of present groundwater monitoring programs at the Nevada Test Site, 20:10863 (R;US)
Pollution
Eielson Air Force Base Operable Unit 2 baseline risk assessment, 20:11230 (R;US)
Pumping
Utilization of a hydraulic barrier to control migration of a uranium plume, 20:9732 (R;US)
Qualitative Chemical Analysis
Hydrochemical data base for the Death Valley Region, California and Nevada, 20:9492 (R;US)
L-Area Reactor - 1993 annual - groundwater monitoring report, 20:10921 (R;US)
Radiation Monitoring
L-Area Reactor - 1993 annual - groundwater monitoring report, 20:10921 (R;US)
Radionuclide Migration
Aqueous dissolution rates of uranium oxides, 20:9487 (R;US)
Declustering and stochastic simulation of ground-water tritium concentrations at Hanford, Washington, 20:9706 (R;US)
In situ treatment of mixed contaminants in groundwater: Review of candidate processes, 20:9742 (R;US)
Mixed Waste Management Facility groundwater monitoring report: Third quarter 1994, 20:9687 (R;US)
R-Area Reactor 1993 annual groundwater monitoring report, 20:10922 (R;US)
Review of present groundwater monitoring programs at the Nevada Test Site, 20:10863 (R;US)
Status of outdoor radioactive contamination at the Hanford Site, 20:9718 (R;US)
Technetium-99, iodine-129 and tritium in the waters of the Savannah River Site, 20:9719 (R;US)
Test documentation for the GENII Software Version 1.485, 20:11222 (R;US)
The Savannah River Site's Groundwater Monitoring Program. Second quarter 1994, 20:9411 (R;US)
The grout/glass performance assessment code system (GPACS) with verification and benchmarking, 20:9657 (R;US)
Utilization of a hydraulic barrier to control migration of a uranium plume, 20:9732 (R;US)
Recharge
Estimated recharge rates at the Hanford Site, 20:9705 (R;US)
Remedial Action
Adsorption study for uranium in Rocky Flats groundwater, 20:9752 (R;US)
Albuquerque Operations Office, Albuquerque, New Mexico: Technology summary, 20:9727 (R;US)
Declustering and stochastic simulation of ground-water tritium concentrations at Hanford, Washington, 20:9706 (R;US)
Enhancing the design of in situ chemical barriers with multicomponent reactive transport modeling, 20:10899 (R;US)
Federal Facility Agreement progress report, 20:9785 (R;US)
In situ treatment of mixed contaminants in groundwater: Review of candidate processes, 20:9742 (R;US)
Monitoring remediation of trichloroethylene using a chemical fiber optic sensor: Field studies, 20:10915 (R;US)
Quarterly report of RCRA groundwater monitoring data for period July 1 through September 30, 1994, 20:9696 (R;US)
Risk Assessment
Qualitative risk assessment for the 100-HR-3 groundwater operable unit, 20:9763 (R;US)
Sampling
Environmental surveillance master sampling schedule, 20:9744 (R;US)
The Savannah River Site's Groundwater Monitoring Program. Second quarter 1994, 20:9411 (R;US)
Water Pollution

HANFORD PRODUCTION REACTORS
N Reactor thermal plume characterization study during dual-purpose mode of operation. Part I: Field investigation, Part II: Computer simulation, 20:10075 (R;US)
Status of irradiations performed by testing and irradiation services for BNW as of September 15, 1968, 20:10060 (R;US)

HANFORD RESERVATION
Generation and release of flammable gases in Hanford tanks: An overview, 20:9510 (R;US)
Safety Evaluation for Packaging 101-SY Hydrogen Mitigation Mixer Pump package, 20:10535 (R;US)

Administrative Procedures
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 1, 20:9497 (R;US)

Air Pollution
1995 Study and evaluation of fugitive and diffuse emissions from the 200 East Area at the Hanford Site, 20:9713 (R;US)
Evaluating airborne radionuclide concentrations in the tank farms, 20:9717 (R;US)

Air Pollution Monitoring
Technical description of stack 296-B-10, 20:9716 (R;US)

Aquifers
Groundwater maps of the Hanford Site, June 1994, 20:9709 (R;US)

Buildings
Attachments for fire modeling for Building 221-T, T Plant canyon deck and railroad tunnel, 20:9759 (R;US)

Contamination
Status of outdoor radioactive contamination at the Hanford Site, 20:9718 (R;US)

Criticality
Addendum 2 to CSER 79-002: Extension of the 150 gram fissile limit used in room 187 of PFP, 20:9540 (R;US)

Emergency Plans
Lessons learned during the development and conduct of exercise Fermont, 20:9758 (R;US)

Environmental Quality
Environmental surveillance master sampling schedule, 20:9744 (R;US)

Fire Fighting
B-Plant canyon fire foam supply, 20:10264 (R;US)

Fire Hazards
Fire hazards analysis for W-413, West Area Tank Farm Storage and Staging Facility, 20:9581 (R;US)

Fire Prevention
Fire modeling for Building 221-T - T Plant Canyon Deck and Railroad Tunnel, 20:9519 (R;US)

Fuel Reprocessing Plants
B-Plant canyon fire foam supply. Report, 20:9776 (R;US)

Fuel Storage Pools
Design criteria document, Fire Protection Task, K Basin Essential Systems Recovery, Project W-405, 20:9363 (R;US)
Design criteria document, Maintenance Shop/Support Facility, K-Basin Essential Systems Recovery, Project W-405, 20:9350 (R;US)
In situ characterization of metal fuel stored in the Hanford K Basins, 20:9348 (R;US)
K Basin safety analysis, 20:9771 (R;US)
KE Basin monorail modification for the sludge removal and packaging project, 20:9351 (R;US)
OSR encapsulation basis – 100-KW, 20:9357 (R;US)
Safety assessment of discharge chute isolation barrier preparation and installation activities. Revision 3, 20:9772 (R;US)
Safety assessment of discharge chute isolation barrier preparation and installation, 20:9355 (R;US)
Test plan for K-Basin fuel handling tools, 20:9359 (R;US)

Geophysical Surveys
Geophysical investigation of the SQ Tanks, 221-T Building, 200 West Area, 20:9524 (R;US)
Geophysical survey for proposed boreholes, 199-K-109A, 199-K-110A, and 199-K-111A, 100K Area, 20:9712 (R;US)
Geophysical surveys for proposed boreholes 299-W15-25, 26 and 27, 200 West Area, 20:9525 (R;US)

Historical Aspects
N Reactor thermal plume characterization study during dual-purpose mode of operation. Part I: Field investigation, Part II: Computer simulation, 20:10075 (R;US)
Permissible design pressures for 2S-H14-72S clad process tubes, 20:10062 (R;US)
Reactor and metallurgy R&D programs irradiation processing department FY-1963 - FY-1964, 20:10176 (R;US)
Status of irradiations performed by testing and irradiation services for BNW as of September 15, 1968, 20:10060 (R;US)

Hydrology
Declustering and stochastic simulation of ground-water tritium concentrations at Hanford, Washington, 20:9706 (R;US)

Indoor Air Contamination
Technical assessment of TRUSAF for compliance with work place air sampling. Revision 1, 20:9714 (R;US)

Information Systems
An ugly duckling becomes a swan ···: How an organization becomes customer focused through listening, 20:11951 (R;US)
Configuration management plan for LABCORE Program, 20:11958 (R;US)

Laboratories
Interface control document between Analytical Services and Solid Waste Disposal Division, 20:9614 (R;US)
State of work for services provided by the Waste Sampling and Characterization Facility for effluent monitoring, 20:9710 (R;US)
System design description for Waste Information and Control System, 20:9623 (R;US)

Maintenance Facilities
Design criteria document, Maintenance Shop/Support Facility, K-Basin Essential Systems Recovery, Project W-405, 20:9350 (R;US)

Neutron Dosimetry
Site-specific calibration of the Hanford personnel neutron dosimeter, 20:11155 (RA;US)

Nonradioactive Waste Management
Hanford Patrol Academy demolition sites closure plan, 20:9388 (R;US)

Nuclear Materials Management
In situ characterization of metal fuel stored in the Hanford K Basins, 20:9348 (R;US)
Plutonium finishing plant safeguards and security systems replacement study, 20:9791 (R;US)
Plutonium finishing plant safety systems and equipment list, 20:9329 (R;US)
Westinghouse Hanford Company FY 1995 Materials Management Plan (MMP), 20:9663 (R;US)

Office Buildings
Acceptance test procedure for the MO-293 (1722) 10-wide mobile office, 20:9769 (R;US)

Operation
General Counsel's office FY 1995 site support program plan WBS 6.10.5, 20:9664 (R;US)

Personnel Dosimetry
Site-specific calibration of the Hanford personnel neutron dosimeter, 20:11155 (RA;US)

Power Substations
Type B investigation of electrical fault in 351 Substation, December 4, 1994, 20:9757 (R;US)

Public Relations
Developing prototype indicators of value and costs added through public involvement programs, 20:10122 (R;US)

Purex Process
UO_3 building hazard classification - deactivated state, 20:9520 (R;US)

Quality Control
Environmental surveillance master sampling schedule, 20:9744 (R;US)

Radiation Protection
Radiological standards and calibration laboratory capabilities, 20:11216 (R;US)

Radioactive Waste Disposal
Construction quality assurance report, 20:9547 (R;US)
Definitive design report: Design report project W-025, Radioactive Mixed Waste (RMW) Land Disposal Facility NON-DRAG-OFF. Revision 1, Volume 1 and 2, 20:9546 (R;US)
Mitigation of hydrogen by oxidation using nitrous oxide and noble metal catalysts, 20:9655 (R;US)
W-025, Acceptance Test Report, 20:9545 (R;US)

Radioactive Waste Facilities
A low-temperature process for the denitration of Hanford single-shell tank, nitrate-based waste utilizing the nitrate to ammonia and ceramic (NAC) process, 20:9441 (R;US)
Acceptance test procedure for SY Tank Farm replacement exhauster unit, 20:9585 (R;US)
Compliance matrix for the Mixed Waste Disposal Facilities, Trenches 31 and 34, burial ground 218-W-5. Revision 1, 20:9618 (R;US)
Engineering work plan for implementing the Process Condensate Recycle Project at the 242-A evaporator, 20:9662 (R;US)
Heat exchanger bypass test report, 20:9523 (R;US)
Interim safety basis compliance matrix for Trenches 31 and 34, 20:9774 (R;US)
Project management plan for Project W-178, 219-S secondary containment, 20:9558 (R;US)
WRAP Module 1 waste characterization plan, 20:9548 (R;US)

Radioactive Waste Management
241-TX acoustic monitoring 114TX tank waste, 20:9645 (R;US)
305 Building cold test facility management plan, 20:9536 (R;US)
45-Day safety screen results for single shell tank 241-AP-106, liquid grab samples, riser 1, 30° and 150° in conjunction with evaporator campaign 95-1, 20:9592 (R;US)
A summary report on the search for current technologies and developers to develop depth profiling/physical parameter end effectors, 20:9541 (R;US)
Acceptance test report for tank bottom thermocouples on Tank 241-SY-101, 20:9587 (R;US)
Acceptance test report for the link belt LS-518 crane hook position/rate indication system, 20:10538 (R;US)
Achievement of process control, safety, and regulatory compliance in a mixed waste evaporator system at the Hanford Site using data quality objectives, 20:9517 (R;US)
Acquisition and reduction of data obtained from tank 101-SY in-situ ball rheometer, 20:9448 (R;US)
An assessment of the dilution required to mitigate Hanford tank 241-SY-101, 20:9459 (R;US)
Analysis and characterization of double shell tank 241-AP-108, 20:9589 (R;US)
Application of a CdTe gamma-ray spectrometer to remote characterization of high-level radioactive waste tanks, 20:9506 (R;US)
B-Plant canyon fire foam supply, 20:10264 (R;US)
Barriers to development and deployment of innovative waste minimization technologies, 20:9468 (R;US)
Borehole data package for the 100-K area ground water wells, CY 1994, 20:9711 (R;US)
CPAC optical moisture monitoring: Characterization of composition and physical effects on moisture determination Task 2A report, 20:9598 (R;US)
Construction quality assurance report, 20:9547 (R;US)
Documentation assessment, Project C-018H, 200-E area effluent treatment facility, 20:9526 (R;US)
Double shell tank waste analysis plan, 20:9605 (R;US)
Engineering test plan for Tank 241-SY-101 in situ viscometer, 20:9640 (R;US)
Experimental data and analysis to support the design of an ion-exchange process for the treatment of Hanford tank waste supernatant liquids, 20:9450 (R;US)
Facility effluent monitoring plan for the plutonium uranium extraction facility, 20:9496 (R;US)
Fast Flux Test Facility, Sodium Storage Facility project-specific project management plan, 20:9527 (R;US)
Field lysimeter studies for performance evaluation of grouted Hanford defense wastes, 20:9447 (R;US)
Fire hazards analysis, east tank farm storage and staging facility, 20:9580 (R;US)
Fire modeling for Building 221-T - T Plant Canyon Deck and Railroad Tunnel, 20:9519 (R;US)
Fiscal year 1995 work scope for the 222-S, WSCF, 325, and Litco Laboratories, 20:9616 (R;US)
Gas and liquid sampling for closed canisters in the K-West Basin, 20:9336 (R;US)
Geophysical survey for proposed boreholes, 199-K-109A, 199-K-110A, and 199-K-111A, 100K Area, 20:9712 (R;US)
Geophysical surveys for proposed boreholes 299-W15-25, 26 and 27, 200 West Area, 20:9525 (R;US)
Hanford double shell tank corrosion monitoring instrument trees, 20:9509 (R;US)
Hanford solid waste management system simulation, 20:9464 (R;US)
Hanford spent nuclear fuel project recommended path forward, volume III: Alternatives and path forward evaluation supporting documentation, 20:9347 (R;US)
Hazard control indices for radiological and non-radiological materials, 20:9575 (R;US)
High level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 6, 20:9502 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 2, 20:9498 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 1, 20:9497 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), 20:9499 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 4, 20:9500 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 7. Revision 1, 20:9503 (R;US)

High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 5, 20:9501 (R;US)
Identification of contaminants of concern Columbia River Comprehensive Impact Assessment, 20:9458 (R;US)
Independent assessment to continue improvement: Implementing statistical process control at the Hanford Site, 20:9335 (R;US)
Integrated dynamic modeling and management system mission analysis, 20:9611 (R;US)
Interface control document between Analytical Services and Solid Waste Disposal Division, 20:9614 (R;US)
LDUA engineering development plan, 20:10533 (R;US)
LLBG mixed waste disposal facility leachate sampling and analysis plan, 20:9606 (R;US)
Level maintenance for Tank 101-SY mitigation-by-mixing test, 20:9654 (R;US)
Mixed waste trench loading placement instructions, 20:9583 (R;US)
Organic carbon in Hanford single-shell tank waste, 20:9444 (R;US)

Systems engineering implementation plan for the liquid effluents services program, 20:9617 (R;US)
T Plant removal of PWR Chiller Subsystem, 20:9365 (R;US)
T-Farm complex alarm upgrades, 20:9588 (R;US)
Tank 241-AX-102 tank characterization plan, 20:9641 (R;US)
Tank 241-BY-105 tank characterization plan, 20:9639 (R;US)
Tank 241-BY-106 tank characterization plan, 20:9638 (R;US)
Tank 241-C-101 tank characterization plan, 20:9646 (R;US)
Tank 241-C-103 tank characterization plan. Revision 1, 20:9637 (R;US)
Tank 241-C-111 headspace gas and vapor sample results - August 1993 samples, 20:9643 (R;US)
Tank 241-T-107 tank characterization plan, 20:9651 (R;US)
Tank 241-T-111 tank characterization plan, 20:9636 (R;US)
Tank 241-U-103 tank characterization plan, 20:9648 (R;US)
Technical description of stack 296-B-10, 20:9716 (R;US)
Test report for run-in acceptance testing of hydrogen mitigation test pump-2, 20:9529 (R;US)
Test specification for decant pump and winch assembly, 20:10262 (R;US)
Testing of isolation barrier sealing surfaces, 20:9532 (R;US)
Transportation impact analysis for shipment of irradiated N-reactor fuel and associated materials, 20:9343 (R;US)
UO_3 building hazard classification - deactivated state, 20:9520 (R;US)
Westinghouse Hanford Company FY 1995 Materials Management Plan (MMP), 20:9663 (R;US)
Work plan for SY Farm Integrated Data Acquisition and Control System (DACS-2a), 20:9661 (R;US)

Radioactive Waste Processing

241-A evaporator flowsheet users manual, 20:9658 (R;US)
242-A evaporator vacuum condenser system, 20:9621 (R;US)
Analytical services: 222-S characterization of 242-A Evaporator Slurry, Campaign 94-1. Addendum 1A, 20:9591 (R;US)

Radioactive Waste Storage

305 Building cold test facility management plan, 20:9536 (R;US)
45 Day safety screen results for Tank 241-C-108 – Augers 94-012, 94-014 and 94-015, 20:9593 (R;US)
Aerosol characteristics in the offgas from a pilot-scale sluicing operation, 20:9449 (R;US)
Analysis of K-1 fan system for replacement of valve actuator, B Plant/Waste Encapsulation and Storage Facility, 20:10537 (R;US)
Characterization plan for Hanford spent nuclear fuel, 20:9452 (R;US)
Engineering task plan for flammable gas atmosphere mobile color video camera systems, 20:9602 (R;US)
Engineering task plan for the vapor monitor installation into 241-C-103 tank, 20:9599 (R;US)
Estimates of laboratory accuracy and precision on Hanford waste tank samples, 20:9582 (R;US)
Fast Flux Test Facility, Sodium Storage Facility project-specific project management plan, 20:9527 (R;US)
Fire hazards analysis, east tank farm storage and staging facility, 20:9580 (R;US)
Gas characterization system functional design criteria, 20:9608 (R;US)
Hazard categorization of 100K east and 100K west in-basin fuel characterization program activities, 20:9535 (R;US)
Hydrogen recombiner catalyst test supporting data, 20:9656 (R;US)
In situ sampling cart development engineering task plan, 20:9603 (R;US)
K Basins fuel encapsulation and storage hazard categorization, 20:9353 (R;US)
Life-cycle cost analysis 200-West Weather Enclosure: Multifunction Waste Tank Facility, 20:9560 (R;US)
Packaging design criteria, transfer and disposal of 102-AP mixer pump, 20:9543 (R;US)
Position paper - primary ventilation system configuration, 20:9567 (R;US)

Project 93L-EWL-097, fire alarm system improvements, 300 Area, 20:9767 (R;US)
Project W-049H instrument & control acceptance test report, 20:9551 (R;US)
Research and development support of the Hanford site tank waste remediation system, 20:9460 (R;US)
Spare mitigation/retrieval mixer pumps, 20:9607 (R;US)
Special case waste hazard categorization. Revision 1, 20:9775 (R;US)
Standard-B Hydrogen Monitoring System, system design description, 20:9624 (R;US)
Statistical characterization report for Single-Shell Tank 241-T-104, 20:9630 (R;US)
TBP and diluent mass balances in the PUREX Plant at Hanford, 1955–1991, 20:9505 (R;US)
Tank 241-AP-107 tank characterization plan. Revision 1, 20:9647 (R;US)
Tank 241-B-103 tank characterization plan, 20:9642 (R;US)
Tank 241-B-112 tank characterization plan, 20:9653 (R;US)
Tank 241-C-107 tank characterization plan, 20:9649 (R;US)
Test plan for slow speed core sampling envelope test, 20:9644 (R;US)
The solubilities of significant organic compounds in HLW tank supernate solutions, 20:9511 (R;US)
Uncertainties in the measured quantities of water leaving waste Tank 241-C-106 via the ventilation system, 20:9597 (R;US)
Video requirements plan for the HMT equipment removal system, 20:9780 (R;US)
Work plan for upgrade of SY-101 Hydrogen Mitigation Test Project Data Acquisition and Control Systemm (DACS-1), 20:9660 (R;US)

Radiochemistry
Addendum 2 to CSER 79-002: Extension of the 150 gram fissile limit used in room 187 of PFP, 20:9540 (R;US)

Remedial Action
Estimated recharge rates at the Hanford Site, 20:9705 (R;US)
High level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 6, 20:9502 (R;US)
RCRA Facility investigation/corrective measures study work plan for the 100-DR-2 operable unit, Hanford Site, Richland, Washington, 20:9729 (R;US)
Transport of radioactive ions in soil by electrokinetics, 20:9750 (R;US)

Research Programs
Reactor and metallurgy R&D programs irradiation processing department FY-1963 - FY-1964, 20:10176 (R;US)

Safeguards
Fire hazards analysis for the uranium oxide (UO_3) facility, 20:9793 (R;US)

Safety
Management response plan for the Chemical Safety Vulnerability Working Group report. Volume 2, 20:10134 (R;US)
Plutonium finishing plant safeguards and security systems replacement study, 20:9791 (R;US)

Safety Standards
High level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 6, 20:9502 (R;US)

Site Characterization
Borehole data package for the 100-K area ground water wells, CY 1994, 20:9711 (R;US)
Definitive design report: Design report project W-025, Radioactive Mixed Waste (RMW) Land Disposal Facility NON-DRAG-OFF. Revision 1, Volume 1 and 2, 20:9546 (R;US)
Geophysical investigation for proposed flow meter installation holes, 100H Area, 20:10917 (R;US)
Geophysical investigation of the SQ Tanks, 221-T Building, 200 West Area, 20:9524 (R;US)
Geophysical surveys for proposed boreholes 299-W15-25, 26 and 27, 200 West Area, 20:9525 (R;US)
Groundwater maps of the Hanford Site, June 1994, 20:9709 (R;US)

Spent Fuel Storage
An assessment of KW Basin radionuclide activity when opening SNF canisters, 20:9770 (R;US)
Design criteria document, Fire Protection Task, K Basin Essential Systems Recovery, Project W-405, 20:9363 (R;US)
Gas and liquid sampling for closed canisters in the K-West Basin, 20:9336 (R;US)
Hanford spent nuclear fuel project recommended path forward, volume III: Alternatives and path forward evaluation supporting documentation, 20:9347 (R;US)
Hazard categorization of 100 K West fuel canister gas and liquid sampling, 20:9354 (R;US)
K Basins fuel encapsulation and storage hazard categorization, 20:9353 (R;US)
Special case waste hazard categorization. Revision 1, 20:9775 (R;US)
Spent nuclear fuel sampling strategy, 20:9356 (R;US)
Testing of isolation barrier sealing surfaces, 20:9532 (R;US)
Transportation impact analysis for shipment of irradiated N-reactor fuel and associated materials, 20:9343 (R;US)

Storage Facilities
Descriptions and diagrams of the primary and annulus ventilation systems of the double-shell tank farms as of January 1988, 20:9628 (R;US)
Design review plan for Multi-Function Waste Tank Facility (Project W-236A), 20:9562 (R;US)
Enraf Series 854 advanced technology gauge (ATG) acceptance test procedure. Revision 2, 20:9584 (R;US)
Functions and requirements for tank farm restoration and safe operations, Project W-314. Revision 3, 20:9576 (R;US)
Hanford Tank Farm interim storage phase probabilistic risk assessment outline, 20:9430 (R;US)
Kaiser Engineers Hanford internal position paper – Project W-236A, Multi-function Waste Tank Facility – Peer reviews of selected activities, 20:9564 (R;US)
Management plan – Multi-Function Waste Tank Facility. Revision 1, 20:9561 (R;US)
Operational test procedure for Bldg 241-A-701 air compressor, 20:9612 (R;US)
Position paper – Continuous air monitor (CAM) acquisition recommendation (Multi-Function Waste Tank Facility), 20:9570 (R;US)
Position paper – Tank heat loading. Revision 1, 20:9568 (R;US)
Position paper – Tank temperature element location (Multi-Function Waste Tank Facility), 20:9569 (R;US)
Position paper – Tank ventilation system design air flow rates, 20:9566 (R;US)
Preliminary flowsheet: Ion exchange for separation of cesium from Hanford tank waste using resorcinol-formaldehyde resin, 20:9778 (R;US)
Project W-151 development work plan for: Tank AZ-101 riser mapping tool and data acquisition system, 20:9557 (R;US)
Project W-236A, work plan for preparation of a design requirements document, 20:9572 (R;US)
Recommendation on changing interfaces of W-058 and W-236A, 20:9563 (R;US)
Soil load above Hanford waste storage tanks (2 volumes), 20:9631 (R;US)

Waste Management
384 Power plant waste water sampling and analysis plan, 20:10950 (R;US)

Water Treatment Plants
Safety evaluation – Spent water treatment system components inventory release, 20:9773 (R;US)

HARD-SPHERE MODEL
Accelerated convergence and calculation of the radial distribution function of a hard sphere system, 20:11269 (IA;RU;In Russian)

HARMONIC OSCILLATOR MODELS
Octupole deformation and chaos, 20:11504 (IA;RU)

HARMONIC OSCILLATORS
Phase-space formalism: Generalized harmonic oscillator functions, 20:11914 (R;IT)

HARRY EVENT
See NUCLEAR EXPLOSIONS

HARTREE APPROXIMATION
See HARTREE-FOCK METHOD
HARTREE-FOCK METHOD
New algorithm for Hartree-Fock variational equation, 20:11479 (R;JP)
HASTELLOY N
Materials considerations for molten salt accelerator-based plutonium conversion systems, 20:10052 (R;US)
HAZARDOUS MATERIALS

High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 5, 20:9501 (R;US)
Level maintenance for Tank 101-SY mitigation-by-mixing test, 20:9654 (R;US)
Material selection for Multi-Function Waste Tank Facility tanks, 20:9508 (R;US)
SY101 in situ viscometer instrument system design description, 20:9622 (R;US)
Safety evaluation of interim stabilization of non-stabilized single-shell watch list tanks, 20:9629 (R;US)
T-Farm complex alarm upgrades, 20:9588 (R;US)
Tank 241-AX-102 tank characterization plan, 20:9641 (R;US)
Tank 241-BY-105 tank characterization plan, 20:9639 (R;US)
Tank 241-BY-106 tank characterization plan, 20:9638 (R;US)
Tank 241-C-111 headspace gas and vapor sample results - August 1993 samples, 20:9643 (R;US)
Tank 241-T-111 tank characterization plan, 20:9636 (R;US)
Yucca Mountain Site Characterization Project technical data catalog: Quarterly supplement, 20:9697 (R;US)

Viscosity
Engineering test plan for Tank 241-SY-101 in situ viscometer, 20:9640 (R;US)
SY101 in situ viscometer instrument system design description, 20:9622 (R;US)

Vitrification
Direct conversion of spent fuel to High-Level-Waste (HLW) glass, 20:9378 (R;US)
Hot-wall corrosion testing of simulated high level nuclear waste, 20:9666 (R;US)
Initial results from the canistered waste forms produced during the first campaign of the DWPF Startup Test Program, 20:9684 (R;US)
Modeling of batch operations in the Defense Waste Processing Facility at the Savannah River Site, 20:9675 (R;US)
Phase transformations in lithium bearing sodiumborosilicate base glass melts for the solidification of HAW, 20:10409 (R;DE;In German)
Property/composition relationships for Hanford high-level waste glasses melting at 1150°C volume 2: Chapters 12-16 and appendices A-K, 20:9454 (R;US)
Property/composition relationships for Hanford high-level waste glasses melting at 115°C volume 1: Chapters 1-11, 20:9453 (R;US)
Testing and development strategy for the tank waste remediation system, 20:9625 (R;US)
Tests of Cs-137 removal from DWPF samples prior to analysis, 20:9671 (R;US)

Waste Processing
Testing and development strategy for the tank waste remediation system, 20:9625 (R;US)

Waste Transportation
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 5, 20:9501 (R;US)
Interfaces between transport and geological disposal systems for high level radioactive waste and spent nuclear fuel, 20:9341 (R;XA)

HIGH-PURITY GE DETECTORS
Results on substituting the NaI by a Ge detector in a simple shadow shield whole body counter, 20:11177 (RA;US)

HIGH-TC SUPERCONDUCTORS
Aspects of macroscopic phase separation and interstitial oxygen ordering in oxygen doped $La_2CuO_{4+\delta}$, 20:10382 (R;US)
Doping dependence and orbital character of electronic states in HTSC's, 20:11744 (IA;RU)
Instability at high flux-flow velocities in a high-temperature superconductor, 20:11737 (IA;RU)

Bismuth Compounds
The effect of the ceramic core initial phase composition on the AG-sheated Bi-2223 tapes critical properties, 20:10362 (IA;RU)

Cathode Sputtering
Preparation and characterization of epitaxial high temperature superconductor layers, 20:11773 (R;DE;In German)

Ceramics
Features of Sc - doped 1-2-3 ceramics, 20:10376 (IA;RU)

Commercialization
Superconductivity for electric power systems: Program overview, 20:10106 (R;US)

Critical Temperature
On the anomalous concentrational dependencies of critical temperature and isotope effect parameter in the high-temperature superconductors, 20:10361 (IA;RU)

Crystal Growth
Novel method of the longlength current carrying HTSC structures formation, 20:10367 (IA;RU)

Cuprates
Inelastic neutron scattering and antiferromagnetic fluctuations HTSC, 20:11740 (IA;RU)
Intrinsic Josephson effects in layered superconductors, 20:11739 (IA;RU)
The effect of the ceramic core initial phase composition on the AG-sheated Bi-2223 tapes critical properties, 20:10362 (IA;RU)
The electron spin resonance study of effective pairing potential in superconducting lanthanum based cuprates, 20:11757 (IA;RU)

Eddy Current Testing
Temperature-dependent growth of $LaAlO_3$ films on $YBa_2Cu_3O_7$ C-axis films for multilayer structures, 20:10381 (R;US)

Electric Fields
Electric field effect in superconductors, 20:11746 (IA;RU)

Electronic Structure
Electronic phase separation and high temperature superconductors, 20:11732 (R;US)
Microscopic calculations of normal state properties of the high temperature superconductor $(La_{2-x}Sr_x)CuO_4$, 20:10379 (R;DE;In German)
Quasi-independent subsystems in HTSC: temperature redistribution of holes seen by optical absorption, 20:11745 (IA;RU)

Fabrication
Formation of thallium based high temperature superconductors using aerosol flow reacted precursor powders, 20:10354 (R;US)

Hall Effect
Critical fluctuation phenomena in the resistivity and the Hall effect of HTSC near T_c in strong magnetic fields, 20:11762 (IA;RU)

Hysteresis
Electromagnetic hysteretic response calculation for superconductors in demagnetizing geometries, 20:11733 (R;US)

Isotope Effects
Oxygen isotope effect in T_c of $La_{2-y}Sr_yCu_{1-x}Me_xO_4$ (y=0.15; 0.20; Me=Ni, Zn, Co, Fe), 20:10364 (IA;RU)

Josephson Effect
Intrinsic Josephson effects in layered superconductors, 20:11739 (IA;RU)

Lattice Vibrations
Lattice dynamics of HTSC, 20:11743 (IA;RU)

Magnetic Flux
Individual magnetic vortex ring excitation: universal features of exact solution, 20:11751 (IA;RU)

Magnetic Properties
Preparation and characterization of epitaxial high temperature superconductor layers, 20:11773 (R;DE;In German)

Magnetoresistance
On the linear negative magnetoresistance high-T_c superconducting crystals, 20:11761 (IA;RU)

Microstructure
Temperature-dependent growth of $LaAlO_3$ films on $YBa_2Cu_3O_7$ C-axis films for multilayer structures, 20:10381 (R;US)

Muon Spin Relaxation
Muon spin rotation spectroscopy of high temperature superconductors, 20:11742 (IA;RU)

Neutron Diffraction
Structural aspects of high-T_c superconductors from neutron diffraction studies, 20:11741 (IA;RU)
The neutron diffraction study of the Ca-doped 1-2-4-superconductor in wide temperature range, (20-300) K, 20:11753 (IA;RU)

Pairing Energy
The electron spin resonance study of effective pairing potential in superconducting lanthanum based cuprates, 20:11757 (IA;RU)

Penetration Depth
Muon spin rotation spectroscopy of high temperature superconductors, 20:11742 (IA;RU)

Physical Radiation Effects
Sintering of textured $YBa_2Cu_3O_{7-x}$ under intensive ^{60}Co gamma irradiation, 20:10351 (R;US)

Strong-Coupling Model
High-T_c superconductors viewed as strongly correlated electron systems, 20:11759 (IA;RU)

Structural Chemical Analysis
Sintering of textured $YBa_2Cu_3O_{7-x}$ under intensive ^{60}Co gamma irradiation, 20:10351 (R;US)

Superconducting Films
Preparation and characterization of epitaxial high temperature superconductor layers, 20:11773 (R;DE;In German)

Superconducting Wires
Novel method of the longlength current carrying HTSC structures formation, 20:10367 (IA;RU)

Superconductivity
6. Trilateral German-Russian-Ukrainian seminar on high-temperature superconductivity. General information. Program. Abstracts. List of participants, 20:11735 (I;RU)

Inelastic neutron scattering and antiferromagnetic fluctuations HTSC, 20:11740 (IA;RU)
Neutron polarization investigations of high temperature superconductors, 20:11754 (IA;RU)
The effect of the ceramic core initial phase composition on the AG-sheated Bi-2223 tapes critical properties, 20:10362 (IA;RU)
Surface Properties
Temperature-dependent growth of $LaAlO_3$ films on $YBa_2Cu_3O_7$ C-axis films for multilayer structures, 20:10381 (R;US)
Technology Impacts
Superconductivity for electric power systems: Program overview, 20:10106 (R;US)
Transition Temperature
Critical fluctuation phenomena in the resistivity and the Hall effect of HTSC near T_c in strong magnetic fields, 20:11762 (IA;RU)
Oxygen isotope effect in T_c of $La_{2-y}Sr_yCu_{1-x}Me_xO_4$ (y=0.15; 0.20; Me=Ni, Zn, Co, Fe), 20:10364 (IA;RU)
Quasi-independent subsystems in HTSC: temperature redistribution of holes seen by optical absorption, 20:11745 (IA;RU)
Tunnel Effect
Proximity effect in superconductor-antiferromagnetic structures, 20:11752 (IA;RU)
Yttrium Compounds
Features of Sc - doped 1-2-3 ceramics, 20:10376 (IA;RU)

HIGH-VOLTAGE PULSE GENERATORS
AFC generator development, 20:10582 (R;US)

HIGHLY ENRICHED URANIUM
Neutronic study on conversion of SAFARI-1 to LEU silicide fuel, 20:10048 (R;US)
The development of a passive fiber optic sensor system for remote monitoring in low energy gamma environments, 20:11168 (RA;US)

HITREX-2 REACTOR
See ZERO POWER REACTORS

HOFFMAN PROCESS
See COAL GASIFICATION

HOISTS
KE Basin monorail modification for the sludge removal and packaging project, 20:9351 (R;US)

HOLLY EVENT
See NUCLEAR EXPLOSIONS

HOLMIUM 151
Seniority-inverted yrast states in N=84 nuclei above gadolinium, 20:11451 (RA;FR)

HOLMIUM 152
High-spin yrast isomers in the odd-odd, N=85, ^{152}Ho nucleus, 20:11434 (RA;FR)

HONDURAS
Honduras geothermal development: Regulations and opportunities, 20:9880 (R;US)

HORDEUM

HYDRAULIC FRACTURES
Field fracturing multi-sites project. Annual technical progress report, July 28, 1993–July 31, 1994, 20:9308 (R;US)

HYDRAULIC RAMS
See PUMPS

HYDRAULICS
Transient analyses and thermal-hydraulic safety margins for the Greek Research Reactor (GRRI), 20:10049 (R;US)

HYDRIDES
In-bed accountability of tritium in production scale metal hydride storage beds, 20:9794 (R;US)
Neutronic methods for determination of very low concentrations of hydrogen in metals, 20:11708 (I;AR;In Spanish)

HYDROCARBONS
See also ALKANES
Systems and economic analysis of microalgae ponds for conversion of CO_2 to biomass. Fourth quarterly technical progress report, June 16, 1994–September 15, 1994, 20:9833 (R;US)
The Kwajalein bioremediation demonstration: Final technical report, 20:9304 (R;US)

HYDROCHLORIC ACID
Partitioning of solutes between liquid water and steam in the system {Na-NH_4-NH_3-H-Cl} to 350°C, 20:9927 (R;US)
Removal of plutonium and Americium from hydrochloric acid waste streams using extraction chromatography, 20:9433 (R;US)

HYDROCYCLONES
See CYCLONE SEPARATORS

HYDROELECTRIC POWER PLANTS
Burlington Bottoms Wildlife Mitigation Project. Final environmental assessment/management plan and finding of no significant impact, 20:9855 (R;US)
The environment and the hydroelectric in Amazonia, 20:9856 (I;BR;In Portuguese)

HYDROGEN
Atomistic calculations of hydrogen interactions with Ni_3Al grain boundaries and Ni/Ni_3Al interfaces, 20:10346 (R;US)
Composition for catalyzing hydrogen isotope exchange, 20:9807 (PA;US)

Deliberate ignition of hydrogen-air-steam mixtures under conditions of rapidly condensing steam, 20:10023 (R;US)
Dome load control and crane land path evaluation for Tank 241-SY-101 during hydrogen mitigation pump removal and installation, 20:9596 (R;US)
Effect of internal hydrogen on the mixed-mode I/III fracture toughness of a ferrific/martensitic stainless steel, 20:10336 (R;US)
Hydrogen recombiner catalyst test supporting data, 20:9656 (R;US)
Interaction of hydrogen and oxygen with bulk defects and surfaces of metals, 20:11726 (R;DK)
Lessons learned from a hydrogen explosion at a photovoltaic research facility, 20:9873 (R;US)
Quantum statistical approach to H(D)-Pd system: Evaluation of thermodynamical functions of state from experimental data, 20:11731 (R;IT)
Results of gas monitoring of double-shell flammable gas watch list tanks, 20:9634 (R;US)
Standard-B Hydrogen Monitoring System, system design description, 20:9624 (R;US)
Test report for run-in acceptance testing of hydrogen mitigation test pump-2, 20:9529 (R;US)
Trace elements and the mechanical properties of intermetallic compounds, 20:10306 (R;US)
Work plan for upgrade of SY-101 Hydrogen Mitigation Test Project Data Acquisition and Control Systemm (DACS-1), 20:9660 (R;US)

Market
Gas exchanges in the United States - a model for Europe?, 20:10186 (I;DE;In German)
Market study of pipe gas for the Bahia State, Brazil, 20:9315 (I;BR;In Portuguese)
Pipelines
Pipeline corridors through wetlands - summary of seventeen plant-community studies at ten wetland crossings. Topical report, February 1990–August 1994, 20:9319 (R;US)
Pipes
Market study of pipe gas for the Bahia State, Brazil, 20:9315 (I;BR;In Portuguese)
Planning
Ruhrgas forum. Edition 4. 1992. Reports from science and technology, 20:10187 (I;DE;In German)
Prices
Winter fuels report, 20:9300 (R;US)
Production
Winter fuels report, 20:9300 (R;US)
Supply and Demand
Natural gas annual 1993 supplement: Company profiles, 20:9311 (R;US)
Winter fuels report, 20:9299 (R;US)
Winter fuels report, 20:9312 (R;US)
Transport
Natural gas annual 1993 supplement: Company profiles, 20:9311 (R;US)
Underground Storage
Industrial automation systems control underground stores of natural gas. Remote control for three underground stores, 20:9320 (IA;DE;In German)
Wholesale Prices
Winter fuels report, 20:9312 (R;US)
Winter fuels report, 20:9299 (R;US)
NATURAL GAS APPLIANCES
See GAS APPLIANCES
NATURAL GAS DEPOSITS
An evaluation of accounting-based finding costs as efficiency measures for oil and gas exploration, 20:9273 (R;US)
NATURAL GAS DISTRIBUTION SYSTEMS
Description of a method for making a coupling between the models of OLGA and PHOENICS, 20:9323 (R;NO;In Norwegian)
NATURAL GAS GATHERING SYSTEMS
See NATURAL GAS DISTRIBUTION SYSTEMS
NATURAL GAS INDUSTRY
Development of a gas information system (GASIS). Quarterly report, September–November, 1994, 20:9314 (R;US)
Natural gas annual 1993 supplement: Company profiles, 20:9311 (R;US)
Supplement to the annual energy outlook 1995, 20:10115 (R;US)
NATURAL GAS WELLS
Field fracturing multi-sites project. Annual technical progress report, July 28, 1993–July 31, 1994, 20:9308 (R;US)
Prediction of the behaviour of a bubble column produced by a broken subsea gas pipeline, 20:9292 (R;NO)
NATURAL LIGHTING
See DAYLIGHTING
NATURAL RADIOACTIVITY
Cesium-137 and natural radionuclides in soils from southern Brazil and soils and others environmental samples from Antarctic, 20:10879 (R;BR;In Portuguese)
Problems of laboratory-scale gamma spectroscopy, 20:10701 (IA;DE;In German)
NATURAL URANIUM
Practical issues in discriminating between environmental and occupational sources in a uranium urinalysis bioassay program, 20:11218 (R;US)
NAVIER-STOKES EQUATION
See NAVIER-STOKES EQUATIONS
NAVIER-STOKES EQUATIONS
Numerical simulation of laminar flow in a curved duct, 20:10552 (R;US)
NCUSPR REACTOR
See PULSTAR-RALEIGH REACTOR
NEGATONS
See ELECTRONS
NEGATRONS
See ELECTRONS
NEODYMIUM 133
G-factor of the low-lying SD band in ^{133}Nd, 20:11422 (RA;FR)
NEODYMIUM 144
Quadrupole-octupole coupled states in ^{144}Nd and the influence of the $\nu(li_{13/2})$ orbital, 20:11468 (RA;FR)
NEODYMIUM 150
Excitation of the isovector GDR by inelastic α scattering and the neutron skin of nuclei, 20:11514 (IA;RU)
NEODYMIUM 150 TARGET
Excitation of the isovector GDR by inelastic α scattering and the neutron skin of nuclei, 20:11514 (IA;RU)

NEODYMIUM 152
Sdg boson model calculations of E2/M1 multipole mixing ratios in ^{152}Nd, 20:11583 (IA;RU)
NEODYMIUM COMPOUNDS
Lattice dynamics of HTSC, 20:11743 (IA;RU)
Neutron-structure investigation of lattice effects of the fluctuated valency in Re_2CuO_4(Re=Nd, Sm), 20:11717 (IA;RU)
NEODYMIUM LASERS
Trident as an ultrahigh irradiance laser, 20:10585 (R;US)
NEON 20 REACTIONS
Separation of actinide-made transurania by a gas-filled magnetic separator, 20:9804 (R;DE)
NEOPLASMS
See also CARCINOMAS
LEUKEMIA
LYMPHOMAS
Boron dose determination for BNCT using Fricke and EPR dosimetry, 20:11064 (R;US)
Cancer mortality experience in the workers of the French nuclear industry: Some questions of dose reconstruction from an epidemiological perspective, 20:11128 (RA;US)
Computer modeling the boron compound factor in brain tumors, 20:10980 (RA;US)
Dose optimization for boron neutron capture therapy of spontaneous canine brain tumors, 20:10981 (RA;US)
Improvements in patient treatment planning systems, 20:11074 (R;US)
Large animal studies of the use of BNCT for the treatment of brain tumors, 20:10978 (RA;US)
Liposomal delivery of boron to murine tumors for boron neutron capture therapy, 20:10975 (RA;US)
The role of chemistry in the development of boron neutron capture therapy of cancer, 20:10967 (RA;US)
The use of boron neutron capture for the treatment of pituitary tumors, 20:10982 (RA;US)
NETWORKS (COMPUTER)
See COMPUTER NETWORKS
NEURAL NETWORKS
First experiments of parallel application in ENEA (Italian National Agency for New Technologies, Energy and the Environment): Neural networks, 20:11915 (R;IT;In Italian)
Gamma spectral analysis via neural networks, 20:10756 (R;US)
NEUROLOGY
25th annual meeting of the German Society of Neuroradiology. Abstracts, 20:11102 (I;DE;In German)
NEUTRAL PARTICLES
Creating and using a type of free-form geometry in Monte Carlo particle transport, 20:11679 (RA;US)
Low energy neutral atom imaging: Remote observations of the magnetosphere, 20:11276 (R;US)
NEUTRAL-PARTICLE TRANSPORT
See also NEUTRON TRANSPORT
PHOTON TRANSPORT
3-D research transport codes at Los Alamos, 20:10008 (R;US)
THREEDANT: A code to perform three-dimensional, neutral particle transport calculations, 20:10005 (R;US)
NEUTRALIZATION (CHEMICAL)
See PH VALUE
NEUTRETTOS
See MUON NEUTRINOS
NEUTRINO BEAMS
On possibility to study neutrino oscillations by detectors located at Gran Sasso (Italy) using beams from 600 GeV UNK-1 machine, 20:11375 (R;RU)
NEUTRINO DETECTION
Gamow-Teller strength in the beta-decay of ^{37}Ca and its implications for the detection of the solar neutrino flux, 20:11535 (R;DE)
On the efficiency of the solar neutrino detection by the ^{98}Mo nuclei, 20:11383 (IA;RU)
NEUTRINO OSCILLATION
Neutrino oscillation at reactors, 20:11401 (R;FR)
On possibility to study neutrino oscillations by detectors located at Gran Sasso (Italy) using beams from 600 GeV UNK-1 machine, 20:11375 (R;RU)
Study of different type neutrino oscillations based on neutrino beams from 600 GeV, 20:11369 (R;RU;In Russian)
NEUTRINO REACTIONS
Gamow-Teller strength in the beta-decay of ^{37}Ca and its implications for the detection of the solar neutrino flux, 20:11535 (R;DE)
NEUTRINO-NUCLEON INTERACTIONS
Neutral current neutrino-nucleon scattering, 20:11402 (R;US)
The Q^2-Dependence of the Gross-Llewellyn Smith Sum Rule and of the Parton Distributions, 20:11329 (R;XJ)
NEUTRON ACTIVATION ANALYSIS
Alpha-beam nuclear analysis of thin films by Rutherford backscattering method, 20:10399 (IA;TH;In Thai)
NEUTRON BEAMS
Nuclear characterization of the HFR Petten BNCT facility, 20:10969 (RA;US)
NEUTRON CAPTURE
See NEUTRON REACTIONS
NEUTRON CAPTURE THERAPY
Analytical dosimetry and treatment planning for BNCT, 20:10970 (RA;US)
Dose optimization for boron neutron capture therapy of spontaneous canine brain tumors, 20:10981 (RA;US)
Improvements in patient treatment planning systems, 20:11074 (R;US)
NEUTRON DETECTORS
See also FISSION FOIL DETECTORS
Monte Carlo calculations of the effective area and directional response of a polyethylene-moderated neutron counter, 20:10747 (R;US)
Neutron calibration facilities, 20:11192 (RA;US)
NEUTRON DIFFRACTION
Effects of inelastic scattering in the measurement and analysis of SANS data, 20:11716 (IA;RU)
High resolution powder diffraction comparison between neutrons and synchrotron radiation, 20:10737 (IA;RU)
NEUTRON DIFFRACTOMETERS
Comparison of SANS instruments at reactor and pulsed sources, 20:10741 (IA;RU)
Development of small-angle diffractometer LQD at the ISIS pulsed neutron source, 20:10739 (IA;RU)
Diffraction studies on the Fourier diffractometer at GKSS, 20:10736 (IA;RU)
Present status of the diffractometer M.SFINSK, 20:10734 (IA;RU)
Presentation of new SANS instrument at the BER-2 reactor in Berlin, Germany, 20:10740 (IA;RU)
Solutions for implementing time-of-flight techniques in low-angle neutron scattering, as realized on the low-Q diffractometer at Los Alamos, 20:10738 (IA;RU)
The new Fourier diffratometer at the IBR-2 reactor: design and first results, 20:10733 (IA;RU)
NEUTRON DOSIMETRY
Design, modeling, and improvements to the Los Alamos National Laboratory TLD based neutron dosimeter, 20:11141 (RA;US)
Development of a National personnel neutron dosimetry program in the Islamic Republic of Iran, 20:10720 (IA;RU)
Dosimetry cross-section evaluation by cubic-B spline fitting, 20:11637 (RA;JP)
Establishing a ^{252}Cf source for neutron irradiations of dosimetry at the Idaho National Engineering Laboratory, 20:10750 (RA;US)
Evaluation of neutron dosimetry cross sections of ^{59}Co and ^{197}Au up to 50 MeV, 20:11636 (RA;JP)
Ionizing radiation dosimetry based on optical parameters width measurements of oxides, 20:11204 (RA;US)
NEUTRON ECONOMY
See NEUTRON FLUX
NEUTRON FLUX
An approximate algorithm for the flux from a rectangular volume source, 20:11699 (R;US)
NEUTRON FLUX DENSITY
See NEUTRON FLUX

NEUTRON GENERATORS
14 MeV Frascati Neutron Generator, 20:10636 (RA;IT)
NEUTRON MATTER
See NUCLEAR MATTER
NEUTRON MONITORS
A new neutron dose equivalent rate meter with improved neutron energy response in terms of H*(10), 20:11163 (RA;US)
Independent nuclear safety assessment of the non-nuclear verification instrument NNV-470AS, 20:10785 (R;US)
Test procedure for boxed waste assay system, 20:9549 (R;US)
NEUTRON MULTIPLIER FACILITY
See SUBCRITICAL ASSEMBLIES
NEUTRON REACTIONS
Lifetimes from (n,n'γ) reaction, 20:11545 (RA;FR)
Measurement of formation cross sections producing short-lived nuclei. Mg, S, Ga, Y, Mo, Pd, Sn, 20:11632 (RA;JP)
Nuclear physics at Budapest Neutron Centre, 20:11685 (RA;FR)
Physics of the CEM92M Code, 20:11932 (R;XJ)
Study of parity and time reversal violation in neutron-nucleus interactions, 20:11314 (R;US)
Systematics of the Fast Neutron Induced (n, α) Reaction Cross Sections, 20:11647 (R;XJ)
NEUTRON SOURCES
See also NEUTRON GENERATORS
A neutron energy converter for a small laboratory neutron generator, 20:9811 (IA;TH;In Thai)
An aerial radiological survey of the neutron products company and surrounding area, 20:10866 (R;US)
Establishing a ^{252}Cf source for neutron irradiations of dosimetry at the Idaho National Engineering Laboratory, 20:10750 (RA;US)
Fast dynamic neutron sources based on the (γ,n) reactions, 20:9802 (RA;IL)
Neutron scattering cross sections from 12C at 14 MeV using associated alpha particle time of flight technique, 20:9810 (IA;TH;In Thai)
NEUTRON TRANSPORT
A new algorithm for generating highly accurate benchmark solutions to transport test problems, 20:11677 (R;US)
Creating and using a type of free-form geometry in Monte Carlo particle transport, 20:11679 (RA;US)
Fast algorithms for transport models. Final report, June 1, 1993–May 31, 1994, 20:11678 (R;US)
Mathematical models for volume rendering and neutron transport, 20:11698 (R;US)
Three-dimensional SN calculations with Oak Ridge TORT code, 20:11676 (R;US)
NEUTRON TRANSPORT THEORY
See also MULTIGROUP THEORY
Asymptotic analysis of the several competitive equations to solve the time-dependent neutron transport equation, 20:10004 (R;US)
NEUTRON-RICH ISOTOPES
Elastic proton scattering on neutron rich He isotopes in Glauber approach, 20:11618 (RA;FR)
NEUTRONS
See also EPITHERMAL NEUTRONS
FAST NEUTRONS
THERMAL NEUTRONS
Measurements of the neutron scattering cross sections for ^{12}C, ^{16}O, ^{40}Ca and ^{56}Fe at 14.2 MeV, 20:11631 (RA;JP)
Neutron field characterization for a calibration laboratory, 20:11191 (RA;US)
The production of high energy neutrons by secondary reactions, 20:11606 (R;US)
NEVADA
Groundwater flow near the Shoal Site, Sand Springs Range, Nevada: Impact of density-driven flow, 20:10864 (R;US)
NEVADA TEST SITE
Passive field monitoring of plutonium and americium in soil, 20:10857 (R;US)
Resource Conservation and Recovery Act Industrial Sites quality assurance project plan: Nevada Test Site, Nevada, 20:10862 (R;US)
Review of present groundwater monitoring programs at the Nevada Test Site, 20:10863 (R;US)
NEW ENGLAND
See USA
NEW ZEALAND
Communication dated 5 July 1994 received from the permanent mission of New Zealand to the International Atomic Energy Agency, 20:11971 (R;XA;In Arabic, Chinese, English, French)
NEWTON MECHANICS
See CLASSICAL MECHANICS
NEWTON METHOD
Newton iterative methods for large scale nonlinear systems. Final report, August 1992–July 1994, 20:11908 (R;US)
NICKEL
Aniline hydrogenolysis on the Pt(111) single crystal surface: Mechanisms for C-N bond activation, 20:9290 (R;US)
Atomistic calculations of hydrogen interactions with Ni_3Al grain boundaries and Ni/Ni_3Al interfaces, 20:10346 (R;US)
Interaction of hydrogen and oxygen with bulk defects and surfaces of metals, 20:11726 (R;DK)
Radiation-induced segregation: A microchemical gauge to quantify fundamental defect parameters, 20:10339 (R;US)
Resonant coherent excitation of N^{6+} and Mg^{11+} in planar channeling: Anisotropies in ionization probabilities and x-ray emission, 20:10307 (R;US)
The role of hydrogen in the hydrogenation and hydrogenolysis of aniline on the nickel single crystal surfaces: Its implication on the mechanisms of HDN reactions, 20:10471 (R;US)
[Hydrogen induced C-C, C-N, and C-S bond activities on Pi and Ni surfaces]: Summary, 20:10478 (R;US)
NICKEL 58 TARGET
Investigation of the giant dipole resonance decay in (γ, n) reaction for fp-shell nuclei, 20:11657 (IA;RU)
NICKEL 59
PXAMS – Projectile X ray AMS: X ray yields and applications, 20:10465 (R;US)
NICKEL 62 REACTIONS
Production and decay of ^{269}110, 20:11537 (R;DE)
NICKEL 64 REACTIONS
The new element 111, 20:11540 (R;DE)
NICKEL ALLOYS
See also CHROMIUM-NICKEL STEELS
NICKEL BASE ALLOYS
Atomistic studies in grain boundaries in NiAl, 20:10332 (R;US)
NICKEL BASE ALLOYS
See also INCONEL ALLOYS
Atomistic calculations of hydrogen interactions with Ni_3Al grain boundaries and Ni/Ni_3Al interfaces, 20:10346 (R;US)
Crack growth in the pm nickel-base superalloy N18 in the temperature range between 400 and 750 C under static and cyclic loading, 20:10329 (R;DE;In German)
Hot-wall corrosion testing of simulated high level nuclear waste, 20:9666 (R;US)
Surface energy driven crystallization of amorphous $Ni_{69}Cr_{14}P_{17}$ alloy, 20:10304 (R;US)
Trace elements and the mechanical properties of intermetallic compounds, 20:10306 (R;US)
NICKEL COMPOUNDS
See also NICKEL OXIDES
A new technique for measuring the separation of closely spaced dislocations using residual contrast conditions, 20:10462 (R;US)
Experimental determination of cluster geometrical structure, 20:10468 (R;US)
Oxidation of ion-implanted NiAl, 20:10308 (R;US)
Particle-like absorption spectra in small transition metal clusters, 20:10469 (R;US)
Synthesis, tissue uptake, and toxicity of a nickel tetracarboranylphenylporphyrin, 20:10965 (R;US)
NICKEL IONS
Low-energy electrons and their dynamical correlation with the recoil-ions for single ionization of helium by fast, heavy-ion impact, 20:11703 (R;DE)

NICKEL OXIDES
Atomistic study of energy and structure of surfaces in NiO, 20:10380 (R;US)
NIOBATES
High resolution time-of-flight powder diffraction: inside Pandora's box, 20:11712 (IA;RU)
NIOBIUM 89
Nanosecond isomers in ^{89}Nb, ^{89}Mo and ^{91}Tc, 20:11449 (RA;FR)
NIOBIUM ALLOYS
First-principles study of intermetallic phase stability in the ternary Ti-Al-Nb alloy system, 20:10331 (R;US)
Issues related to prediction of residual stresses in titanium alloy matrix composites, 20:10412 (R;US)
NIOBIUM COMPOUNDS
See also NIOBATES
Particle-like absorption spectra in small transition metal clusters, 20:10469 (R;US)
NITRATES
See also THORIUM NITRATES
URANYL NITRATES
Aqueous nitrate waste treatment: Technology comparison, cost/benefit, and market analysis, 20:9387 (R;US)
Freeze - drying method of 2223 bismuth ceramics preparation, 20:10370 (IA;RU)
NITRIC ACID
Chemical and physical properties vs degree of concentration of uranyl nitrate-nitric acid process streams of metal conversion plant, 20:9327 (R;US)
Measurement of high acidity using a renewable-reagent fiber optic sensor, 20:10459 (R;US)
NITRIC OXIDE
Simultaneous SO_2/NO separation from flue gas using HFCLM. Final report, 20:9224 (R;US)
NITRIDES
See also ALUMINIUM NITRIDES
GALLIUM NITRIDES
INDIUM NITRIDES
SILICON NITRIDES
Material analysis using combined elastic recoil detection and Rutherford/enhanced Rutherford backscattering spectrometry, 20:11721 (R;US)
NITROGEN
Environmental consequences of nitrogen oxide-, ammonia-, and nitrous oxide emission, 20:10840 (R;SE;In Swedish)
Rapid pressure swing absorption cleanup of post-shift reactor synthesis gas. Technical progress report, September 1990–August 1993, 20:9209 (R;US)
NITROGEN 14 TARGET
Towards a unified description of light ion fusion cross section excitation functions, 20:11671 (R;DE)
NITROGEN CYCLE
U.S Department of Energy contract DE-FG02-90ER61053: Simulations of the carbon cycle (Part II), 20:10931 (R;GB)
NITROGEN DIOXIDE
Automated remote monitoring of toxic gases with diode-laser-based sensor systems, 20:10804 (R;US)
Control of coal combustion SO_2 and NO_x emissions by in-boiler injection of CMA. Seventh quarterly project status report, April 1, 1994–June 30, 1994, 20:9226 (R;US)
NITROGEN NITRIDES
See NITROGEN
NITROGEN OXIDES
See also NITRIC OXIDE
NITROGEN DIOXIDE
Application of modern diagnostic methods to environmental improvement. Annual progress report, January–October 1994, 20:10808 (R;US)
Developmental issues in environmental reporting protocols, 20:9748 (R;US)
Micronized coal-fired retrofit system for SO_x reduction: Krakow Clean Fossil Fuels and Energy Efficiency Program. Technical progress report No. 1, [April–June 1994], 20:9943 (R;US)
New ideas for atmospheric burners. 'THERMOMAX linear' reduces NO_x emissions to less than 60 mg/kWh, 20:10563 (IA;DE;In German)
NMR IMAGING
Parallel algorithms and tools for matching functional and anatomical data on the basis of PET and MRT volume data, 20:10991 (R;DE;In German)
NMR SPECTROMETERS
Nuclear magnetic resonance tomography with a toroid cavity detector, 20:10771 (R;US)
Two dimensional NMR and NMR relaxation studies of coal structure. Progress report, June 30, 1994–September 30, 1994, 20:9217 (R;US)

Practical issues in discriminating between environmental and occupational sources in a uranium urinalysis bioassay program, 20:11218 (R;US)

Personnel Dosimetry
Improved beta sensitivity under field conditions for the panasonic UD-807 extremity dosimeter, 20:11209 (RA;US)

Planning
305 Building cold test facility management plan, 20:9536 (R;US)
Release of HWVP design media, 20:9530 (R;US)

Program Management
EM Health and Safety Plan Guidelines, 20:11070 (R;US)

Radiation Monitoring
An aerial radiological survey of the neutron products company and surrounding area, 20:10866 (R;US)

Radiation Protection
A few experiences and lessons learned in installing radiological access control systems, 20:11138 (RA;US)
Assessment of radiation doses at the Instituto de Pesquisas Energeticas e Nucleares, 20:11126 (RA;US)
Economic justification of robotic systems using graphical simulation as a tool, 20:9475 (R;US)
Improved beta sensitivity under field conditions for the panasonic UD-807 extremity dosimeter, 20:11209 (RA;US)

Radioactive Effluents
Progress report on the "Regulatory Guide on emission and immission monitoring of nuclear facilities", 20:10820 (IA;DE;In German)

Radionuclide Migration
Modular risk analysis for assessing multiple waste sites, 20:9746 (R;US)

Regulations
Facility effluent monitoring plan for the plutonium uranium extraction facility, 20:9496 (R;US)

Reliability
Safety and reliability analysis of a technical system applying the multistate coherent system analysis for evaluating a finite number of normal operating modes and failure modes. Final report, 20:10088 (R;DE;In German)

Remedial Action
A review of occupational safety and health issues relevant to the Environmental Restoration Program: Selected case histories and associated issues, 20:9461 (R;US)

Risk Assessment
Modular risk analysis for assessing multiple waste sites, 20:9746 (R;US)

Safeguard Regulations
Westinghouse Hanford Company FY 1995 Materials Management Plan (MMP), 20:9663 (R;US)

Safety
Activity report 1992, 20:11884 (R;FR;In French)
Activity report 1993, 20:11885 (R;FR;In French)
Annual report 1991-92, 20:9991 (I;IN)
Annual report 1992-93, 20:11891 (I;IN)
Chemical Safety Vulnerability Working Group report. Volume 1, 20:10130 (R;US)
Chemical Safety Vulnerability Working Group report. Volume 2, 20:10131 (R;US)

Chemical Safety Vulnerability Working Group report. Volume 3, 20:10132 (R;US)
Grading standards, prepared by the Configuration Management Office, 20:9738 (R;US)
Management response plan for the Chemical Safety Vulnerability Working Group report. Volume 1, 20:10133 (R;US)

Specifications
305 Building cold test facility management plan, 20:9536 (R;US)

Tritium
Description of NORMTRI: a computer program for assessing the off-site consequences from air-borne releases of tritium during normal operation of nuclear facilities, 20:10884 (R;DE)

NUCLEAR FRAGMENTATION
Systematics of the fragmentation cross section for incident proton energies up to 3 GeV, 20:11639 (RA;JP)

NUCLEAR FRAGMENTS
See also HYPERNUCLEI
New method for the fragment mass measurements on the storage ring, 20:11602 (IA;RU)

NUCLEAR FUEL CONVERSION
Neutronic study on conversion of SAFARI-1 to LEU silicide fuel, 20:10048 (R;US)

NUCLEAR FUEL ELEMENTS
See FUEL ELEMENTS

NUCLEAR FUELS
See also SPENT FUELS
Methodology and application of the WIMS-D4M fission product data, 20:9997 (R;US)
Monthly progress report heat source technology programs, July 1994, 20:9328 (R;US)
Plutonium finishing plant safeguards and security systems replacement study, 20:9791 (R;US)
The ORNL Chemical Technology Division, 1950-1994, 20:9333 (R;US)

NUCLEAR INDUSTRY
Cancer mortality experience in the workers of the French nuclear industry: Some questions of dose reconstruction from an epidemiological perspective, 20:11128 (RA;US)
Greater-than-Class C low-level radioactive waste characterization: Estimated volumes, radionuclide activities, and other characteristics. Revision 1, 20:9382 (R;US)
Institutional plan – Institute of Nuclear Power Operations, 1993, 20:9992 (R;US)

NUCLEAR MAGNETIC MOMENTS
Nuclear shapes and shape changes. Magnetic dipole sum rules as a new signature, 20:11424 (RA;FR)
On the existence of intrinsic reflection asymmetry in $Z \approx 62$, $N \approx 90$ region, 20:11415 (RA;FR)

NUCLEAR MATERIALS MANAGEMENT
Communications received from Member States regarding guidelines for the export of nuclear material, equipment and technology, 20:11965 (R;XA;In Arabic, Chinese, English, French)
Communications received from Member States regarding the export of nuclear material and of certain categories of equipment and other material, 20:11964 (R;XA;In Arabic, English, French, Russian)

NUCLEAR MATTER
Hydrodynamic evolution of chirally symmetric nuclear matter, 20:11413 (R;DE)
Investigation of the interactions and self-interactions of mesonic fields in the relativistic Hartree-Fock approxition for nuclear structure, 20:11502 (IA;RU)
Isoscalar giant monopole resonance and nuclear matter incompressibility, 20:11527 (IA;RU)
Response function of hot nuclear matter, 20:11480 (R;FR)
Theoretical studies in hadronic and nuclear physics. Progress report, December 1, 1993–June 30, 1994, 20:11408 (R;US)
Vortex waves in nuclear systems, 20:11509 (IA;RU)

NUCLEAR MEDICINE
Occupational health experience in the production and distribution of radionuclides used in medicine, 20:11196 (RA;US)
Proceedings of the second nuclear science and technology conference no. 2, 20:10163 (I;TH;In English, Thai)
Protection of the patient in diagnostic and therapeutic radiology the approach of national and international organizations and consequences for Israel, 20:10988 (RA;IL)
The importance of radioprotection controls in nuclear medicine, 20:11194 (RA;US)
Transactions of the nuclear societies of Israel joint meeting 1994, 20:10873 (R;IL)
Verification of radionuclide calibrators used in nuclear medicine laboratories in the Czech and Slovak republics, 20:11197 (RA;US)

NUCLEAR MODELS
See also COLLECTIVE MODEL
CRANKING MODEL
QUASIPARTICLE-PHONON MODEL
SCISSION-POINT MODEL
SHELL MODELS
SPHERICAL MODEL
Symmetry-breaking in simple one and two level models, 20:11416 (RA;FR)

NUCLEAR MOLECULES
Increasing coupling between the modes of motion in asymmetric dinuclear system, 20:11648 (IA;RU)

NUCLEAR PHYSICS
Andrzej Soltan 1897-1959. Bio-bibliographic monograph, 20:11902 (R;PL;In Polish)
Annual report from realization of Central Program of Basic Studies no. 01.09 "Studies of elementary particles and nuclear processes" for the year 1990, 20:11895 (R;PL;In Polish)
Department of Theoretical Physics. Annual report 1991, 20:11405 (R;PL;In Polish, English)
Report from realization of Central Program of Basic Studies no 01.09 "Studies of elementary particles and nuclear processes" for the year 1986-1990, 20:11896 (R;PL;In Polish)

NUCLEAR POWER
Advanced design nuclear power plants: Competitive, economical electricity. An analysis of the cost of electricity from coal, gas and nuclear power plants, 20:9996 (R;US)

NUCLEAR POWER PLANTS

Centrifugal Pumps
Detection of pump degradation, 20:10081 (R;US)

Comparative Evaluations
Advanced design nuclear power plants: Competitive, economical electricity. An analysis of the cost of electricity from coal, gas and nuclear power plants, 20:9996 (R;US)

Compiled Data
Licensed operating reactors: Status summary report data as of December 31, 1991. Volume 16, 20:9947 (R;US)

Computerized Control Systems
Trends in the applications of artificial neural networks in the nuclear industry, 20:10033 (RA;IL)

Computerized Simulation
Nuclear plant analyzer - programmer's manual, 20:10036 (R;US)
Nuclear plant analyzer: Analyzer reference manual, 20:10011 (R;US)
Nuclear plant analyzer: Computer visual system reference manual, 20:10012 (R;US)

Containment Systems
Experimental results from containment piping bellows subjected to severe accident conditions. Volume 1, Results from bellows tested in 'like-new' conditions, 20:10019 (R;US)

Cost Benefit Analysis
Advanced design nuclear power plants: Competitive, economical electricity. An analysis of the cost of electricity from coal, gas and nuclear power plants, 20:9996 (R;US)

Data Acquisition
Nuclear plant analyzer - programmer's manual, 20:10036 (R;US)
Nuclear plant analyzer: Analyzer reference manual, 20:10011 (R;US)
Nuclear plant analyzer: Computer visual system reference manual, 20:10012 (R;US)

Design
The dependence of human reliability upon task information content, 20:10083 (R;US)

Diesel Engines
Emergency diesel generator: Maintenance and failure unavailability, and their risk impacts, 20:10096 (R;US)
Electric Generators
Emergency diesel generator: Maintenance and failure unavailability, and their risk impacts, 20:10096 (R;US)
Electrical Equipment
Hermetic inputs of power and control cables for atom energetics, 20:10335 (RA;US)
Emergency Plans
The role of the LLNL Atmospheric Release Advisory Capability in a FRMAC response to a nuclear power plant incident, 20:10046 (R;US)
Engineered Safety Systems
Analysis of failure dependent test, repair and shutdown strategies for redundant trains, 20:10079 (R;US)
Structural aging program status report, 20:10080 (R;US)
Failures
Survey of reportable events in nuclear power plant in the Federal Republic of Germany. Period covered: 3rd quarter 1993, 20:10087 (I;DE;In German)
Survey of reportable events in nuclear power plants in the Federal Republic of Germany. Period covered: 3rd quarter 1994, 20:10089 (I;DE;In German)
Hazards
Complex analysis of hazards to the man and natural environment due to electricity production in nuclear and coal power plants, 20:10039 (R;PL;In Polish)
Human Factors Engineering
Improving human reliability through better nuclear power plant system design. Progress report, 20:10082 (R;US)
The dependence of human reliability upon task information content, 20:10083 (R;US)
Iaea Safeguards
Nuclear nonproliferation and safety: Challenges facing the International Atomic Energy Agency, 20:10298 (R;US)
Information Dissemination
Title list of documents made publicly available, December 1-31, 1994, 20:10180 (R;US)
Inspection
Nuclear nonproliferation and safety: Challenges facing the International Atomic Energy Agency, 20:10298 (R;US)
Personnel Dosimetry
The implementation of new radiation quantities in nuclear power plants in Taiwan, 20:11133 (RA;US)
Pipes
Effect of dynamic strain aging on the strength and toughness of nuclear ferritic piping at LWR temperatures, 20:9952 (R;US)
Pressure Vessels
Constraint effects on fracture initiation loads in HSST wide-plate tests, 20:10020 (R;US)
Proceedings of the DOE/SNL/EPRI sponsored Reactor Pressure Vessel Thermal Annealing Workshop. Volume 2, 20:10022 (R;US)
Reactor pressure vessel status report, 20:9995 (R;US)
Pumps
Proceedings of the Third NRC/ASME Symposium on Valve and Pump Testing. Volume 2, Session 3A–Session 4B, 20:10018 (R;US)
Radiation Monitoring
The implementation of new radiation quantities in nuclear power plants in Taiwan, 20:11133 (RA;US)
Radioactive Waste Disposal
General approach and preliminary results on gamma - field reconstruction for the Techa River, 20:11129 (RA;US)
Reactor Accidents
A review of the Melcor Accident Consequence Code System (MACCS): Capabilities and applications, 20:10102 (R;US)
Reactor Monitoring Systems
Field experience with remote monitoring, 20:11135 (RA;US)
Reactor Operation
Licensed operating reactors: Status summary report data as of December 31, 1991. Volume 16, 20:9947 (R;US)
Reactor Safety
Design factors for safety-critical software, 20:10101 (R;US)
Detection of pump degradation, 20:10081 (R;US)
Reactor Vessels
Proceedings of the DOE/SNL/EPRI sponsored Reactor Pressure Vessel Thermal Annealing Workshop. Volume 1, 20:10021 (R;US)
Reliability
Improving human reliability through better nuclear power plant system design. Progress report, 20:10082 (R;US)
Institutional plan – Institute of Nuclear Power Operations, 1993, 20:9992 (R;US)
Remote Multiplexing Systems
Field experience with remote monitoring, 20:11135 (RA;US)
Risk Assessment
Handbook of methods for risk-based analyses of technical specifications, 20:10099 (R;US)
Safety
Institutional plan – Institute of Nuclear Power Operations, 1993, 20:9992 (R;US)
Safety Analysis
Nuclear nonproliferation and safety: Challenges facing the International Atomic Energy Agency, 20:10298 (R;US)
The next generation of power reactors - safety characteristics, 20:9948 (R;US)
Security
Workshop on Developing Safe Software, 20:10094 (R;US)
Specifications
Handbook of methods for risk-based analyses of technical specifications, 20:10099 (R;US)
Transients
Classification of nuclear power plants transients using the probabilistic neural networks which 'knows' when it does not know, 20:10034 (RA;IL)
Valves
Proceedings of the Third NRC/ASME Symposium on Valve and Pump Testing. Volume 2, Session 3A–Session 4B, 20:10018 (R;US)
Water Pollution
General approach and preliminary results on gamma - field reconstruction for the Techa River, 20:11129 (RA;US)

NUCLEAR POWER STATIONS

ZINC OXIDES
ZIRCONIUM OXIDES
Ionizing radiation dosimetry based on optical parameters width measurements of oxides, 20:11204 (RA;US)
Material analysis using combined elastic recoil detection and Rutherford/enhanced Rutherford backscattering spectrometry, 20:11721 (R;US)
OXYGEN
Changes in depth profiles of oxygen and copper in Y-Ba-Cu-O film under annealing, 20:10375 (IA;RU)
Diode laser-based sensor system for long-path absorption measurements of atmospheric concentration and near-IR molecular spectral parameters, 20:10803 (R;US)
Interaction of hydrogen and oxygen with bulk defects and surfaces of metals, 20:11726 (R;DK)
Ion beam mixing of titanium overlayers with hydroxyapaptite substrates, 20:10411 (R;US)
Sintering of textured $YBa_2Cu_3O_{7-x}$ under intensive ^{60}Co gamma irradiation, 20:10351 (R;US)
OXYGEN 16
A calculation of the giant monopole resonance energy in ^{16}O, 20:11534 (R;SE)
OXYGEN 16 REACTIONS
A consistent parametrisation for the production rates of negatively charged hadrons and neutral strange particles in nucleon-nucleon, nucleon-nucleus and nucleus-nucleus collisions, 20:11389 (R;DE)
Separation of actinide-made transurania by a gas-filled magnetic separator, 20:9804 (R;DE)
Towards a unified description of light ion fusion cross section excitation functions, 20:11671 (R;DE)
OXYGEN 16 TARGET
Towards a unified description of light ion fusion cross section excitation functions, 20:11671 (R;DE)
OXYGEN EFFECT (RADIOBIOLOGY)
See OXYGEN
OXYGEN HYDRIDES
See WATER
OXYGENASES
Conversion of methane to higher hydrocarbons (Biomimetic catalysis of the conversion of methane to methanol). Final report, 20:9310 (R;US)
OXYMETHYLENE
See FORMALDEHYDE
OZONE
Remote measurement of the large-area distribution of stratospheric trace gases, 20:10854 (IA;DE;In German)
OZONE LAYER
The behaviour of stratospheric and upper tropospheric ozone in high latitudes, 20:10845 (RA;FI)

P

P CODES
Certification of version 1.2 of the PORFLO-3 code for the WHC scientific and engineering computational center, 20:10918 (R;US)
PC-MARKAL (MUSS). Energy Systems Optimization Model and User's Support System, 20:11920 (CM;US)
P INVARIANCE
Study of parity and time reversal violation in neutron-nucleus interactions, 20:11314 (R;US)
PACIFIC NORTHWEST LABORATORIES
See BATTELLE PACIFIC NORTHWEST LABORATORIES
PACIFIC NORTHWEST REGION
See USA
PACKAGING
Safety Evaluation for Packaging 101-SY Hydrogen Mitigation Mixer Pump package, 20:10535 (R;US)
Safety Evaluation for Packaging for the N Reactor/single pass reactor fuel characterization shipments, 20:9362 (R;US)
PADUCAH PLANT
Paducah Gaseous Diffusion Plant Annual Site Environmental Report for 1993, 20:9702 (R;US)
Paducah Gaseous Diffusion Plant Annual Site Environmental Report summary for 1993, 20:9703 (R;US)
PAINTS
Assay of weathering effects on protective polymer coatings using positron annihilation spectroscopy, 20:10394 (R;US)
PAIRING ENERGY
Constants of usual pairing force for nuclei far removed from valley of beta-stability, 20:11453 (RA;FR)
PAIRING INTERACTIONS
Residual interactions and blocked pairing in normal high-K states and in t-bands, 20:11442 (RA;FR)
PALLADIUM
Deuterium charging in palladium by electrolysis of heavy water: Measurement of lattice parameter, 20:11789 (R;IT)
Magnetic and structural properties of Fe/Pd multilayers studied by magnetic x-ray dichroism and x-ray absorption spectroscopy, 20:10305 (R;US)
PALLADIUM 100
Gamow-Teller strength distribution in the beta-decay of ^{100}Ag from total-absorption gamma spectrometry, 20:11411 (R;DE)
PALLADIUM 107
Measurement of beta-decay half-lives of short-lived nuclei, 20:11571 (RA;JP)
PXAMS – Projectile X ray AMS: X ray yields and applications, 20:10465 (R;US)
PALLADIUM COMPOUNDS
Growth and sedimentation of fine particles produced in aqueous solutions of palladium sulfate and palladium sulfate-silver sulfate induced by gamma-ray irradiation, 20:10494 (R;JP)
Quantum statistical approach to H(D)-Pd system: Evaluation of thermodynamical functions of state from experimental data, 20:11731 (R;IT)
PALLADIUM ISOTOPES
See also PALLADIUM 100
PALLADIUM 107

Beta decay of medium-heavy neutron-rich nuclei, 20:11444 (RA;FR)

PALLADIUM NITRATES
See NITRATES
PALLADIUM COMPOUNDS

PANELS
Structural foam-core panels in Northwest HUD-code manufactured housing: A preliminary assessment of opportunities and obstacles, 20:10213 (R;US)

PANINDCO PROCESS
See COAL GASIFICATION

PANTEX PLANT
A TLD dose algorithm for mixed fields at a nuclear weapons facility, 20:11212 (RA;US)

PARAFFINS
See ALKANES

PARALLEL PROCESSING
Direct ultrashort-pulse retrieval using frequency-resolved optical gating and a computational neural network, 20:10770 (R;US)
Fast algorithms for transport models. Final report, June 1, 1993–May 31, 1994, 20:11678 (R;US)

PARAMETRIC OSCILLATORS
Femtosecond OPOs at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials, 20:10418 (R;US)
Phase correction in two-crystal optical parametric oscillators, 20:11280 (R;US)

PARITY NONCONSERVATION
See P INVARIANCE

PARTIAL BODY IRRADIATION
Investigation of a practical method of output factor determination for small and irregular electron beams, 20:9820 (RA;IL)

PARTIAL DIFFERENTIAL EQUATIONS
See also BOLTZMANN EQUATION
NAVIER-STOKES EQUATIONS
Nonlinear difference approximations for evolutionary PDEs, 20:11939 (R;US)

PARTICLE BEAMS
See also SECONDARY BEAMS
Neural network technique for orbit correction in accelerators/storage rings, 20:10618 (R;US)

PARTICLE TRACKS
See also FISSION TRACKS
Meso-optical Fourier transform microscope with double focusing, 20:10716 (IA;RU)

PARTICLE WIDTHS
Excited Charm States, 20:11396 (R;US)

PARTICLES
See also NEUTRAL PARTICLES
PARTICULATES
Growth and sedimentation of fine particles produced in aqueous solutions of palladium sulfate and palladium sulfate-silver sulfate induced by gamma-ray irradiation, 20:10494 (R;JP)
Particulate Flow Research Lab. Quarterly progress report, July 1, 1994–September 30, 1994, 20:9258 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, December 6, 1992–February 28, 1993, 20:9253 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 6, 1992–December 5, 1992, 20:9252 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 1, 1993–November 30, 1993, 20:9256 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 6, 1991–December 5, 1991, 20:9251 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, September 6, 1990–December 5, 1990, 20:9247 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report No. 11, March 1, 1993–May 31, 1993, 20:9254 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, June 1, 1993–August 31, 1993, 20:9255 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, December 1, 1993–February 28, 1994, 20:9257 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, December 6, 1990–March 5, 1991, 20:9248 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, June 6, 1991–September 5, 1991, 20:9250 (R;US)
Research on fundamental aspects of inorganic vapor and particle deposition in coal-fired systems. Quarterly technical report, March 6, 1991–June 5, 1991, 20:9249 (R;US)

PARTICULATES
Effectiveness of an effluent retention pond cover to reduce atmospheric source terms, 20:9512 (R;US)
Hazard control indices for radiological and non-radiological materials, 20:9575 (R;US)
Particulate emission abatement for Krakow boiler houses. Technical progress report No. 2, July 1, 1994–September 30, 1994, 20:9228 (R;US)
Radioactive effluent measurements at the Army Pulse Radiation Facility, 20:10044 (R;US)

PARTON MODEL
Ioffe-time distributions instead of parton momentum distributions in description of deep inelastic scattering, 20:11353 (R;DE)

PARTONS
A study of parton distribution functions with the use of photon + jet event kinematics in $p\bar{p}$ collisions at $\sqrt{s}$ = 1.8 TeV, 20:11361 (R;US)

PATGAS PROCESS
See COAL GASIFICATION

PATIENTS
Post treatmeat dose distribution evaluation for a recent NCT patient, 20:10971 (RA;US)

PBX DEVICES
FY93 Princeton Plasma Physics Laboratory. Annual report, October 1, 1992–September 30, 1993, 20:11827 (R;US)
Nonlinear phenomena, turbulence and anomalous transport in fusion plasmas, 20:11782 (R;US)
Princeton Plasma Physics Laboratory (PPPL) annual site environmental report for calendar year 1993, 20:11874 (R;US)

PEATLANDS
See WETLANDS

PEBBLE BED REACTORS
Experimental investigations of graphite corrosion and aerosol formation during air ingress into the core of a high temperature pebble bed reactor, 20:10090 (R;DE;In German)
On the selfacting safe limitation of fission power and fuel temperature in innovative nuclear reactors, 20:10091 (R;DE;In German)

PENTACYN
See RADIOPROTECTIVE SUBSTANCES

PEOPLE
See HUMAN POPULATIONS

PERFORMANCE
Performance indicators for first quarter CY 1994, 20:9403 (R;US)

PERMANENT MAGNETS
Faster magnet sorting with a threshold acceptance algorithm, 20:10668 (R;US)

PEROVSKITE
Ion beam mixing of titanium overlayers with hydroxyapaptite substrates, 20:10411 (R;US)

PERSONAL COMPUTERS
Converting multiple OC-3c ATM streams to HIPPI to drive an HDTV frame buffer from a workstation cluster, 20:11940 (R;US)
Scientific statistics and graphics on the Macintosh, 20:11949 (R;US)

PERSONNEL
See also CONTRACTOR PERSONNEL
MEDICAL PERSONNEL

PROFESSIONAL PERSONNEL
REACTOR OPERATORS
Dose dependent qualitative analysis of the effects of tritiated water (HTO) on the developing mouse cerebellum from 15th day Post - Coitum, 20:11182 (RA;US)
Environmentally Conscious Manufacturing Project: ECM assessment guidance manual, 20:10242 (R;US)
Federal assistance project status report. Third quarterly report, October 1, 1994–December 31, 1994, 20:10241 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 2, 20:9498 (R;US)
Radiological consequences of a propagated fire accident in a radiochemical separations facility, 20:9782 (R;US)
Research activities related to internal contamination and bioassay and experience gained in this field, 20:11092 (IA;EG)

PERSONNEL DOSIMETRY
Accuracy
Estimates of bias and uncertainty in recordered external dose, 20:11149 (RA;US)
Certification
Recent changes in accreditation philosophy, 20:11190 (RA;US)
The DOE Laboratory Accreditation Program 8 years later, 20:11189 (RA;US)
Decision Making
Status of the revision of ANSI N13.27, "Performance specifications for pocket-sized alarming dosimeters/ratemeters", 20:11187 (RA;US)
Decision Tree Analysis
Status of radioprotection at Brazilian Universities, 20:11125 (RA;US)
Evaluation
Assessment of radiation doses at the Instituto de Pesquisas Energeticas e Nucleares, 20:11126 (RA;US)
Personal monitoring in the United Kingdom, 20:11124 (RA;US)
Status of radioprotection at Brazilian Universities, 20:11125 (RA;US)
Quality Control
Estimates of bias and uncertainty in recordered external dose, 20:11149 (RA;US)
Traceability of a panoramic gamma irradiator using different TLD systems as transfer instruments, 20:10755 (RA;US)
Regulations
Status of the revision of ANSI N13.27, "Performance specifications for pocket-sized alarming dosimeters/ratemeters", 20:11187 (RA;US)
Reporting Requirements
Establishing a minimum reporting level (gamma) for the personal dosimetry device worn at the Idaho National Engineering Laboratory (INEL), 20:11207 (RA;US)
Time-dependent, low-dose reporting limit for dosimeters that are taken home at the end of the workday, 20:11210 (RA;US)
Safety Standards
Angular variation of the personal dose equivalent, H_p (0.07), for beta radiation and nearly monoenergetic electron beams: Preliminary results, 20:11158 (RA;US)
Establishing a minimum reporting level (gamma) for the personal dosimetry device worn at the Idaho National Engineering Laboratory (INEL), 20:11207 (RA;US)
Modification of dose algorithm for Teledyne 9150 TLD system and performance test of the algorithm via intercomparison studies, 20:11211 (RA;US)
The Central Index of Dose Information: dose distributions in the United Kingdom over the period 1986-1991, 20:11127 (RA;US)
Standards
Angular dependence of dose equivalent response of an albedo neutron dosimeter, 20:11205 (RA;US)
Recent changes in accreditation philosophy, 20:11190 (RA;US)
Whole-Body Counting
The DOE Laboratory Accreditation Program 8 years later, 20:11189 (RA;US)

PERSONNEL FILM DOSIMETRY
See PERSONNEL DOSIMETRY

PERSONNEL MANAGEMENT
Integrated formal operations plan, 20:11899 (R;US)

PERSONNEL MONITORING
Proposal of a bioassay program for workers of the thorium nitrate purification facility at the IPEN-CNEN/SP, 20:11181 (RA;US)

PESTICIDES
Elucidation of processes resulting in the contamination of groundwater used as drinking water reservoirs with pesticides, 20:10937 (R;DE;In German)

PETROLEUM
A study of Dykstra-Parsons curves, 20:9282 (R;US)
Annex III-evaluation of past and ongoing enhanced oil recovery projects, 20:9276 (R;US)
Characterization and modification of fluid conductivity in heterogeneous reservoirs to improve sweep efficiency. Final report, 20:9277 (R;US)
Detailed evaluation of the West Kiehl alkaline-surfactant-polymer field project and it's application to mature Minnelusa waterfloods. Annual technical report, January 1993–December 1993, 20:9280 (R;US)
Improved techniques for fluid diversion in oil recovery. Second annual report, October 1, 1993–September 30, 1994, 20:9281 (R;US)
Petroleum supply monthly, January 1995, with data for November 1994, 20:9297 (R;US)
Salt dissolution sinkhole at the Weeks Island, Louisiana, Strategic Petroleum Reserve storage site, 20:9307 (R;US)
Scale-up of miscible flood processes for heterogeneous reservoirs. Second annual report, 20:9279 (R;US)
The Kwajalein bioremediation demonstration: Final technical report, 20:9304 (R;US)
Winter fuels report, 20:9300 (R;US)
Winter fuels report, 20:9299 (R;US)
Winter fuels report, 20:9300 (R;US)
Winter fuels report. Week ending: February 10, 1995, 20:10196 (R;US)

PETROLEUM COKE

See PROCESS SOLUTIONS

PLATINUM
Aniline hydrogenolysis on the Pt(111) single crystal surface: Mechanisms for C-N bond activation, 20:9290 (R;US)
Anodic oxidation of tetrasodium ethylenediaminetetraacetic acid in alkaine solutions, 20:10265 (R;US)
Kinetics and dynamics of oxidation reactions involving adsorbed CO species on bulk supported Pt and copper oxides. Final project report, January 1, 1991–December 31, 1993, 20:10477 (R;US)
Track radiography of heavy elements in minerals, 20:10454 (RA;RU)
[Hydrogen induced C-C, C-N, and C-S bond activities on Pi and Ni surfaces]: Summary, 20:10478 (R;US)

PLATINUM 196
Anomaly in O(6) ^{196}Pt, 20:11549 (RA;FR)

PLATINUM ISOTOPES
See also PLATINUM 196
A microscopic description of the deformation properties in even-A platinum isotopes, 20:11428 (RA;FR)

PLESIOTHERAPY
See RADIOTHERAPY

PLUMES
A computer program for superpositioning multiple UF_6 plume simulations to determine health effects, 20:10831 (R;US)

PLUTONIUM
A Novel Approach to the Problem of Highly-Sensitive Regular Analysis for Man-Made Plutonium in Environment and Human Body, 20:10456 (R;XJ)
Accelerator-driven assembly for plutonium transformation (ADAPT), 20:10604 (R;US)

CSER 94-011: Use of glovebags for demister draining operations, 20:10531 (R;US)
Determination of microquantities of Pu with thermal neutrons and gamma-rays, 20:10452 (IA;RU)
Determination of the environmental radioactive contamination using radiography, 20:10880 (IA;RU)
Materials considerations for molten salt accelerator-based plutonium conversion systems, 20:10052 (R;US)
Passive field monitoring of plutonium and americium in soil, 20:10857 (R;US)
Precipitation of plutonium from acidic solutions using magnesium oxide, 20:10467 (R;US)
Recovery of UO_2/PuO_2 in IFR electrorefining process, 20:9443 (PA;US)
Removal of plutonium and Americium from hydrochloric acid waste streams using extraction chromatography, 20:9433 (R;US)

PLUTONIUM 238
Radionuclide concentrations in fish collected from Jemez, Nambe, and San Ildefonso Tribal Lakes, 20:9737 (R;US)

PLUTONIUM 239
Radionuclide concentrations in fish collected from Jemez, Nambe, and San Ildefonso Tribal Lakes, 20:9737 (R;US)

PLUTONIUM COMPOUNDS
See also PLUTONIUM OXIDES
Application of CR-39-type plastic track detectors and thin-layer inorganic sorbents to the determination of alpha-active radionuclide microconcentrations in water, 20:10714 (IA;RU)

PLUTONIUM OXIDES
Dynamic and quasi-static simulation and analysis of the plutonium oxide/metal containers subject to 30-foot dropping, 20:9672 (R;US)
Experiments comparing the uptake of americium from chloride media using extraction chromatography, 20:9436 (R;US)
Recovery of UO_2/PuO_2 in IFR electrorefining process, 20:9443 (PA;US)

POOR PEOPLE
See LOW INCOME GROUPS

POROUS MATERIALS
Molecular approach to mesoporous metal sulfides, 20:10485 (R;US)
Stochastic analysis of transport of conservative solutes in caisson experiments, 20:10885 (R;US)

PORTABLE EQUIPMENT
Development of a portable mass spectrometric system for determination of isotopic composition of solid uranium samples using fluorine volatilization. Final report, 20:10775 (R;US)

PORTLAND CEMENT
Cementation and solidification of miscellaneous mixed wastes at the Rocky Flats Environmental Technology Site, 20:9472 (R;US)
PORTMANTEAU EVENT
See NUCLEAR EXPLOSIONS
UNDERGROUND EXPLOSIONS
PORTSMOUTH GASEOUS DIFFUSION PLANT
Portsmouth Gaseous Diffusion Plant Annual Site Environmental Report summary for 1993, 20:9701 (R;US)
POSITION SENSITIVE DETECTORS
Data reduction and multiple Coulomb scattering error analysis within silicon tracking detector system, 20:10713 (RA;XJ)
Single molecule detection using charge-coupled device array technology. Final report, 20:10763 (R;US)
POSITRON BEAMS
Development of a positron source for the ATF (Accelerator Test Facility), 20:10644 (RA;JP;In Japanese)
Test apparatus of electron/positron conversion system for SPring-8 Linac, 20:10675 (RA;JP;In Japanese)
POSITRON COLLISIONS
Sampling procedures using optical-data and partial wave cross sections in a Monte Carlo code for simulating kilovolt electron and positron transport in solids, 20:11730 (R;SE)
POSITRON COMPUTED TOMOGRAPHY
Parallel algorithms and tools for matching functional and anatomical data on the basis of PET and MRT volume data, 20:10991 (R;DE;In German)
POSITRON SOURCES
Conceptual design of a high-intensity positron source for the Advanced Neutron Source, 20:9822 (R;US)
Investigation on the positron factory project at JAERI. 6. A pilot study of the self-driven rotary converter for high-power beams, 20:10645 (RA;JP;In Japanese)
PF slow positron source, 20:10646 (RA;JP;In Japanese)
POSITRONS
Sampling procedures using optical-data and partial wave cross sections in a Monte Carlo code for simulating kilovolt electron and positron transport in solids, 20:11730 (R;SE)
POST-IRRADIATION EXAMINATION
Irradiation experiments of the 6th-12th OGL-1 fuel assemblies, 20:10070 (R;JP;In Japanese)
POTABLE WATER
See DRINKING WATER
POTASSIUM
Non-coincident multi-wavelength emission absorption spectroscopy, 20:10202 (R;US)
Potassium body burdens in occupational users of egyptian nuclear research center, 20:11091 (IA;EG)
POTASSIUM 36
Gamow-Teller strength in the β-decay of ^{36}Ca, 20:11539 (R;DE)
POTASSIUM 37
β-decay of ^{37}Ca, 20:11538 (R;DE)
Gamow-Teller strength in the beta-decay of ^{37}Ca and its implications for the detection of the solar neutrino flux, 20:11535 (R;DE)
POTASSIUM BROMIDES
Powdered KBr-In as an effective x-ray storage material with a wide dynamic range, 20:10998 (RA;US)
POTASSIUM IODIDES
An analysis of potassium iodide (KI) prophylaxis for the general public in the event of a nuclear accident, 20:9740 (R;US)
POTASSIUM OXIDES
Electronic structure of $(La, Sr)_2CuO_4$ and $Ba_{0.6}K_{0.4}BiO_3$, 20:10428 (R;US)
POTENTIAL FLOW
Two-phase potential flow. Progress report, July 1, 1993–June 1, 1994, 20:10542 (R;US)
POTENTIOMETERS
Potentiometric studies at ORNL with hydrogen electrode concentration cells, 20:10431 (R;US)
POTT-BROCHE PROCESS
See COAL LIQUEFACTION
POWDER RIVER BASIN
Detailed evaluation of the West Kiehl alkaline-surfactant-polymer field project and it's application to mature Minnelusa waterfloods. Annual technical report, January 1993–December 1993, 20:9280 (R;US)
POWER DISTRIBUTION
Benchmark calculations of power distribution within assemblies, 20:10010 (R;XN)
POWER DISTRIBUTION SYSTEMS
Type B investigation of electrical fault in 351 Substation, December 4, 1994, 20:9757 (R;US)
POWER GENERATION
See also COGENERATION
Accelerator-driven nuclear power and transmutation facilities: Questions and problems. Panel discussion, 20:10603 (IA;XA)
Special scientific programme on use of high energy accelerators for transmutation of actinides and power production, 20:9418 (I;XA)
[High energy particle accelerators for bulk transformation of elements and energy generation], 20:10601 (IA;XA)
POWER SUBSTATIONS
CENRTC Project No. 2F3EOA, OCB A-372, acceptance test procedure, 20:10105 (R;US)
Type B investigation of electrical fault in 351 Substation, December 4, 1994, 20:9757 (R;US)
POWER SYSTEMS
Oak Ridge National Laboratory (ORNL) Superconducting Technology Program for electric power systems. Annual report for FY 1994, 20:10104 (R;US)
Production costing simulation in thermal power systems using the mixture of conditional load distribution functions. Working paper, 20:11953 (R;AT)
POWER TRANSMISSION
Incremental cost pricing of transmission services. Final report, 20:10189 (R;US)
PRASEODYMIUM 129
Low-energy band structures in light odd-A La and Pr isotopes, 20:11544 (RA;FR)
PRASEODYMIUM 131
Low-energy band structures in light odd-A La and Pr isotopes, 20:11544 (RA;FR)
PRASEODYMIUM 143
Measurement of hyperfine structure in ^{143}Pr ($T_{1/2}$ = 13.6d) by collinear laser-ion-beam spectroscopy, 20:11633 (RA;JP)
PRASEODYMIUM COMPOUNDS
Superconducting superlattices: preparation and applications, 20:10377 (IA;RU)
PRASEODYMIUM ISOTOPES

Home radon monitor modeled after the common smoke detector, 20:10834 (R;US)
Investigation of spatial and time dependences of S-N-S high T_c film microdetector response by laser scanning, 20:11764 (IA;RU)
Passive field monitoring of plutonium and americium in soil, 20:10857 (R;US)
Radiological standards and calibration laboratory capabilities, 20:11216 (R;US)
Research in elementary particle physics. Technical progress report, June 1, 1993–May 31, 1994, 20:10684 (R;US)
Silicon subsystem mechanical engineering work for the solenoidal detector collaboration, 20:10749 (R;US)
Technology information profile: Long-Range Alpha Detector (LRAD), 20:10776 (R;US)

RADIATION DOSEMETERS
See DOSEMETERS

RADIATION DOSES
Dose Contribution from High Level Waste Uranium and Plutonium. Revision 1, 20:11223 (R;US)

Calculation Methods
A TLD dose algorithm for mixed fields at a nuclear weapons facility, 20:11212 (RA;US)
A new approach to TLD dose algorithms, 20:11213 (RA;US)
Development of new methodology for dose calculation in photographic dosimetry, 20:11151 (RA;US)
Modification of dose algorithm for Teledyne 9150 TLD system and performance test of the algorithm via intercomparison studies, 20:11211 (RA;US)

Comparative Evaluations
Practical issues in discriminating between environmental and occupational sources in a uranium urinalysis bioassay program, 20:11218 (R;US)

Computer Calculations
The grout/glass performance assessment code system (GPACS) with verification and benchmarking, 20:9657 (R;US)

Dose Equivalents
Final report on the project research 'assessment of radiation exposure of the public to radioactivities related to the environment and food chain'. April 1988 - March 1992, 20:11119 (R;JP;In Japanese)

Food Chains
Final report on the project research 'assessment of radiation exposure of the public to radioactivities related to the environment and food chain'. April 1988 - March 1992, 20:11119 (R;JP;In Japanese)

Forecasting
Dose assessment and approach to the safety for the public in the emergency. Proceedings, 20:11109 (R;JP;In Japanese)

G Codes
Configuration management plan for the GENII software, 20:9715 (R;US)
Test documentation for the GENII Software Version 1.485, 20:11222 (R;US)

Information Systems
The Central Index of Dose Information: dose distributions in the United Kingdom over the period 1986-1991, 20:11127 (RA;US)
The National Dose Registration and Information System: Dose distributions in the Netherlands over the period 1989-1993, 20:11130 (RA;US)

Mathematical Models
General approach and preliminary results on gamma - field reconstruction for the Techa River, 20:11129 (RA;US)
Monte Carlo technique applications in the field of radiation dosimetry at the ENEA Radiation Protection Institute: A review, 20:11132 (RA;US)

Occupational Exposure
Experience with REIRS for the revised 10 CFR 20, 20:11137 (RA;US)
Radiation protection in hospitals, 20:11195 (RA;US)
The Central Index of Dose Information: dose distributions in the United Kingdom over the period 1986-1991, 20:11127 (RA;US)

Phantoms
Monte Carlo technique applications in the field of radiation dosimetry at the ENEA Radiation Protection Institute: A review, 20:11132 (RA;US)

Radiation Quality
Dosimetry of mixed radiation using recombination chamber, 20:11171 (RA;US)

Time Dependence
Time-dependent, low-dose reporting limit for dosimeters that are taken home at the end of the workday, 20:11210 (RA;US)

RADIATION DOSIMETRY
See DOSIMETRY

RADIATION EXPOSURE (DOSES)
See RADIATION DOSES

RADIATION HARDENING
Study on through-thickness attenuation of irradiation embrittlement using JPDR pressure vessel, 20:10071 (R;JP;In Japanese)

RADIATION HAZARDS
Electron transport calculations with biomedical and environmental applications. Final report, December 23, 1992–January 31, 1994, 20:11071 (R;US)
Use of international data sets to evaluate and validate pathway assessment models applicable to exposure and dose reconstruction at DOE Facilities. Progress report, June 1994–September 1994, 20:9756 (R;US)

RADIATION HYGIENE
See RADIATION PROTECTION

RADIATION MONITORING

Compendium of ORD and OSWER documents relevant to RCRA corrective action, 20:9408 (R;US)
Computerized Simulation
Automated remedial assessment methodology software system, 20:9470 (R;US)
Integrated dynamic modeling and management system mission analysis, 20:9611 (R;US)
Cooperation
Interface control document between Analytical Services and Solid Waste Disposal Division, 20:9614 (R;US)
Information Dissemination
Title list of documents made publicly available, December 1-31, 1994, 20:10180 (R;US)
Information Systems
System design description for Waste Information and Control System, 20:9623 (R;US)
Materials Handling Equipment
Design criteria tank farm storage and staging facility, 20:9579 (R;US)
Meetings
[Modular risk analysis for assessing multiple waste sites]: Proceedings, 20:9376 (R;US)
Mission Analysis
Integrated dynamic modeling and management system mission analysis, 20:9611 (R;US)
Optimization
Alternative concepts for treatment and disposal of Hanford site high-level waste in tanks, 20:9626 (R;US)
Fernald waste management and disposition, 20:9414 (R;US)
Process Control
Alternative concepts for treatment and disposal of Hanford site high-level waste in tanks, 20:9626 (R;US)
Program Management
Fernald waste management and disposition, 20:9414 (R;US)
National Transuranic Program Charter, 20:9386 (R;US)
Quality Assurance
Independent assessment to continue improvement: Implementing statistical process control at the Hanford Site, 20:9335 (R;US)
Records Management
Documentation assessment, Project C-018H, 200-E area effluent treatment facility, 20:9526 (R;US)
Reporting Requirements
Documentation assessment, Project C-018H, 200-E area effluent treatment facility, 20:9526 (R;US)
Simulation
Hanford solid waste management system simulation, 20:9464 (R;US)

RADIOACTIVE WASTE PROCESSING
Characterization of borosilicate glass for immobilization of PHWR type high-level radioactive wastes, 20:9417 (I;AR;In Spanish)
Accelerators
Special scientific programme on use of high energy accelerators for transmutation of actinides and power production, 20:9418 (I;XA)
Bench-Scale Experiments
Multiple encapsulation of LANL waste using polymers. Final report, 20:9429 (R;US)
Comparative Evaluations
Aqueous nitrate waste treatment: Technology comparison, cost/benefit, and market analysis, 20:9387 (R;US)
Corrosion
Corrosion mechanisms of containment glasses for fission products, 20:9415 (R;FR;In French)
Electrochemistry
Electrochemical organic destruction in support of Hanford tank waste pretreatment, 20:9446 (R;US)
Engineered Safety Systems
BCE selector valves and flow proportional sampler, 20:9544 (R;US)
Evaporators
Analyses and characterization of double shell tank, 20:9590 (R;US)
Feasibility Studies
An overview of the development, testing, and application of composite absorbers, 20:9428 (R;US)
Multiple encapsulation of LANL waste using polymers. Final report, 20:9429 (R;US)

Test plan for evaluation of plasma melter technology for vitrification of high-sodium content low-level radioactive liquid wastes, 20:9659 (R;US)

Flowsheets
241-A evaporator flowsheet users manual, 20:9658 (R;US)

Glass
Corrosion mechanisms of containment glasses for fission products, 20:9415 (R;FR;In French)

Ion Exchange
An overview of the development, testing, and application of composite absorbers, 20:9428 (R;US)

Off-Gas Systems
HC-21C off-gas test procedure, 20:9521 (R;US)

Program Management
Controlling changes - lessons learned from waste management facilities, 20:9398 (R;US)
Supplemental design requirements document solid waste operations complex, 20:9574 (R;US)

Purex Process
Alkaline hydrolysis process for treatment and disposal of Purex solvent waste, 20:9374 (R;IN)

Remote Control
Buried waste integrated demonstration human engineered control station. Final report, 20:9404 (R;US)

S Codes
A dynamic simulation model of the Savannah River Site high level waste complex, 20:9674 (R;US)

Safety Analysis
Nuclear criticality safety analysis summary report: The S-area defense waste processing facility, 20:9682 (R;US)

Separation Processes
Separation science and technology. Semiannual progress report, April 1992–September 1992, 20:9368 (R;US)

Transmutation
Special scientific programme on use of high energy accelerators for transmutation of actinides and power production, 20:9418 (I;XA)

RADIOACTIVE WASTE STORAGE

Coverings
Control of Eolian soil erosion from waste site surface barriers, 20:9469 (R;US)

Design
Position paper - peer review and design verification of selected activities, 20:9571 (R;US)

Feasibility Studies
Hanford spent nuclear fuel project recommended path forward, volume III: Alternatives and path forward evaluation supporting documentation, 20:9347 (R;US)

Fire Hazards
Fire hazards analysis, east tank farm storage and staging facility, 20:9580 (R;US)

Materials Handling Equipment
LDUA engineering development plan, 20:10533 (R;US)

Monitoring
Acceptance test report for tank bottom thermocouples on Tank 241-SY-101, 20:9587 (R;US)

Quality Assurance
Project quality assurance plant: Sodium storage facility, project F-031, 20:9528 (R;US)

Risk Assessment
Fire hazards analysis, east tank farm storage and staging facility, 20:9580 (R;US)
Hazard categorization of 100 K West fuel canister gas and liquid sampling, 20:9354 (R;US)

Safety Analysis
Double shell tank waste analysis plan, 20:9605 (R;US)
Safety Evaluation of the ESP Sludge Washing Baselines Runs. Revision 1, 20:9686 (R;US)
Special case waste hazard categorization. Revision 1, 20:9775 (R;US)

Safety Engineering
45 Day safety screen results for Tank 241-C-108 – Augers 94-012, 94-014 and 94-015, 20:9593 (R;US)
Engineering task plan for flammable gas atmosphere mobile color video camera systems, 20:9602 (R;US)
Hydrogen recombiner catalyst test supporting data, 20:9656 (R;US)
Spare mitigation/retrieval mixer pumps, 20:9607 (R;US)
Standard-B Hydrogen Monitoring System, system design description, 20:9624 (R;US)
Tank 241-B-103 tank characterization plan, 20:9642 (R;US)
Video requirements plan for the HMT equipment removal system, 20:9780 (R;US)

Safety Standards
324 Radiochemical engineering cells and high level vault tanks mixed waste compliance status, 20:9456 (R;US)

Sampling
45-Day safety screen results for single shell tank 241-AP-106, liquid grab samples, riser 1, 30° and 150° in conjunction with evaporator campaign 95-1, 20:9592 (R;US)

RADIOACTIVE WASTES

HIGH-LEVEL RADIOACTIVE WASTES
INTERMEDIATE-LEVEL RADIOACTIVE WASTES
LOW-LEVEL RADIOACTIVE WASTES
RADIOACTIVE EFFLUENTS

Chemical Analysis
45 Day safety screen results for Tank 241-C-108 – Augers 94-012, 94-014 and 94-015, 20:9593 (R;US)
Estimates of laboratory accuracy and precision on Hanford waste tank samples, 20:9582 (R;US)
Fernald waste management and disposition, 20:9414 (R;US)
Fiscal year 1995 work scope for the 222-S, WSCF, 325, and Litco Laboratories, 20:9616 (R;US)
Tank 241-B-103 tank characterization plan, 20:9642 (R;US)
Tank 241-B-112 tank characterization plan, 20:9653 (R;US)
Tank 241-C-103 tank characterization plan. Revision 1, 20:9637 (R;US)
Tank 241-C-107 tank characterization plan, 20:9649 (R;US)
Tank 241-U-103 tank characterization plan, 20:9648 (R;US)

Chemical Composition
Number of core samples: Mean concentrations and confidence intervals, 20:9633 (R;US)

Chemical Properties
A summary report on the search for current technologies and developers to develop depth profiling/physical parameter end effectors, 20:9541 (R;US)

Combustion
A chemical basis for the partitioning of radionuclides in incinerator operation, 20:9465 (R;US)
CSER 94-013: Classification and access to PFP 232-Z Incinerator Facility and limits on characterization and disassembly activities in 232-Z burning hood, 20:9539 (R;US)

Containment
Decision support system to select cover systems, 20:9432 (R;US)
Feasibility of permeation grouting for constructing subsurface barriers, 20:9474 (R;US)
New barrier fluids for subsurface containment of contaminants, 20:10887 (R;US)

Coordinated Research Programs
Nuclear waste management programme 1995, 20:9437 (R;FI;In Finnish)

Decontamination
Office of radiation and indoor air: Program description, 20:9407 (R;US)

Dilution
An assessment of the dilution required to mitigate Hanford tank 241-SY-101, 20:9459 (R;US)

Drill Cores
Test plan for slow speed core sampling envelope test, 20:9644 (R;US)

Encapsulation
Cementation and solidification of miscellaneous mixed wastes at the Rocky Flats Environmental Technology Site, 20:9472 (R;US)

Environmental Transport
Characterization plan for Hanford spent nuclear fuel, 20:9452 (R;US)

Evaporation
Achievement of process control, safety, and regulatory compliance in a mixed waste evaporator system at the Hanford Site using data quality objectives, 20:9517 (R;US)
Uncertainties in the measured quantities of water leaving waste Tank 241-C-106 via the ventilation system, 20:9597 (R;US)

Flammability
Acquisition and reduction of data obtained from tank 101-SY in-situ ball rheometer, 20:9448 (R;US)

Information
Interface control document between PFP Transition Project and Solid Waste Disposal Division, 20:9615 (R;US)
Tank farms essential and support drawing plan. Revision 6, 20:9613 (R;US)

Inspection
Development of the stored waste autonomous mobile inspector (SWAMI II), 20:9676 (R;US)

Monitored Retrievable Storage
Method of characterizing void volume headspace in vented transuranic waste sludge drums using limited sampling data, 20:9396 (R;US)

Monitoring
Developments in radiography and tomography of waste containers at the Idaho National Engineering Laboratory, 20:9397 (R;US)
Tank characterization report for double-shell tank 241-AP-105, 20:9595 (R;US)
Vendors search for viscosity sensors for in situ tank waste characterization, 20:9542 (R;US)

Nondestructive Testing
Test procedure for boxed waste assay system, 20:9549 (R;US)

Packaging
Packaging design criteria, transfer and disposal of 102-AP mixer pump, 20:9543 (R;US)

Physical Properties
A summary report on the search for current technologies and developers to develop depth profiling/physical parameter end effectors, 20:9541 (R;US)

Pollution Abatement
Guide for preparing and maintaining generator group pollution prevention program documentation. Revision 2, 20:9604 (R;US)

Quantitative Chemical Analysis
Analyses and characterization of double shell tank, 20:9590 (R;US)

Radioactive Waste Disposal
Radiation protection and safety for final disposal of radioactive wastes stored in Abadia de Goias, Brazil, 20:11065 (I;BR;In Portuguese)

Radioactive Waste Processing
Aqueous nitrate waste treatment: Technology comparison, cost/benefit, and market analysis, 20:9387 (R;US)
Experimental data and analysis to support the design of an ion-exchange process for the treatment of Hanford tank waste supernatant liquids, 20:9450 (R;US)

Radioactive Waste Storage
Creep strains predicted from constitutive equations for Zircaloy-clad spent fuel rods, 20:9490 (R;US)
Developments in radiography and tomography of waste containers at the Idaho National Engineering Laboratory, 20:9397 (R;US)

Radiochemical Analysis
Analyses and characterization of double shell tank, 20:9590 (R;US)
Tank 241-AP-107 tank characterization plan. Revision 1, 20:9647 (R;US)

Radiolysis
Models for recurrent gas release event behavior in hazardous waste tanks, 20:9467 (R;US)

Radiometric Analysis
Test procedure for boxed waste assay system, 20:9549 (R;US)

Raman Spectroscopy
Test report for remote vs. contact Raman spectroscopy, 20:10464 (R;US)

Remedial Action
Buried waste integrated demonstration human engineered control station. Final report, 20:9404 (R;US)
Engineering work plan for design requirements document, Project W-058/028, 20:9552 (R;US)

Remote Handling
Development of the stored waste autonomous mobile inspector (SWAMI II), 20:9676 (R;US)
Sensor-based interior modeling, 20:9383 (R;US)

Rheology
Acquisition and reduction of data obtained from tank 101-SY in-situ ball rheometer, 20:9448 (R;US)

Sampling
Method of characterizing void volume headspace in vented transuranic waste sludge drums using limited sampling data, 20:9396 (R;US)
Number of core samples: Mean concentrations and confidence intervals, 20:9633 (R;US)
Safety analysis for push-mode and rotary-mode core sampling, 20:9777 (R;US)
Tank 241-B-103 tank characterization plan, 20:9642 (R;US)
Tank 241-B-112 tank characterization plan, 20:9653 (R;US)
Tank 241-C-103 tank characterization plan. Revision 1, 20:9637 (R;US)
Tank 241-C-107 tank characterization plan, 20:9649 (R;US)
Tank 241-U-103 tank characterization plan, 20:9648 (R;US)
Test plan for slow speed core sampling envelope test, 20:9644 (R;US)

Sludges
Functions and requirements for 105-KE Basin sludge retrieval and packaging, 20:9534 (R;US)
Test procedure for use of the shear vane in tanks 103-SY, 103-AN, and 103-AW, 20:9627 (R;US)

Solidification
Cementation and solidification of miscellaneous mixed wastes at the Rocky Flats Environmental Technology Site, 20:9472 (R;US)

Spatial Distribution
Mixed waste trench loading placement instructions, 20:9583 (R;US)

Stability
Amorphization of complex ceramics by heavy-particle irradiations, 20:10417 (R;US)

Standards Document
Radiation protection and safety for final disposal of radioactive wastes stored in Abadia de Goias, Brazil, 20:11065 (I;BR;In Portuguese)

Underground Disposal
Buried waste integrated demonstration human engineered control station. Final report, 20:9404 (R;US)
Feasibility of permeation grouting for constructing subsurface barriers, 20:9474 (R;US)
Hydrochemical data base for the Death Valley Region, California and Nevada, 20:9492 (R;US)
Mixed waste trench loading placement instructions, 20:9583 (R;US)
New barrier fluids for subsurface containment of contaminants, 20:10887 (R;US)
Test procedure for use of the shear vane in tanks 103-SY, 103-AN, and 103-AW, 20:9627 (R;US)
Transparent access to distributed, heterogeneous environmental information systems, 20:9462 (R;US)

Underground Storage
Acquisition and reduction of data obtained from tank 101-SY in-situ ball rheometer, 20:9448 (R;US)
An assessment of the dilution required to mitigate Hanford tank 241-SY-101, 20:9459 (R;US)

SALMON
Significance of selective predation and development of prey protection measures for juvenile salmonids in the Columbia and Snake River reservoirs. Annual progress report, February 1991–February 1992, 20:9857 (R;US)

SALT DEPOSITS
Salt dissolution sinkhole at the Weeks Island, Louisiana, Strategic Petroleum Reserve storage site, 20:9307 (R;US)

SAMARIUM COMPLEXES
Pressure-temperature sensors: Solution deposition of rare earth doped garnet films, 20:10415 (R;US)

SAMARIUM COMPOUNDS
Neutron-structure investigation of lattice effects of the fluctuated valency in Re_2CuO_4(Re=Nd, Sm), 20:11717 (IA;RU)

SAMPLERS
See also AIR SAMPLERS
A test of aquatic macroinvertebrate sub-sampling using a gridded screen, 20:10945 (R;US)
In situ sampling cart development engineering task plan, 20:9603 (R;US)
Number of core samples: Mean concentrations and confidence intervals, 20:9633 (R;US)
Safety analysis for push-mode and rotary-mode core sampling, 20:9777 (R;US)

SAN JUAN POWER PLANT
See FOSSIL-FUEL POWER PLANTS

SAN ONOFRE-1 REACTOR
Leakage prediction in nuclear power plants using similarity formulae and genetic algorithms, 20:9967 (RA;IL)

SANDIA NATIONAL LABORATORIES
1993 Site environmental report Sandia National Laboratories, Albuquerque, New Mexico, 20:9707 (R;US)
A case study on determining air monitoring requirements in a radioactive materials handling area, 20:11069 (R;US)
Management response plan for the Chemical Safety Vulnerability Working Group report. Volume 2, 20:10134 (R;US)
Partnering with Sandia National Laboratories through alliances or consortia, 20:11901 (R;US)
SANITARY LANDFILLS
Decision support system to select cover systems, 20:9432 (R;US)
SATELLITES
Computational studies of projectile melt in impact with typical whipple shields, 20:10528 (R;US)
FORTE antenna element and release mechanism design, 20:10519 (R;US)
SAVANNAH RIVER PLANT
Accidents
Radiological consequences of a propagated fire accident in a radiochemical separations facility, 20:9782 (R;US)
Clothing
Environmental assessment for the offsite commercial cleaning of controlled and routine laundry from the Savannah River Site, 20:9725 (R;US)
Environmental Effects
Patterns of fish assemblage structure and dynamics in waters of the Savannah River Plant. Comprehensive Cooling Water Study final report, 20:9708 (R;US)
Environmental Impact Statements
Draft Environmental Impact Statement, Waste Management, Savannah River Site, Aiken, South Carolina, 20:9380 (R;US)
Savannah River Site Waste Management Draft Environmental Impact Statement, 20:9381 (R;US)
Environmental Impacts
Results of Macroinvertebrate Sampling Conducted at 33 SRS Stream Locations, July–August 1993, 20:11224 (R;US)
Fire Hazards
Determination of frequencies of contamination and fire related incidents for DWPF SAR, 20:9786 (R;US)
Fires
Radiological consequences of a propagated fire accident in a radiochemical separations facility, 20:9782 (R;US)
Fuel Elements
Design data summary: Mark VIA fuel elements, 20:10059 (R;US)
Land Reclamation
Field test of six-phase soil heating at the Savannah River Site, 20:9745 (R;US)
Liquid Wastes
Quarterly sampling of the wetlands along the old F-Area effluent ditch: March 1994, 20:9721 (R;US)
Occupational Safety
Smart implementation of worker safety emergency preparedness programs at DOE non-nuclear facilities, 20:9781 (R;US)
Radiation Protection
A comparative study of worker and general public risks from nuclear facility operation using MACCS2, 20:10047 (R;US)
Radioactive Waste Management
A dynamic simulation model of the Savannah River Site high level waste complex, 20:9674 (R;US)
Criticality assessment of TRU burial ground culverts, 20:9720 (R;US)
Draft Environmental Impact Statement, Waste Management, Savannah River Site, Aiken, South Carolina, 20:9380 (R;US)
Hot-wall corrosion testing of simulated high level nuclear waste, 20:9666 (R;US)
Savannah River Site Waste Management Draft Environmental Impact Statement, 20:9381 (R;US)
Subcontracting strategy for the decontamination and decommissioning of Savannah River Site's First Tritium Extraction Facility, 232-F, 20:9689 (R;US)
Successful characterization of radioactive waste at the Savannah River Site, 20:9679 (R;US)
Titanium for long-term tritium storage, 20:9688 (R;US)
Radioactive Waste Processing
Modeling of batch operations in the Defense Waste Processing Facility at the Savannah River Site, 20:9675 (R;US)
Nuclear criticality safety analysis summary report: The S-area defense waste processing facility, 20:9682 (R;US)
Recycle of radiologically contaminated austenitic stainless steels, 20:9673 (R;US)
Tests of Cs-137 removal from DWPF samples prior to analysis, 20:9671 (R;US)
Radioactive Waste Storage
Metallography of pitted aluminum-clad, depleted uranium fuel, 20:9670 (R;US)
Safety
Management response plan for the Chemical Safety Vulnerability Working Group report. Volume 2, 20:10134 (R;US)
Separation Processes
Radiological consequences of a propagated fire accident in a radiochemical separations facility, 20:9782 (R;US)
Spent Fuel Storage
Corrosion of aluminum-cald spent fuel in reactor basin water storage, 20:9667 (R;US)
Streams
Technetium-99, iodine-129 and tritium in the waters of the Savannah River Site, 20:9719 (R;US)
Waste Management
Thirty-year solid waste generation forecast for facilities at SRS, 20:9683 (R;US)
Waste Storage
Economic evaluation of closure CAP barrier materials Volume I and Volume II, 20:9685 (R;US)
Economic evaluation of closure cap barrier materials study, 20:9681 (R;US)
Plant community development within the F- and H-Area tree-kill zone, 20:11231 (R;US)
Water Pollution Monitors
L-Area Reactor - 1993 annual - groundwater monitoring report, 20:10921 (R;US)
Water Quality
L-Area Reactor - 1993 annual - groundwater monitoring report, 20:10921 (R;US)
Technetium-99, iodine-129 and tritium in the waters of the Savannah River Site, 20:9719 (R;US)
SAXON-WOODS POTENTIAL
See WOODS-SAXON POTENTIAL
SCALAR FIELDS
Harmonic Coordinates in the Problem on Static Gravitational and Massless Scalar Fields with a Point Source, 20:11312 (R;XJ)
SCALAR MESONS
The $(0^+,1^+)$ heavy meson multiplet in an extended NJL model, 20:11393 (R;DE)
SCANDIUM 45 TARGET
Giant dipole resonance in ^{45}Sc through de-excitation gamma rays, 20:11659 (IA;RU)
SCANNERS (IMAGE)
See IMAGE SCANNERS
SCANNING MEASURING PROJECTORS
The methods of track measurement in nuclear emulsion by the TEMP device, 20:10719 (IA;RU)
SCHMALFELDT-WINTERSHALL PROCESS
See COAL GASIFICATION
SCHOOL BUILDINGS
Implementation of energy conservation measures in public buildings, as shown with the example of the Fischbeck school center, 20:10219 (IA;DE;In German)
The Schiffdorf energy model for the Spaden elementary school, 20:10220 (IA;DE;In German)
SCHOOL FACILITIES

SCHOONER EVENT
See THERMONUCLEAR EXPLOSIONS

SCHROEDINGER EQUATION
NEPTUNE. Bound State Wave Functions in Nuclei, 20:11919 (CM;US)
The Method of Integration of the Nonlinear Schroedinger Equation with a Source, 20:11249 (R;XJ;In Russian)
Transparent Potential Perturbations on Lattices and in the Periodical Structures. Elements of the Qualitative Theory of Wave Motion Over the Channels, 20:11250 (R;XJ;In Russian)

SCINTILLATION CHAMBERS
See SCINTILLATION COUNTERS

SCINTILLATION COUNTERS
See also LIQUID SCINTILLATION DETECTORS
SCINTILLATOR-PHOTODIODE DETECTORS
SOLID SCINTILLATION DETECTORS
Absolute efficiency measurement for neutron detectors using Cf-252 neutron source, 20:10695 (IA;TH;In Thai)
Cosmic ray test results of the DO prototype scintillating fiber tracker, 20:10689 (R;US)
The development of a passive fiber optic sensor system for remote monitoring in low energy gamma environments, 20:11168 (RA;US)

SCINTILLATION DETECTORS
See SCINTILLATION COUNTERS

SCINTILLATOR-PHOTODIODE DETECTORS
An yttrium aluminum perovskite based gamma-ray dosimeter, 20:11147 (RA;US)

SCISSION-POINT MODEL
Scissors modes: from semiclassical to microscopic descriptions, 20:11516 (IA;RU)

SCOTCH EVENT
See NUCLEAR EXPLOSIONS
UNDERGROUND EXPLOSIONS

SCRAP
See also SCRAP METALS
Radiological control criteria for materials considered for recycle and reuse, 20:11220 (R;US)

SCRAP METALS
Radiological control criteria for materials considered for recycle and reuse, 20:11220 (R;US)
Radiological release criteria at the Fernald Environmental Management Project theory and practice, 20:9413 (R;US)

SEA DISPOSAL
See MARINE DISPOSAL

SEA LEVEL
Field, laboratory, and modeling studies of water infiltration and runoff in subfreezing snow on regional scales to estimate future greenhouse-induced changes in sea-level. Final report, 20:10933 (R;US)

SEALING MATERIALS
Barriers and post-closure monitoring (AL121125), 20:9431 (R;US)
Decision support system to select cover systems, 20:9432 (R;US)
Testing of isolation barrier sealing surfaces, 20:9532 (R;US)

SEAS
See also ATLANTIC OCEAN
BALTIC SEA
Measuring stress: Uses and limitations, 20:10928 (R;US)
Ocean Studies Board annual report, 1991, 20:10934 (R;US)
Simulations of the carbon cycle in the oceans, 20:10932 (R;GB)
The northern wintertime divergence extrema at 200 hPa and surface cyclones as simulated in the AMIP integration of the ECMWF general circulation model, 20:10848 (R;US)
U.S Department of Energy contract DE-FG02-90ER61053: Simulations of the carbon cycle (Part II), 20:10931 (R;GB)

SEASONINGS
See FOOD

SEBACEOUS GLANDS
See SKIN

SECONDARY BATTERIES
See ELECTRIC BATTERIES

SECONDARY BEAMS
Production of a pure $^{42}Sc^{m}$ isomeric beam, 20:11258 (RA;FR)
Status of high-spin isomer beam at RIKEN, 20:11259 (RA;FR)

SECONDARY EMISSION
Integral test of secondary gamma-ray production cross sections of iron in JENDL-3 with continuous energy Monte Carlo analysis, 20:11691 (RA;JP)

SECONDARY REACTIONS
The production of high energy neutrons by secondary reactions, 20:11606 (R;US)

SECONDARY RECOVERY
See ENHANCED RECOVERY

SEDIMENT-WATER INTERFACES
Radiotracer method for investigations of marine sediment movement, 20:9818 (I;PL;In Polish)
The assessment of the basic movement parameters for marine sediments by means of radiotracer investigations, 20:9817 (I;PL;In Polish)

SEDIMENTARY BASINS
The blanketing effect in sedimentary basins, 20:11236 (R;NO)

SEEDS
See also MUNGBEANS
Effect of gamma radiation on Corchorus olitorius L., 20:11042 (IA;XA)
Induced mutants in tomato, 20:11038 (IA;XA)
Induction of shrubby type mutant in Stylosanthes guyanensis, 20:11032 (IA;XA)
Salt tolerance of the barley mutant 'Golden Promise', 20:11031 (IA;XA)

SEISMIC DETECTION
3-D seismic imaging of complex geologies, 20:11237 (R;US)

SEISMIC EFFECTS
Generation of earthquake signals, 20:10913 (R;SE)

SELENIUM
The diffusion properties of ion implanted species in selected target materials, 20:11255 (R;US)

SELENIUM 79
Measurement of beta-decay half-lives of short-lived nuclei, 20:11571 (RA;JP)
PXAMS – Projectile X ray AMS: X ray yields and applications, 20:10465 (R;US)

SELENIUM ISOTOPES
See also SELENIUM 79
Prolate-oblate shape coexistence at Z,N $\approx$ 36,38^{+}, 20:11473 (RA;FR)

SELF-IRRADIATION
Selfdose measurements in routine personal and environmental TLD systems, 20:11215 (RA;US)

SELF-POWERED DETECTORS
A filter technique for optimizing the photon energy response of a silicon pin diode, 20:11165 (RA;US)

SELLAFIELD REPROCESSING PLANT
Estimating by a dynamic compartment model the activity concentration and radiation exposure after discharge of radionuclides into the coastal waters of Northwest Europe, 20:10943 (R;DE;In German)

SELOX PROCESS
See COAL GASIFICATION

SEMICONDUCTOR DEVICES
See also SEMICONDUCTOR LASERS
TRANSISTORS
Examination of superconductor-semiconductor hybrid devices in the niob/silicon system, 20:10580 (R;DE;In German)

SEMICONDUCTOR LASERS
Time-dependent numerical simulation of vertical cavity lasers, 20:10583 (R;US)

SEMICONDUCTOR MATERIALS
Kinetic modeling of the atomic layer epitaxy window in group IV semiconductor growth, 20:11724 (R;US)
Optical determinations of energy-band dispersion curves in novel compound semiconductor materials, 20:10426 (R;US)

SENIOR CENTERS
See PUBLIC BUILDINGS

SEPARATION EQUIPMENT
A low energy continuous reactor separator for the production of ethanol from corn grits/starch and biomass streams. 3rd

Quarterly report, October 15, 1994–January 15, 1995, 20:9835 (R;US)
A study of multi-stage/multi-function column for fine particle separation. Quarterly technical progress report, July 8, 1994–September 30, 1994, 20:9204 (R;US)
A study of multistage/multifunction column for fine particle separation. Quarterly technical progress report, October 1, 1994–December 31, 1994, 20:9205 (R;US)
Safety evaluation – Spent water treatment system components inventory release, 20:9773 (R;US)

SEPARATION PROCESSES
See also ISOTOPE SEPARATION
LEACHING
Hydrogen absorption/desorption method and apparatus, 20:9828 (PA;US)
Process and apparatus for producing tritium, 20:9806 (PA;US)
Status of stable enrichment and services at the Oak Ridge National Laboratory, 20:9803 (R;US)

SEQUESTRENE
See EDTA

SERPUKHOV TEVATRON
Neutron Beam Energy Spectrum Measurement in the 5H Channel of the Serpukhov Accelerator, 20:11694 (R;XJ;In Russian)

SERUM (BLOOD)
See BLOOD SERUM

SEWAGE SLUDGE
Energy-economic drying and incineration of sewage sludge, 20:10274 (R;DK;In Danish)

SHALLOW LAND BURIAL
See GROUND DISPOSAL

SHELL MODELS
Realistic effective interactions for shell-model calculations, 20:11419 (RA;FR)
Rotational motion in spherical shell model configurations, 20:11465 (RA;FR)

SHF RADIATION
See RADIOWAVE RADIATION

SHIELDED ORGANS
See PARTIAL BODY IRRADIATION

SHIELDING
Package program for microcomputer for the analysis and design of radiation shielding, 20:11929 (IA;TH;In Thai)
Shielding experiments with quasi-monoenergetic several tens MeV neutrons at 90 MV AVF cyclotron facility TIARA, 20:11690 (RA;JP)

SHIELDING MATERIALS
ENDF/B VI iron validation onpca-replica (H2O/FE) shielding benchmark experiment, 20:11681 (R;IT)
Multiple encapsulation of LANL waste using polymers. Final report, 20:9429 (R;US)
Pre-analyses of SS316 and SS316/Water Bulk Shielding Experiments, 20:11859 (R;JP)

SHIP REACTOR MUTSU
See MUTSU REACTOR

SHIPPINGPORT PRESSURIZED WATER REACTOR

SILICA
Lithology, fault displacement, and origin of secondary calcium carbonate and opaline silica at Trenches 14 and 14D on the Bow Ridge Fault at Exile Hill, Nye County, Nevada, 20:9491 (R;US)
Measurement of ultrashort pulses with a non-instantaneous nonlinearity, 20:10463 (R;US)
New barrier fluids for subsurface containment of contaminants, 20:10887 (R;US)

SILICIC ACID ESTERS
See ORGANIC SILICON COMPOUNDS

SILICON
Analysis of the dimerized Sb/Si(001)-(2x1) surface by x-ray standing waves, 20:10470 (R;US)
Characterization of polysilicon films by Raman spectroscopy and transmission electron microscopy: A comparative study, 20:10420 (R;US)
Damage Formation in Silicon Irradiated by Heavy Ions with Energy More than 1 MeV/a.m.u., 20:11720 (R;XJ)
Reciprocal space analysis of the microstructure of luminescent and nonluminescent porous silicon films, 20:11729 (R;US)
Silicon for metrological uses. Lectures, 20:10343 (R;DE;In German)

SILICON 32
PXAMS – Projectile X ray AMS: X ray yields and applications, 20:10465 (R;US)

SILICON CARBIDES
Characterisation of machined high-strength ceramic components. Final report, 20:10555 (R;DE;In German)
Structural ceramics incorporating whiskers, platelets, and particulate phases, 20:10352 (R;US)
Temperature dependence of ion-beam-induced amorphization in β-SiC, 20:10385 (R;US)
Thermal shock behavior of fiber-reinforced composites, 20:10355 (R;US)

SILICON DIODES
A filter technique for optimizing the photon energy response of a silicon pin diode, 20:11165 (RA;US)
Charge transport and recombination investigations in hydrogenated amorphous silicon (a:Si:H) pin diodes by its forward current mode, 20:10581 (R;DE;In German)

SILICON NITRIDES
Characterisation of machined high-strength ceramic components. Final report, 20:10555 (R;DE;In German)
High energy electron beams for ceramic joining, 20:10387 (R;US)

Structural ceramics incorporating whiskers, platelets, and particulate phases, 20:10352 (R;US)

SILICON OXIDES
See also SILICA
Characterization of collision cascade damage in $Ca_2La_8(SiO_4)_6O_2$ by HRTEM, 20:10386 (R;US)

SILICON SEMICONDUCTOR DETECTORS
See SI SEMICONDUCTOR DETECTORS

SILICON SOLAR CELLS
Recent progress in the photovoltaic manufacturing technology project (PVMaT), 20:9860 (R;US)

SILT
The distribution of heavy metals in the sediments of a basin of the harbour of Bremen, 20:10942 (R;DE;In German)

SILVER
High critical current silver-$Bi_2Sr_2CaCu_2O_{8-x}$ superconducting multilayer ribbons produced by rolling, 20:10393 (R;US)
Using the activation radiography in geological and geochemical studies, 20:10455 (RA;RU)

SILVER 100
Gamow-Teller strength distribution in the beta-decay of ^{100}Ag from total-absorption gamma spectrometry, 20:11411 (R;DE)

SILVER 107
Measurement of beta-decay half-lives of short-lived nuclei, 20:11571 (RA;JP)

SILVER 108 TARGET
A consistent parametrisation for the production rates of negatively charged hadrons and neutral strange particles in nucleon-nucleon, nucleon-nucleus and nucleus-nucleus collisions, 20:11389 (R;DE)

SILVER ALLOYS
Plasma spraying of beryllium and beryllium-aluminum-silver alloys, 20:10330 (R;US)

SILVER SULFATES
Growth and sedimentation of fine particles produced in aqueous solutions of palladium sulfate and palladium sulfate-silver sulfate induced by gamma-ray irradiation, 20:10494 (R;JP)

SIMPLEX PROCESS
See COAL GASIFICATION

SIMS
See MASS SPECTROSCOPY

SINTERED MATERIALS
Laser synthesis and microstructural characterization of ceramic nanosized powders, 20:10357 (RA;IT)

SIS SYNCHROTRON
Intensity measurements of slowly extracted heavy ion beams from the SIS, 20:10681 (R;DE)

SITE CHARACTERIZATION
Innovative site characterization demonstration saves time and money, 20:9755 (R;US)
Soil erosion measurement in Abruzzo (Italy): Comparison among different methodologies, 20:10869 (R;IT;In Italian)

SITE REHABILITATION
See REMEDIAL ACTION

SITE SURVEYS
See SITE CHARACTERIZATION

SKIN
Cutaneous mitochondrial protection by topical treatment of herbal antioxodiants following 60 Co-gamma irradiation, 20:11199 (RA;US)
Dose effect comparisons between HFR and BMRR irradiated dogs with respect to healthy tissue tolerance, 20:11072 (RA;US)
Skin dose determination using survey meters and Varskin Mod 2, 20:11162 (RA;US)
The irradiated volume dependency of early skin reaction after carbon ion beam irradiation, 20:11115 (RA;JP)

SLUDGES
See also SEWAGE SLUDGE
Functions and requirements for 105-KE Basin sludge retrieval and packaging, 20:9534 (R;US)
HC-21C off-gas test procedure, 20:9521 (R;US)
Loss/gain on ignition testing for HC-21C, 20:9522 (R;US)
Safety Evaluation of the ESP Sludge Washing Baselines Runs. Revision 1, 20:9686 (R;US)
Separation of flue-gas scrubber sludge into marketable products. Second year, first quarterly technical progress report, September 1, 1994--November 30, 1994 (Quarter #5), 20:9941 (R;US)
Test procedure for use of the shear vane in tanks 103-SY, 103-AN, and 103-AW, 20:9627 (R;US)

SLUGS (FUEL)
See FUEL RODS

SLURRIES

Coverings
Control of Eolian soil erosion from waste site surface barriers, 20:9469 (R;US)
Decontamination
Field test of six-phase soil heating at the Savannah River Site, 20:9745 (R;US)
Projects at the Western Environmental Technology Office. Quarterly technical progress report, October 1–December 31, 1994, 20:10861 (R;US)
Technology information profile: Long-Range Alpha Detector (LRAD), 20:10776 (R;US)
The Kwajalein bioremediation demonstration: Final technical report, 20:9304 (R;US)
Devolatilization
Dual-gas tracers for subsurface characterization and NAPL detection, 20:10903 (R;US)
Electric Currents
Transport of radioactive ions in soil by electrokinetics, 20:9750 (R;US)
Erosion Control
Control of Eolian soil erosion from waste site surface barriers, 20:9469 (R;US)
Gas Utilities
Disposal of slightly polluted soils. 2: Evaluation of soils polluted by gas utilities, 20:10889 (R;DK;In Danish)
Heating
Erace–an integrated system for treating organic-contaminated sites, 20:10900 (R;US)
Hydraulic Conductivity
Stochastic modeling of macrodispersion in unsaturated heterogeneous porous media. Final report, 20:10859 (R;US)
Hydrology
Stochastic modeling of macrodispersion in unsaturated heterogeneous porous media. Final report, 20:10859 (R;US)
Land Pollution Control
Disposal of slightly polluted soils. 3: Evaluation of soils polluted by heavy metals, 20:10890 (R;DK;In Danish)
Physical Properties
Control of Eolian soil erosion from waste site surface barriers, 20:9469 (R;US)
Pollution
Eielson Air Force Base Operable Unit 2 baseline risk assessment, 20:11230 (R;US)
Radiation Monitoring
An aerial radiological survey of the project Rio Blanco and surrounding area, 20:10865 (R;US)
Technology information profile: Long-Range Alpha Detector (LRAD), 20:10776 (R;US)
Radioecological Concentration
External exposure to arbitrary distributions of radionuclides in soil, 20:11183 (RA;US)
Radionuclide Migration
Aqueous samples from B-Plant, Tank 9-1, 20:10919 (R;US)
Passive field monitoring of plutonium and americium in soil, 20:10857 (R;US)
Status of outdoor radioactive contamination at the Hanford Site, 20:9718 (R;US)
Test documentation for the GENII Software Version 1.485, 20:11222 (R;US)
Transport of radioactive ions in soil by electrokinetics, 20:9750 (R;US)
Remedial Action
Albuquerque Operations Office, Albuquerque, New Mexico: Technology summary, 20:9727 (R;US)
Chelant extraction and REDOX manipulation for mobilization of heavy metals from contaminated soils, 20:10855 (R;US)
Development of Plasma Vitrification Technology for Contaminated Soil at the Savannah River Site, 20:9784 (R;US)
Dual-gas tracers for subsurface characterization and NAPL detection, 20:10903 (R;US)
Erace–an integrated system for treating organic-contaminated sites, 20:10900 (R;US)
Federal Facility Agreement progress report, 20:9785 (R;US)
Field investigation source area ST58 old Quartermaster service station, Eielson Air Force Base, Alaska, 20:9293 (R;US)
In situ soil remediation using electrokinetics, 20:10898 (R;US)
Monitoring remediation of trichloroethylene using a chemical fiber optic sensor: Field studies, 20:10915 (R;US)
Sampling
Aqueous samples from B-Plant, Tank 9-1, 20:10919 (R;US)
Environmental Measurement-While-Drilling system for real-time field screening of contaminants, 20:9754 (R;US)
Hanford Patrol Academy demolition sites closure plan, 20:9388 (R;US)
Surface Contamination
Surface radiological investigations at the 0816 Site, Waste Area Grouping 13, Oak Ridge National Laboratory, Oak Ridge, Tennessee, 20:9439 (R;US)
Waste Disposal
Disposal of slightly polluted soils. 1: Evaluation of oil and gasoline polluted soils, 20:10888 (R;DK;In Danish)
SOLAR ABSORBERS
Optical features of nanosize iron and molybdenum sulfide clusters, 20:9862 (R;US)
SOLAR COLLECTORS
Dependence of solar collectors on diffuse solar radiation, 20:9868 (R;DK;In Danish)
Efficiency of solar collectors at varying wind velocities, 20:9867 (R;DK;In Danish)
The Schiffdorf energy model for the Spaden elementary school, 20:10220 (IA;DE;In German)
SOLAR DRYERS
Thermodynamic optimisation of air collectors of solar dryers, 20:9865 (I;DE;In German)
SOLAR HEATING SYSTEMS
A cheap solar heating system connected to the existing hot water container. Sub-report - testing of containers in rows, 20:9872 (R;DK;In Danish)
Canadian/Dutch/Danish cooperation on low flow solar heating systems, 20:9863 (R;DK)

Cheap solar heating systems connected to the existing hot water container, 20:9870 (R;DK;In Danish)
Investigation of non-pressurized preheating container for a solar heating system, 20:9869 (R;DK;In Danish)

SOLAR NEUTRINOS
Detection of charged particles in superfluid helium, 20:11262 (R;US)
Gamow-Teller strength in the beta-decay of ^{37}Ca and its implications for the detection of the solar neutrino flux, 20:11535 (R;DE)
On the efficiency of the solar neutrino detection by the ^{98}Mo nuclei, 20:11383 (IA;RU)
Update of GALLEX solar neutrino results and implications, 20:11260 (R;US)

SOLAR RADIATION
Anomalous cloud absorption? A crtique of the paper entitled "Absorption of Solar Radiation by Clouds: Observations Versus Models", 20:10801 (R;US)
Carbonaceous aerosols influencing atmospheric radiation: Black and organic carbon, 20:10852 (R;US)
The whitehouse effect: shortwave radiative forcing of climate by anthropogenic aerosols, 20:10800 (R;US)

SOLAR SYSTEM
Views of the solar system, 20:11272 (R;US)

SOLFRAC PROCESS
See ENHANCED RECOVERY

SOLID CLUSTERS
Magnetization of ferromagnetic clusters, 20:11263 (R;US)

SOLID ELECTROLYTE FUEL CELLS
1990 fuel cell seminar: Program and abstracts, 20:10204 (R;US)
Metallic interconnects for solid oxide fuel cells. Final report, 20:10210 (R;DK;In Danish)
Novel carbon-ion fuel cells. Third quarter 1994 technical progress report, 20:10208 (R;US)

SOLID SCINTILLATION DETECTORS
See also BGO DETECTORS
PLASTIC SCINTILLATION DETECTORS
A large area CsI (T 1) detector for the scintillator shell of FOBOS (4Π spectrometer of charged particles), 20:10710 (RA;XJ)
A precision broad-range dosimeter based on cerium doped yttrium aluminum perovskite (YAP), 20:11146 (RA;US)
Method of light collection in scintillator calorimeters, 20:10692 (R;RU)

SOLID STATE LASERS
See also NEODYMIUM LASERS
SEMICONDUCTOR LASERS
Color center laser at 1.5 μm with a new configuration, 20:10575 (R;IT)
Femtosecond OPOs at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials, 20:10418 (R;US)
Improved performance 1590 nm Er:YLF laser, 20:10584 (R;US)
Parasitic oscillation suppression in solid state lasers, 20:10587 (PA;US)
Production of multi-terawatt laser pulses in Cr:LiSrAlF$_6$, 20:10600 (RA;US)

SOLID STATE PHYSICS
Karlsruhe Nuclear Research Center, Institute of Nuclear Solid State Physics. Progress report on research and development work in 1993, 20:10378 (I;DE;In German)

SOLID WASTES
See also MINERAL WASTES
SCRAP
Assessment of landfill reclamation and the effects of age on the combustion of recovered municipal solid waste, 20:9841 (R;US)
Hanford solid waste management system simulation, 20:9464 (R;US)
Interface control document between PFP Transition Project and Solid Waste Disposal Division, 20:9615 (R;US)

SOLIDS
Passive micromechanical tags. An investigation into writing information at nanometer resolution on micrometer size objects, 20:10505 (R;US)

SOLUTES
Stochastic analysis of transport of conservative solutes in caisson experiments, 20:10885 (R;US)

SOLUTIONS
See also AQUEOUS SOLUTIONS
LEACHATES
PROCESS SOLUTIONS
Chemical and physical properties vs degree of concentration of uranyl nitrate-nitric acid process streams of metal conversion plant, 20:9327 (R;US)

SOOT
Radiation/turbulence interactions in pulverized-coal flames. Technical progress report, first year, September 15, 1993–September 15, 1994, 20:9263 (R;US)

SOURCE ROCKS
Changes in the organic matter in the weathered zone above a petroleum bedrock, 20:9274 (R;DE;In German)

SOUTH CAROLINA
Environmental assessment for the offsite commercial cleaning of controlled and routine laundry from the Savannah River Site, 20:9725 (R;US)

SOUTHEAST REGION
See USA

SOUTHWEST REGION
See USA

SOVIET UNION
See USSR

SOYBEANS
'Noventa' - A new early mutant variety of soybean, Glycine max (L.) Merill, 20:11035 (IA;XA)

SPACE FLIGHT
Microdosimetry measurements with the RME-III on the space shuttle, 20:11173 (RA;US)

SPACE POWER REACTORS
See also SPACE PROPULSION REACTORS
Dual annular rotating "windowed" nuclear reflector reactor control system, 20:10037 (PA;US)

SPACE POWER UNIT REACTOR
See SPACE POWER REACTORS

SPACE PROPULSION REACTORS
Radial flow nuclear thermal rocket (RFNTR), 20:9987 (PA;US)

SPACE REFLECTION
See P INVARIANCE

SPACE SHUTTLES
Microdosimetry measurements with the RME-III on the space shuttle, 20:11173 (RA;US)

SPACECRAFT POWER SUPPLIES
Heat pipe cooled reactors for multi-kilowatt space power supplies, 20:9986 (R;US)

SPARK CHAMBERS
Specific Characteristics of Spark Chambers Filled with Neon with Air Contamination, 20:10744 (R;XJ;In Russian)

SPARK COUNTERS
Application of automatic spark-over track counter for fission density fistribution measurement in a critical assembly, 20:10718 (IA;RU)
Tumping spark counters of Radium Institute, 20:10717 (IA;RU)

SPARTICLES
Search for SUSY at CDF, 20:11300 (R;US)

SPEAR
Nonlinear beam dynamics experimental program at SPEAR, 20:10626 (R;US)

SPECIAL RELATIVITY THEORY
See RELATIVITY THEORY

SPECTROMETERS
See also ALPHA SPECTROMETERS
ELECTROSTATIC SPECTROMETERS
GAMMA SPECTROMETERS
MASS SPECTROMETERS
NMR SPECTROMETERS
Time-of-flight Fourier spectroscopy with polarized neutron beams, 20:11693 (IA;RU)

SPECTROSCOPY
See also GAMMA SPECTROSCOPY
ION SPECTROSCOPY
LASER SPECTROSCOPY
MASS SPECTROSCOPY
X-RAY SPECTROSCOPY
Application of modern diagnostic methods to environmental improvement. Annual progress report, January–October 1994, 20:10808 (R;US)

SPENT FUEL CASKS
Gas liquid sampling for closed canisters in KW Basin - test plan, 20:9538 (R;US)
In situ characterization of metal fuel stored in the Hanford K Basins, 20:9348 (R;US)

SPENT FUEL ELEMENTS
Creep strains predicted from constitutive equations for Zircaloy-clad spent fuel rods, 20:9490 (R;US)
Hazard categorization of 100K east and 100K west in-basin fuel characterization program activities, 20:9535 (R;US)

SPENT FUEL STORAGE
See also DRY STORAGE
Alternatives for the disposition of fuel stored in the PUREX facility, 20:9349 (R;US)
Basis for assessing the movement of spent nuclear fuels from wt to dry storage at the Idaho Chemical Processing Plant, 20:9345 (R;US)
Design criteria document, Fire Protection Task, K Basin Essential Systems Recovery, Project W-405, 20:9363 (R;US)
Foreign research reactor spent nuclear fuel inventories containing HEU and LEU of US-origin, 20:9337 (R;US)
Hanford spent nuclear fuel project recommended path forward, volume III: Alternatives and path forward evaluation supporting documentation, 20:9347 (R;US)
K Basins fuel encapsulation and storage hazard categorization, 20:9353 (R;US)
PWR Core II blanket fuel disposition recommendation of storage option study, 20:9364 (R;US)
Safety issues of dry fuel storage at RSWF, 20:9981 (R;US)
Special case waste hazard categorization. Revision 1, 20:9775 (R;US)
Spent nuclear fuels project characterization data quality objectives strategy, 20:9346 (R;US)
T Plant removal of PWR Chiller Subsystem, 20:9365 (R;US)

SPENT FUELS
Burnup
Automatic rapid processing cross section libraries for the prediction of PWR spent fuel isotopic compositions, 20:9998 (R;US)
Corrosion
In situ characterization of metal fuel stored in the Hanford K Basins, 20:9348 (R;US)
Validation concerns for dry storage of foreign research reactor spent nuclear fuel, 20:9665 (R;US)
Dry Storage
Validation concerns for dry storage of foreign research reactor spent nuclear fuel, 20:9665 (R;US)
Encapsulation
K Basins fuel encapsulation and storage hazard categorization, 20:9353 (R;US)
Historical Aspects
The ORNL Chemical Technology Division, 1950-1994, 20:9333 (R;US)
Inventories
Foreign research reactor spent nuclear fuel inventories containing HEU and LEU of US-origin, 20:9337 (R;US)
Materials Handling
OSR encapsulation basis – 100-KW, 20:9357 (R;US)
Packaging
Safety Evaluation for Packaging for the N Reactor/single pass reactor fuel characterization shipments, 20:9362 (R;US)
Pitting Corrosion
Corrosion of aluminum-cald spent fuel in reactor basin water storage, 20:9667 (R;US)
Pyrochemical Reprocessing
Spent fuel treatment at ANL-West, 20:9372 (R;US)
Radioactive Waste Disposal
A disposition strategy for highly enriched, aluminum-based fuel from research and test reactors, 20:9669 (R;US)
Direct conversion of spent fuel to High-Level-Waste (HLW) glass, 20:9378 (R;US)
Radioactive Waste Management
Interfaces between transport and geological disposal systems for high level radioactive waste and spent nuclear fuel, 20:9341 (R;XA)
Spent nuclear fuel management: A comprehensive database for the DOE Spent Nuclear Fuel Program, 20:11956 (R;US)
Radioactive Waste Storage
Interfaces between transport and geological disposal systems for high level radioactive waste and spent nuclear fuel, 20:9341 (R;XA)
Radiochemical Analysis
Benchmark data for validating irradiated fuel compositions used in criticality calculations, 20:10521 (R;US)
Rail Transport
Occupational radiation exposures to railroad workers from shipments of radioactive materials, 20:11134 (RA;US)
Reprocessing
The ORNL Chemical Technology Division, 1950-1994, 20:9333 (R;US)
Use of porous MgO in pyrochemical applications, 20:9371 (R;US)
Research Programs
The ORNL Chemical Technology Division, 1950-1994, 20:9333 (R;US)
Sampling
An assessment of KW Basin radionuclide activity when opening SNF canisters, 20:9770 (R;US)
Gas and liquid sampling for closed canisters in the K-West Basin, 20:9336 (R;US)
Hazard categorization of 100 K West fuel canister gas and liquid sampling, 20:9354 (R;US)
Spent nuclear fuel sampling strategy, 20:9356 (R;US)
Spent Fuel Storage
Benchmark data for validating irradiated fuel compositions used in criticality calculations, 20:10521 (R;US)
In situ characterization of metal fuel stored in the Hanford K Basins, 20:9348 (R;US)
Interim licensing criteria for physical protection of certain storage of spent fuel, 20:9789 (R;US)
Transport
Benchmark data for validating irradiated fuel compositions used in criticality calculations, 20:10521 (R;US)
Vitrification
Direct conversion of spent fuel to High-Level-Waste (HLW) glass, 20:9378 (R;US)
Waste Transportation
Interfaces between transport and geological disposal systems for high level radioactive waste and spent nuclear fuel, 20:9341 (R;XA)
Occupational radiation exposures to railroad workers from shipments of radioactive materials, 20:11134 (RA;US)
Transportation impact analysis for shipment of irradiated N-reactor fuel and associated materials, 20:9343 (R;US)

SPENT LIQUORS
A comprehensive program to develop correlations for the physical properties of Kraft black liquor. Interim report No. 3, 20:10244 (R;US)
Development of an alternative kraft black liquor recovery process based on low-temperature processing in fluidized beds. Final technical report on Annex 9, Task 1, 20:10245 (R;US)

SPERM
See SPERMATOZOA

SPERMATIDS
See SPERMATOZOA

SPERMATOZOA
Sperm transfer of gamma irradiated male fruit fly Dacus zonatus (Saunders), 20:11048 (IA;TH;In Thai)

SPHERICAL MODEL
Fluid dynamical model for isoscalar collective magnetic excitations in spherical nuclei, 20:11489 (IA;RU)

Ground state correlations and charge transition densities, 20:11508 (IA;RU)
SPHEROMAK DEVICES
Review of recent experiments on magnetic reconnection in laboratory plasmas, 20:11818 (R;US)
SPINELS
Amorphization of complex ceramics by heavy-particle irradiations, 20:10417 (R;US)
SPONTANEOUS FISSION
Spontaneous-fission half-lives of deformed superheavy nuclei, 20:11612 (R;DE)
SPUR REACTOR

STACK DISPOSAL
Real-Time Monitoring of Alpha Emissions. Final report, FY 1994, 20:9434 (R;US)
STAINLESS STEEL-18-4-1
See STAINLESS STEELS
STAINLESS STEEL-19-9DL
See STAINLESS STEELS
STAINLESS STEEL-304
Recycle of radiologically contaminated austenitic stainless steels, 20:9673 (R;US)
Temperature and strain-rate effects on deformation mechanisms in irradiated stainless steel, 20:10341 (R;US)
STAINLESS STEEL-304L
Hot-wall corrosion testing of simulated high level nuclear waste, 20:9666 (R;US)
STAINLESS STEEL-308
Atom probe field ion microscopy of Type 308 CRE stainless steel welds, 20:10312 (R;US)
STAINLESS STEEL-316
Effects of helium pre-implantation on the microstructure and mechanical properties of irradiated 316 stainless steel, 20:10342 (R;US)
Low cycle fatigue strength of diffusion bonded joints of alumina dispersion strengthened copper to 316 stainless steel, 20:10324 (R;JP;In Japanese)
Pre-analyses of SS316 and SS316/Water Bulk Shielding Experiments, 20:11859 (R;JP)
STAINLESS STEEL-316L
Fracture toughness properties of similar and dissimilar electron beam welds, 20:10320 (R;DE;In German)
STAINLESS STEEL-Z2CN18-10N
See CHROMIUM-NICKEL STEELS

STORAGE FACILITIES
Administrative Procedures
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 1, 20:9497 (R;US)
Degassing
Environmental assessment of oil degasification at four Strategic Petroleum Reserve facilities in Texas and Louisiana, 20:9302 (R;US)
Design
Design review plan for Multi-Function Waste Tank Facility (Project W-236A), 20:9562 (R;US)
Fast Flux Test Facility, Sodium Storage Facility project-specific project management plan, 20:9527 (R;US)
Kaiser Engineers Hanford internal position paper – Project W-236A, Multi-function Waste Tank Facility – Peer reviews of selected activities, 20:9564 (R;US)
Project W-236A, work plan for preparation of a design requirements document, 20:9572 (R;US)
Environmental Impacts
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 7. Revision 1, 20:9503 (R;US)
Equipment Interfaces
Recommendation on changing interfaces of W-058 and W-236A, 20:9563 (R;US)
Evaluation
Hanford Site existing irradiated fuel storage facilities description, 20:9358 (R;US)
Kaiser Engineers Hanford internal position paper – Project W-236A, Multi-function Waste Tank Facility – Peer reviews of selected activities, 20:9564 (R;US)
Maintenance
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), 20:9499 (R;US)
Materials Handling Equipment
Project W-151 development work plan for: Tank AZ-101 riser mapping tool and data acquisition system, 20:9557 (R;US)
Mixing
Jet mixing long horizontal storage tanks, 20:10520 (R;US)
Occupational Safety
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 7. Revision 1, 20:9503 (R;US)
On-Line Measurement Systems
Position paper – Tank temperature element location (Multi-Function Waste Tank Facility), 20:9569 (R;US)
Physical Protection
Interim licensing criteria for physical protection of certain storage of spent fuel, 20:9789 (R;US)
Planning
Management plan – Multi-Function Waste Tank Facility. Revision 1, 20:9561 (R;US)
Pneumatic Controllers
Operational test procedure for Bldg 241-A-701 air compressor, 20:9612 (R;US)

Radiation Monitoring
Evaluating airborne radionuclide concentrations in the tank farms, 20:9717 (R;US)
Position paper – Continuous air monitor (CAM) acquisition recommendation (Multi-Function Waste Tank Facility), 20:9570 (R;US)

Radioactive Waste Management
High level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 6, 20:9502 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 2, 20:9498 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 4, 20:9500 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 1, 20:9497 (R;US)

Remedial Action
Functions and requirements for tank farm restoration and safe operations, Project W-314. Revision 3, 20:9576 (R;US)
Hanford Tank Farm interim storage phase probabilistic risk assessment outline, 20:9430 (R;US)
Preliminary flowsheet: Ion exchange for separation of cesium from Hanford tank waste using resorcinol-formaldehyde resin, 20:9778 (R;US)
Recommendation on changing interfaces of W-058 and W-236A, 20:9563 (R;US)

Risk Assessment
Hanford Tank Farm interim storage phase probabilistic risk assessment outline, 20:9430 (R;US)

Safeguards
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), 20:9499 (R;US)

Safety Analysis
Preliminary safety evaluation (PSE) for Sodium Storage Facility at the Fast Flux Test Facility, 20:9764 (R;US)

Safety Engineering
Functions and requirements for tank farm restoration and safe operations, Project W-314. Revision 3, 20:9576 (R;US)

Sampling
Safety analysis for push-mode and rotary-mode core sampling, 20:9777 (R;US)

Security
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), 20:9499 (R;US)

Seismic Effects
Kaiser Engineers Hanford internal position paper – Project W-236A, Multi-function Waste Tank Facility – Peer reviews of selected activities, 20:9564 (R;US)

Specifications
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), 20:9499 (R;US)

Standards
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 4, 20:9500 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 1, 20:9497 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 5, 20:9501 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 7. Revision 1, 20:9503 (R;US)
High-level waste storage tank farms/242-A evaporator Standards/Requirements Identification Document (S/RID), Volume 2, 20:9498 (R;US)

Static Loads
Soil load above Hanford waste storage tanks (2 volumes), 20:9631 (R;US)

Temperature Control
Position paper – Tank heat loading. Revision 1, 20:9568 (R;US)

Underground Storage
Industrial automation systems control underground stores of natural gas. Remote control for three underground stores, 20:9320 (IA;DE;In German)

Ventilation Systems
Descriptions and diagrams of the primary and annulus ventilation systems of the double-shell tank farms as of January 1988, 20:9628 (R;US)
Position paper – Tank heat loading. Revision 1, 20:9568 (R;US)
Position paper – Tank ventilation system design air flow rates, 20:9566 (R;US)

STORAGE RINGS
See also BESSY STORAGE RING
BROOKHAVEN RHIC
HERA STORAGE RING
SPEAR
SERPUKHOV TEVATRON
SUPERCONDUCTING SUPER COLLIDER
Acceleration of deuterons at the UNK. Proposal, 20:10674 (RA;XJ)
Closed orbit related problems: Correction, feedback, and analysis, 20:10616 (R;US)
Eigenvector method for optimized orbit correction, 20:10617 (R;US)
Neural network technique for orbit correction in accelerators/storage rings, 20:10618 (R;US)
X-ray spectroscopy of highly-charged ions in a storage ring. Invited lecture, 20:10690 (R;DE)

STOVES
Efficiency and emissions of charcoal use in the improved Mbaula cookstove, 20:9843 (R;SE)
Efficiency and emissions of coal combustion in two unvented cookstoves, 20:9267 (R;SE)

STRAND BREAKS
Analysis of native cellular DNA after heavy ion irradiation: DNA double-strand breaks in CHO-K1 cells, 20:11080 (R;DE)

STRATEGIC PETROLEUM RESERVE
Environmental assessment of oil degasification at four Strategic Petroleum Reserve facilities in Texas and Louisiana, 20:9302 (R;US)
Groundwater flow velocity measurements in a sinkhole at the Weeks Island Strategic Petroleum Reserve Facility, Louisiana, 20:9275 (R;US)
Strategic Petroleum Reserve. Quarterly report, 20:9306 (R;US)
Update of assessment of geotechnical risks, strategic petroleum reserve, Weeks Island site, 20:9305 (R;US)

STRAW
Investigation of a straw combustion system for chopped straw, 20:9845 (R;SE;In Swedish)
Straw furnaces on farm level, 20:9846 (R;SE;In Swedish)

STRESS ANALYSIS
Analysis of lifting beam and redesigned lifting lugs for 241-AZ-01A decant pump, 20:10263 (R;US)
Integrated structural control design of large space structures, 20:10524 (R;US)

STRING MODELS
See also SUPERSTRING MODELS
How many N = 4 strings exist?, 20:11285 (R;DE)
On drawing complicated 3D surfaces, 20:11304 (R;RU)

STRONG INTERACTIONS
Determination of the strong coupling constant $\alpha_s(M_Z^2)$ under regardment of completely resummed leading and next-to-leading logarithms. Analysis of global event variables measured in hadronic Z decays, 20:11335 (R;DE;In German)
Measurement of α_s in e^+e^- annihilation at E_{cm} = 29 GeV, 20:11334 (R;US)

STRONTIUM
Effects of aqueous-soluble organic compounds on the removal of selected radionuclides from high-level waste part I: Distribution of Sr, Cs, and Tc onto 18 absorbers from an irradiated, organic-containing leachate simulant for Hanford Tank 101-SY, 20:9427 (R;US)

STRONTIUM 90
1995 Study and evaluation of fugitive and diffuse emissions from the 200 East Area at the Hanford Site, 20:9713 (R;US)
New method for Sr-90 determination in liquid samples by liquid scintillation counting, 20:11179 (RA;US)
Problems of Sr-90 analysis, 20:10702 (IA;DE;In German)
Radionuclide concentrations in fish collected from Jemez, Nambe, and San Ildefonso Tribal Lakes, 20:9737 (R;US)

STRONTIUM COMPOUNDS
See also STRONTIUM OXIDES
Electronic structure of (La, $Sr)_2CuO_4$ and $Ba_{0.6}K_{0.4}BiO_3$, 20:10428 (R;US)
Growth of superconducting Bi-Sr-Ca-Cu-O whiskers from amorphous precursors, 20:10368 (IA;RU)
Morphology and structure of BiSrCaCuO whiskers, 20:10373 (IA;RU)

Tank 241-BX-104 tank characterization plan, 20:9652 (R;US)
Tank 241-BY-105 tank characterization plan, 20:9639 (R;US)
Tank 241-C-103 tank characterization plan. Revision 1, 20:9637 (R;US)
Tank 241-C-111 headspace gas and vapor sample results - August 1993 samples, 20:9643 (R;US)
Tank 241-U-103 tank characterization plan, 20:9648 (R;US)
Telepresence and virtual environment applications on the light duty utility arm system, 20:9515 (R;US)
Test plan for qualification of the S-type fiberglass materials for use as the liquid observation well casing, 20:9650 (R;US)
Testing and development strategy for the tank waste remediation system, 20:9625 (R;US)

Remote Handling Equipment
Qualification test for the flexible receiver. Revision 2, 20:9578 (R;US)

Removal
Geophysical investigation of the SQ Tanks, 221-T Building, 200 West Area, 20:9524 (R;US)

Safety Analysis
Engineering test plan for Tank 241-SY-101 in situ viscometer, 20:9640 (R;US)
Safety evaluation for adding water to tank 101-SY, 20:9620 (R;US)
Safety evaluation of interim stabilization of non-stabilized single-shell watch list tanks, 20:9629 (R;US)

Sampling
Gas characterization system functional design criteria, 20:9608 (R;US)
Number of core samples: Mean concentrations and confidence intervals, 20:9633 (R;US)
Tank 241-BX-104 tank characterization plan, 20:9652 (R;US)

Specifications
W-025, Acceptance Test Report, 20:9545 (R;US)

Stabilization
Safety evaluation of interim stabilization of non-stabilized single-shell watch list tanks, 20:9629 (R;US)

Temperature Control
Position paper - tank inlet air temperatures, 20:9565 (R;US)
Uncertainties in the measured quantities of water leaving waste Tank 241-C-106 via the ventilation system, 20:9597 (R;US)

Thermal Energy Storage Equipment
Temperature stratification in heat storage facilities, 20:10111 (R;DK;In Danish)

Ventilation
Engineering task plan for the vapor monitor installation into 241-C-103 tank, 20:9599 (R;US)

Ventilation Systems
Position paper - primary ventilation system configuration, 20:9567 (R;US)
Position paper - tank inlet air temperatures, 20:9565 (R;US)
Results from evaporation tests to support the MWTF heat removal system design, 20:9559 (R;US)

Void Fraction
Void fraction instrument software, Version 1.1., acceptance test procedure, 20:9586 (R;US)

Waste Retrieval
Spare mitigation/retrieval mixer pumps, 20:9607 (R;US)

TANTALUM
Experiments on e^+e^--line emissions in HI collisions, 20:11702 (R;DE)

Dynamics of the L → H transition, VH-mode evolution, edge localized modes and R.F. driven confinement control in tokamaks, 20:11783 (R;US)
First Wall
The first wall test facility FIWATKA - description of the facility and report on commissioning tests, 20:11863 (R;DE)
Instability
Existence of core localized toroidicity-induced Alfven eigenmode, 20:11824 (R;US)
Kink Instability
Effect of toroidal plasma flow and flow shear on global MHD modes, 20:11795 (R;US)
Lower Hybrid Current Drive
Evaluation of current drive requirements and operating characteristics of a high bootstrap fraction advanced tokamak reactor, 20:11778 (R;US)
Magnetic Reconnection
Review of recent experiments on magnetic reconnection in laboratory plasmas, 20:11818 (R;US)
Mhd Equilibrium
Maryland Controlled Fusion Research Program. Progress report, November 1, 1993–October 31, 1994, 20:11785 (R;US)
Modifications
Summary discussion: An integrated advanced tokamak reactor, 20:11875 (R;US)
Non-Inductive Current Drive
Evaluation of current drive requirements and operating characteristics of a high bootstrap fraction advanced tokamak reactor, 20:11778 (R;US)
Oscillation Modes
Existence of core localized toroidicity-induced Alfven eigenmode, 20:11824 (R;US)
Plasma Confinement
Dynamics of the L → H transition, VH-mode evolution, edge localized modes and R.F. driven confinement control in tokamaks, 20:11783 (R;US)
Plasma Drift
Effect of toroidal plasma flow and flow shear on global MHD modes, 20:11795 (R;US)
Plasma Instability
Energetic particle destabilization of shear Alfven waves in stellarators and tokamaks, 20:11780 (R;US)
Tearing Instability
Effect of toroidal plasma flow and flow shear on global MHD modes, 20:11795 (R;US)
Turbulence
Parallel plasma fluid turbulence calculations, 20:11779 (R;US)
Wall Loading
Simple analysis of power load on the wall of IGNITOR Tokamak during normal operation, 20:11787 (R;IT)
TOKAMAK FUSION TEST REACTOR
See TFTR TOKAMAK
TOMATOES
Induced mutants in tomato, 20:11038 (IA;XA)
TOP PARTICLES
Studies of kinematic distributions and mass reconstruction of CDF top candidate events, 20:11395 (R;US)
TOP QUARK MODEL

TRITIDES
Dissolution rate and radiation dosimetry of metal tritides, 20:11068 (R;US)
TRITIUM
Atmospheric Precipitations
The tritium content of precipitation and surface water in Austria in 1992, 20:10040 (R;AT;In German)
The tritium content of precipitation and surface water in Austria in 1993, 20:10041 (R;AT;In German)
Containment
Tritium Processing and Containment Practices at the Savannah River Site, 20:9331 (R;US)
Dose-Response Relationships
Dose dependent qualitative analysis of the effects of tritiated water (HTO) on the developing mouse cerebellum from 15th day Post - Coitum, 20:11182 (RA;US)
Ecological Concentration
Quarterly sampling of the wetlands along the old F-Area effluent ditch: March 1994, 20:9721 (R;US)
Environmental Impacts
Implementation plan: Tritium supply and recycling programmatic environmental impact statement. Revised, 20:10038 (R;US)
Environmental Transport
Declustering and stochastic simulation of ground-water tritium concentrations at Hanford, Washington, 20:9706 (R;US)
Review of present groundwater monitoring programs at the Nevada Test Site, 20:10863 (R;US)
Excretion
Dose contribution from organically bound tritum after an acute tritiated water intake, 20:11178 (RA;US)
Experimental Data
The tritium content of precipitation and surface water in Austria in 1992, 20:10040 (R;AT;In German)
The tritium content of precipitation and surface water in Austria in 1993, 20:10041 (R;AT;In German)
Inventories
In-bed accountability of tritium in production scale metal hydride storage beds, 20:9794 (R;US)
Isotope Production
Process and apparatus for producing tritium, 20:9806 (PA;US)
Measuring Methods
In-bed accountability of tritium in production scale metal hydride storage beds, 20:9794 (R;US)
Production
Accelerator-driven assembly for plutonium transformation (ADAPT), 20:10604 (R;US)
Draft programmatic environmental impact statement for tritium supply and recycling, 20:10792 (R;US)
Draft programmatic environmental impact statement for tritium supply and recycling, 20:10793 (R;US)
Draft programmatic environmental impact statement for tritium supply and recyling. Executive summary, 20:10136 (R;US)
Experience with Palladium Diffusers in Tritium Processing, 20:9330 (R;US)
Tritium Processing and Containment Practices at the Savannah River Site, 20:9331 (R;US)
Radiation Monitoring
Problems of tritium detection in water, 20:10703 (IA;DE;In German)
Radioecological Concentration
Declustering and stochastic simulation of ground-water tritium concentrations at Hanford, Washington, 20:9706 (R;US)
Technetium-99, iodine-129 and tritium in the waters of the Savannah River Site, 20:9719 (R;US)
Recycling
Draft programmatic environmental impact statement for tritium supply and recycling, 20:10793 (R;US)
Draft programmatic environmental impact statement for tritium supply and recycling, 20:10792 (R;US)
Draft programmatic environmental impact statement for tritium supply and recyling. Executive summary, 20:10136 (R;US)
Retention
Dose contribution from organically bound tritum after an acute tritiated water intake, 20:11178 (RA;US)
Scintillation Counting
Technetium-99, iodine-129 and tritium in the waters of the Savannah River Site, 20:9719 (R;US)
Storage
Titanium for long-term tritium storage, 20:9688 (R;US)
Toxicity
Dose dependent qualitative analysis of the effects of tritiated water (HTO) on the developing mouse cerebellum from 15th day Post - Coitum, 20:11182 (RA;US)
TRITIUM EXTRACTION PLANTS
Control characteristics of a cascade composed of cryogenic distillation columns with feedback streams, 20:11858 (R;JP)
Draft programmatic environmental impact statement for tritium supply and recyling. Executive summary, 20:10136 (R;US)
Subcontracting strategy for the decontamination and decommissioning of Savannah River Site's First Tritium Extraction Facility, 232-F, 20:9689 (R;US)
TRITIUM PRODUCTION REACTORS
Draft programmatic environmental impact statement for tritium supply and recycling, 20:10793 (R;US)
Draft programmatic environmental impact statement for tritium supply and recycling, 20:10792 (R;US)
Implementation plan: Tritium supply and recycling programmatic environmental impact statement. Revised, 20:10038 (R;US)
TRITIUM TARGET
Simulation of NPLWR environment in the ATR Loop-1 test, 20:9953 (R;US)
TRITON REACTIONS
Pion momentum spectra in a nuclear charge exchange reaction Mg(t, ^{3} He), 20:11645 (RA;XJ)
TROPOSPHERE
Effects of nitric acid vapor on the formation of cloud droplets in troposphere, 20:10815 (R;FI;In Finnish)
Tropospheric chemistry of greenhouse gases in Finnish conditions, 20:10846 (RA;FI)
TROUT
Biocide by-products in aquatic environments. Quarterly progress report, April 1, 1978–June 30, 1978, 20:10946 (R;US)
TRU WASTES

See COAL GASIFICATION
WIND
Impacts of microphysics, radiation and environmental winds in mid-latitude and tropical squall-line systems, and their climatic implications, 20:10850 (R;US)
WIND ENERGY CONVERSION SYSTEMS
See WIND TURBINES
WIND GENERATORS
See ELECTRIC GENERATORS
WIND TURBINES
WIND LOADS
Critical analysis of wind conditions prescribed by the IEC-DIS 1400-1, 20:9920 (RA;DK)
Swing - stochastic wind generator, 20:9921 (RA;DK)
The turbulent wind field in various terrain types and in windfarms, 20:9911 (RA;DK)
WIND POWER PLANTS
Use of wind power in the Arctic regions - a demonstration project in Greenland. Final report, 20:9923 (R;DK;In Danish)

Wind power in low-wind regions. Construction and operation of medium-capacity wind power plants - economic, technical and legal aspects. Practical manual, 20:9893 (I;DE;In German)

WIND TURBINES
See also HORIZONTAL AXIS TURBINES
Experimental investigation of gearbox duration loadings on stall and pitch controlled wind turbines, 20:9904 (RA;DK)
Fatigue case study and loading spectra for wind turbines, 20:9902 (RA;DK)
IEA joint action. Wind conditions for wind turbine design, 20:9910 (R;DK)
IEA joint action. Wind turbine fatigue, 20:9896 (R;DK)
Is the damage of the NWP400 wind turbine at Lyse Wind Power Station, 1993-10-16 1500-1800 LST, related to severe wind conditions?, 20:9912 (RA;DK)
Load spectra from measurements and regulations, 20:9903 (RA;DK)
On the increment of the fatigue damage on wind turbines in wind farms, 20:9918 (RA;DK)
Pitch regulation of a wind turbine, 20:9908 (R;DK)
Review of the effect of IEC design cases on the design of the WEG MS3, 20:9919 (RA;DK)
Selected field experience from the German '250 MW Wind Programme', 20:9915 (RA;DK)
The turbulent wind field in various terrain types and in windfarms, 20:9911 (RA;DK)
User's manual for FAROW: Fatigue and reliability of wind turbine components: Version 1.1, 20:9926 (R;US)

WINDOWS
Design goals and challenges for a photovoltaic-powered electrochromic window covering, 20:9861 (R;US)

WINDSCALE REPROCESSING PLANT
See SELLAFIELD REPROCESSING PLANT

WIPP
FY95 capital asset implementation plan, 20:9392 (R;US)
Integrated modeling and experimental programs to predict brine and gas flow at the Waste Isolation Pilot Plant, 20:9473 (R;US)
Method of characterizing void volume headspace in vented transuranic waste sludge drums using limited sampling data, 20:9396 (R;US)
Methods for removing transuranic elements from waste solutions, 20:9369 (R;US)
National transuranic program plan, 20:9385 (R;US)
No-migration determination. Annual report, September 1, 1993–August 31, 1994, 20:9391 (R;US)
Recent progress in scenario development for the WIPP, 20:9478 (R;US)

WOOD ALCOHOL
See METHANOL

WOOD STOVES
See STOVES

WOODS-SAXON POTENTIAL
Chaos in axially symmetric nuclear potential with diffuse surface and spin-orbit coupling, 20:11412 (R;DE)

WORKERS
See PERSONNEL

WORKING FLUIDS
See also REFRIGERANTS
Partitioning of solutes between liquid water and steam in the system {Na-NH_4-NH_3-H-Cl} to 350°C, 20:9927 (R;US)

WWER TYPE REACTORS
See also WWER-3 REACTOR
Fire hazard analysis for WWER nuclear power plants. Report of the IAEA extrabudgetary programme on the safety of WWER nuclear power plants, 20:9959 (R;XA)

WWER-3 REACTOR
Analysis of transients for NPP with VVER-440 using the code SiTAP, 20:10084 (R;DE)
Guidance for the application of the leak before break concept. Report of the IAEA extrabudgetary programme on the safety of WWER-440 model 230 nuclear power plants, 20:9958 (R;XA)

WWER-440 REACTOR
See WWER-3 REACTOR

X

X RADIATION
See also SOFT X RADIATION
Energy dependence of pen dosemeters for x-rays (20-60 kV), 20:11152 (RA;US)
Pencil-chamber measurements of backscatter from elongated fields of low-energy x-rays, 20:11170 (RA;US)
Response characteristics of an extrapolation chamber made at IPEN to X radiation, 20:11164 (RA;US)

X-2830 RESONANCES
See MESONS

X-RASERS
See X-RAY LASERS

X-RAY DIFFRACTION
A new technique for measuring the separation of closely spaced dislocations using residual contrast conditions, 20:10462 (R;US)
High resolution powder diffraction comparison between neutrons and synchrotron radiation, 20:10737 (IA;RU)
Optical design and performance of the inelastic scattering beamline at the National Synchrotron Light Source, 20:10633 (R;US)

X-RAY DOSIMETRY
Response characteristics of an extrapolation chamber made at IPEN to X radiation, 20:11164 (RA;US)

X-RAY FLUORESCENCE ANALYZERS
Optimal filters for ISO K-fluorescence reference radiations, 20:10752 (RA;US)

X-RAY LASERS
Development of short pulse x-ray lasers for plasma probing, 20:11829 (RA;US)
Ray and wave optics modeling of laboratory x-ray lasers, 20:11830 (RA;US)

X-RAY RADIOGRAPHY
Manipulator-controlled manufacturing and on-line testing of composite materials. Subproject: Development and trial of test techniques. Final report, 20:10556 (R;DE;In German)
Photostimulated luminescence of KBr-In induced by excitation with UV radiation, 20:10997 (RA;US)
Powdered KBr-In as an effective x-ray storage material with a wide dynamic range, 20:10998 (RA;US)

X-RAY SOURCES
Soft x-ray sources: Comparison, 20:11682 (R;IT)

X-RAY SPECTROSCOPY
X-ray spectroscopy of highly-charged ions in a storage ring. Invited lecture, 20:10690 (R;DE)

XENON 120
Shape coexistence and deformations above Z=50. The study of the decay of $^{120g+m}$Cs to levels of ^{120}Xe, 20:11476 (RA;FR)

XENON 129 BEAMS
Energy loss and mean ranges of ^{129}Xe and ^{209}Bi in aluminium and Kapton, 20:11692 (RA;RU)

XENON 136
Looking inside giant resonance fine structure, 20:11523 (IA;RU)

XENON COMPOUNDS
Thermochemistry, kinetics and spectroscopy of KrF and Kr_2F, 20:10491 (R;US)

XENON ISOTOPES
See also XENON 120
XENON 136
Search for octupole deformation in neutron rich Xe isotopes, 20:11471 (RA;FR)

Y

Y*RESONANCES
See BARYONS

Y-12 PLANT
Implementation of a self-directed work team in a TLD Processing Center, 20:11136 (RA;US)

YANG-MILLS THEORY
Strong coupling expansion for scattering phases in hamiltonian lattice field theories. Pt. 2. SU(2) gauge theory in (2+1) dimensions, 20:11299 (R;DE)
Zero Modes of Gauss Constraint in Gaugeless Reduction of Yang-Mills Theory, 20:11327 (R;XJ)

YANKEE EVENT

Resolution of nuclear energy issues using accelerator-driven technology, 20:9420 (IA;XA)
Transmutation of long-lived radionuclides: Requirements for and review of technical possibilities, 20:9419 (IA;XA)

YEASTS
Microscopical investigation of cellular effects of 135 MeV/amu carbon along the path of the beam, 20:11111 (RA;JP)

YOLK
See EGGS

YTTERBIUM 154
Seniority-inverted yrast states in N=84 nuclei above gadolinium, 20:11451 (RA;FR)

YTTERBIUM 164
Mapping the structure of rotating nuclei, 20:11533 (R;SE)

YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES
YTTRIUM COMPOUNDS

YTTRIUM COMPLEXES
A precision broad-range dosimeter based on cerium doped yttrium aluminum perovskite (YAP), 20:11146 (RA;US)
An yttrium aluminum perovskite based gamma-ray dosimeter, 20:11147 (RA;US)

YTTRIUM COMPOUNDS
See also YTTRIUM OXIDES
Anomalous temperature dependence of the electromagnetic penetration depth in $Y_1Ba_2Cu_3O_{7-x}$ single crystals, 20:11747 (IA;RU)
Barium NQR and NMR in high-T_c superconductors, 20:11755 (IA;RU)
Defect chemistry of BSCCO and its high temperature conductivity, 20:10372 (IA;RU)
Doping dependence and orbital character of electronic states in HTSC's, 20:11744 (IA;RU)
Effect of microstructure on the ortho-to-tetra phase transition parameters in $YBa_2Cu_3O_{7-x}$ compound, 20:11768 (IA;RU)
Femtosecond spectroscopy of Y-$Ba_2Cu_3O_{7-\delta}$: electron-phonon interaction measurement and energy gap observation, 20:11758 (IA;RU)
Growth mechanisms, microstructures and superconducting transport properties of deposited HTSC materials, 20:11736 (IA;RU)
Improved magnetron sputter deposition and critical properties of large-area $YBa_2Cu_3O_{7-\delta}$ thin films, 20:10363 (IA;RU)
Instability at high flux-flow velocities in a high-temperature superconductor, 20:11737 (IA;RU)
On the structure of the superconducting ortho-II phase of $YBa_2Cu_3O_{6.51}$, 20:11769 (IA;RU)
Superconducting superlattices: preparation and applications, 20:10377 (IA;RU)
The oxidation state and magnetic behaviour of Tb in high-T_c related materials, 20:10349 (R;US)
$YBa_2Cu_3O_{7-x}$ film structure at surface steps on MgO substrates, 20:11767 (IA;RU)

YTTRIUM OXIDES
Pressure-temperature sensors: Solution deposition of rare earth doped garnet films, 20:10415 (R;US)
Sintering of textured $YBa_2Cu_3O_{7-x}$ under intensive ^{60}Co gamma irradiation, 20:10351 (R;US)
Temperature-dependent growth of $LaAlO_3$ films on $YBa_2Cu_3O_7$ C-axis films for multilayer structures, 20:10381 (R;US)

YUCCA MOUNTAIN
A floristic survey of Yucca Mountain and vicinity, Nye County, Nevada, 20:9695 (R;US)
FY 93 thermal loading systems study final report: Volume 1. Revision 1, 20:9389 (R;US)
FY 93 thermal loading systems study final report: Volume 2. Revision 1, 20:9390 (R;US)
Hydrochemical data base for the Death Valley Region, California and Nevada, 20:9492 (R;US)
Preliminary waste form characteristics report Version 1.0. Revision 1, 20:9482 (R;US)
Revised potentiometric-surface map, Yucca Mountain and vicinity, Nevada, 20:9493 (R;US)
The importance of thermal loading conditions to waste package performance at Yucca Mountain, 20:9485 (R;US)
Yucca Mountain Site Characterization Project technical data catalog: Quarterly supplement, 20:9697 (R;US)

Z

Z NEUTRAL BOSONS
Determination of the strong coupling constant $\alpha_s(M_Z^2)$ under regardment of completely resummed leading and next-to-leading logarithms. Analysis of global event variables measured in hadronic Z decays, 20:11335 (R;DE;In German)
Electroweak coupling measurements from polarized Bhabha scattering at the Z^0 resonance, 20:11391 (R;US)
LEP asymmetries and fits of the standard model, 20:11387 (R;FR)

ZEA MAYS
See MAIZE

ZEOLITES
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides. Progress report, September 15, 1993–September 15, 1994, 20:10490 (R;US)
Sorption behaviour of radiocaesium in soils from various regions of Libya and Sweden, 20:10911 (R;SE)

ZERO POWER REACTORS
See also FCA REACTOR
LVR-15 REACTOR
Vol. 5: Research reactor safety and operation (Instruction texts and problems for the training and examination of selected personnel at research nuclear facilities.), 20:10066 (I;CZ;In Czech)
Vol. 6: Database of problems for qualification examinations, 20:11890 (I;CZ;In Czech)

ZHURAVLEV PROCESS
See COAL GASIFICATION

ZINC COMPOUNDS
See also ZINC OXIDES

The distribution of heavy metals in the sediments of a basin of the harbour of Bremen, 20:10942 (R;DE;In German)

ZINC HALIDE PROCESS
See COAL LIQUEFACTION

ZINC OXIDES
Advanced sulfur control concepts for hot-gas desulfurization technology. Quarterly report, July–September 1994, 20:9206 (R;US)
Probe molecule studies: Active species in alcohol synthesis. Final report, July 1993–July 1994, 20:9210 (R;US)

ZION STATION UNIT-1
See ZION-1 REACTOR

ZION STATION UNIT-2
See ZION-2 REACTOR

ZION-1 REACTOR
The probability of containment failure by direct containment heating in Zion, 20:10097 (R;US)
The probability of containment failure by direct containment heating in Zion. Supplement 1, 20:10098 (R;US)

ZION-2 REACTOR
The axial distribution of reactivity coefficients, 20:9965 (RA;IL)
The probability of containment failure by direct containment heating in Zion, 20:10097 (R;US)
The probability of containment failure by direct containment heating in Zion. Supplement 1, 20:10098 (R;US)

ZIRCON
Amorphization of complex ceramics by heavy-particle irradiations, 20:10417 (R;US)

ZIRCONATES
See also PZT
Environmental attack effects on Li2ZrO3 and properties evolution as a function of the fabrication route, 20:10358 (R;IT)

ZIRCONIUM
Trace elements and the mechanical properties of intermetallic compounds, 20:10306 (R;US)

ZIRCONIUM 90
Looking inside giant resonance fine structure, 20:11523 (IA;RU)

ZIRCONIUM 90 TARGET
Decay modes of high-lying single-particle states, 20:11649 (IA;RU)

ZIRCONIUM ALLOYS
A proposed phase equilibrium diagram for Pt-Zr system, 20:10321 (I;AR;In Spanish)

ZIRCONIUM COMPOUNDS
See also ZIRCONATES
ZIRCONIUM OXIDES
The diffusion properties of ion implanted species in selected target materials, 20:11255 (R;US)

ZIRCONIUM ISOTOPES
See also ZIRCONIUM 90
Beta decay of medium-heavy neutron-rich nuclei, 20:11444 (RA;FR)
Hartree-Fock-Bogoliubov and configuration mixing calculations of isotope shifts for Kr, Sr, Zr and Hg isotopes, 20:11427 (RA;FR)

ZIRCONIUM OXIDES
Control of thin film processing behavior through precursor structural modifications, 20:10388 (R;US)
Nondestructive testing of ceramic engine components. Final progress report for completed CRADAs, 20:10350 (R;US)
Processing and characterization of transformation-toughened ceramics with strength retention to elevated temperatures. Final report, 20:10383 (R;US)
Structural ceramics incorporating whiskers, platelets, and particulate phases, 20:10352 (R;US)
Superacid catalysis of light hydrocarbon conversion. Fifth quarterly report, August 25, 1994–December 31, 1994, 20:9291 (R;US)
Using the high temperature thermoluminescence peak of ZrO_2 for the precision dosimetry of UV radiation, 20:11144 (RA;US)

ZIRCONOLITE
Amorphization of complex ceramics by heavy-particle irradiations, 20:10417 (R;US)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

☐ Charge to my ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no. _____

☐ Check/Money Order enclosed for $ _____

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

☐ Ship and Bill (see below for restrictions) _ _ _ _ _ _ _ _ _

Employer identification number (9 digits) —

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
Technology Administration
National Technical Information Service
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

IV. SELECTIONS

Order number _____ Report number _____

Abstract number (with vol., issue) _____

No. of fiche _____ No. of paper copies _____

Order number _____ Report number _____

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
